The Official Record of the United States Department of Agriculture

This series has been developed specifically for the Cambridge International AS & A Level Mathematics (9709) syllabus to be examined from 2020. Cambridge International AS & A Level Mathematics: Probability & Statistics 1 matches the corresponding unit of the syllabus, with a clear and logical progression through. It contains materials on topics such as data, variation, probability, permutations and combinations, binomial and geometric distributions, and normal distribution. This coursebook contains a variety of features including recap sections for students to check their prior knowledge, detailed explanations and worked examples, end-of-chapter and cross-topic review exercises and 'Explore' tasks to encourage deeper thinking around mathematical concepts. Answers to coursebook questions are at the back of the book.

Binding Theory explores how different kinds of nominal expressions such as names, noun phrases and pronouns come to have anaphoric relations amongst one another, and how they come to have reference to things in the world. This textbook provides a thorough and comprehensive introduction to modern binding theory, introducing a huge variety of nominal and especially pronominal expressions from the world's languages. Written in a clear and accessible style, and with numerous exercises and examples, this textbook will be invaluable to graduate and advanced undergraduate students of syntax and semantics.

The Playground

Official Record

A unique account of the amazing Thai cave rescue told in a heart-racing, you-are-there style that blends suspense, science, and cultural insight. On June 23, 2018, twelve young players of the Wild Boars soccer team and their coach enter a cave in northern Thailand seeking an afternoon 's adventure. But when they turn to leave, rising floodwaters block their path out. The boys are trapped! Before long, news of the missing team spreads, launching a seventeen-day rescue operation involving thousands of rescuers from around the globe. As the world sits vigil, people begin to wonder: how long can a group of ordinary kids survive in complete darkness, with no food or clean water? Luckily, the Wild Boars are a very extraordinary "ordinary" group. Combining firsthand interviews of rescue workers with in-depth science and details of the region's culture and religion, author Christina Soontornvat—who was visiting family in Northern Thailand when the Wild Boars went missing—masterfully shows how both the complex engineering operation above ground and the mental struggles of the thirteen young people below proved critical in the life-or-death mission. Meticulously researched and generously illustrated with photographs, this page-turner includes an author 's note describing her experience meeting the team, detailed source notes, and a bibliography to fully immerse readers in the most ambitious cave rescue in history.

Recreative Athletics; Suggestions for Programs of Recreative Athletics, Games and Sports, and for the Promotion of Physical Fitness

A Textbook of Sports Science : TEST, EVALUATION, ACCREDITATION, MEASUREMENTS And STANDARDS (TEAMS)

The author probes the richly complex gender dynamics of youth sports. Weaving together vivid first-person interviews and his own experiences as a volunteer for his sons' teams, Messner finds that despite the movement of girls into sports, gender boundaries and hierarchies still dominate, especially among the adults who run youth sports.

USA Today Index

Developed from celebrated Harvard statistics lectures, Introduction to Probability provides essential language and tools for understanding statistics, randomness, and uncertainty. The book explores a wide variety of applications and examples, ranging from coincidences and paradoxes to Google PageRank and Markov chain Monte Carlo (MCMC). Additional

The designers of educational or training programs that employ electronic technology might have many questions about a project while it is still in the early stages of development. For instance: Is the program's presentation too simple, or too complex for its target audience? Does the pacing of the program help or hinder comprehension? Which aspects of the program are the most appealing, and why? Formative evaluation can answer these, or similar questions. It can help guide designers of television programs, microcomputer software, interactive videodiscs, or virtually any other educational item, in making modifications that can lead to the development of a final product that fully achieves its stated goals. Until very recently, however, the person interested in avoiding potential problems through the use of formative evaluation would have been faced with difficulties of a different kind. Comprehensive treatment of formative evaluation has been scarce, and published discussion on formative evaluation of computer-based materials has been virtually nonexistent. Until now, that is. Barbara Flagg's Formative Evaluation for Educational Technologies provides comprehensive treatment of formative evaluation. The book offers: * extensive coverage of all the methods evaluators might use to assess the user friendliness, the appeal, and the outcome effectiveness of an educational program. * extensive focus on new technologies * coverage of all phases of program development, from initial idea to final product * discussion of formative evaluation as part of the broader field of curriculum evaluation * numerous case studies. This volume will appeal to a wide variety of people engaged in formative evaluation. It is an excellent guide for newcomers to the field; it is a state-of-the art document for established practitioners of instructional design and curriculum evaluation.
