[Contractor's Pricing Guide](#)

The new edition of a bestseller, this book is one of the leading educational resources for energy manager or energy professional as well as new people enter the field of energy management and energy engineering. It is the college and university textbook, as well as one of the most widely used books for professional development training. New topics include energy auditing, energy bills, life cycle costing, electrical distribution systems, boilers, steam distribution systems, control systems and computers, energy systems maintenance, insulation, compressed air, renewable energy sources and water management, distributed generation, and creating green buildings.

[The Outdoor Lighting Guide](#)

Thoroughly updated for the 2005 NEC, this handy book is a vest pocket solution to the everyday problems a trade person encounters in the field. Harvey's is a very concise presentation of the basic formulas, tables and charts structured around the basic NEC code topics, it contains simple, clear illustrations to amplify, clarify and simplify the concepts presented. Its the perfect little guide for anyone who needs a quick and easy to use on-the-job reference.

[Guide to Energy Management, Fifth Edition](#)

[Heat Exchanger Design Guide](#)

This new International Version includes all material covered in the standard eighth edition, but numerical data and calculations are expressed in Systeme International (SI) units. Completely revised, this latest edition includes chapters on electrical systems; motors and drives; commissioning; and human behavior and facility energy management. Also updated are chapters on lighting, HVAC systems, web-based building automation, control systems, buildings, and greenhouse gas management. Written by respected professionals, this book examines objectives of energy management and illustrates techniques proven effective for achieving results.

Over the past decade, there have been major advances in our understanding of ovarian physiology. These advances, together with the introduction of new medical technologies, have revolutionised the management of infertility. We may expect a pregnancy rate that is no different from that of normal fertile women of the same age, as a result of treatment. Moreover, new techniques of monitoring have greatly reduced the rate of treatment-induced complications such as multiple pregnancy and hyperstimulation. This book presents the current strategies of management for women whose infertility is caused by ovulatory disturbances. Detailed descriptions are given of the optimal method of treatment for anovulatory woman, the selection of the appropriate treatment and the practical details of its administration. There is also a full discussion about the complications of the treatment and the strategies to avoid. The book is intended for practising gynaecologists involved in the management of subfertile patients in both the developed and the developing world. Contents: Induction of Ovulation: Solutions and Problems (H S Jacobs) The Endocrine Basis for Spontaneous Ovulation, Ovulation Induction and Controlled Superovulation (S Robson & R J Norman) Screening of Patients Prior to Ovulation Induction and the Role of General Practitioners/General Gynaecologists in the Initial Work-up of Patients for Ovulation Induction (O Djahanbakhch et al.) Ovulation Induction in Hypogonadotrophic Patients (S Muttukrishna et al.) Ovulation Induction in Hyperprolactinaemia (S G Soule) Principles of Gonadotrophic Therapy (A Balen) Ovulation Induction in Patients with Polycystic Ovaries (S M Sathanandan & H S Jacobs) Strategies for Controlled Superovulation in Normal Ovulatory Patients for Assisted Conception (S Daya) Side Effects of Drugs Commonly Used for Induction of Ovulation (H J Out) Complications and Possible Long Term Risks of Ovulation Induction (E Saridogan et al.) The Role of Endocrinology, Ultrasound, and Doppler Analysis in Ovulation Induction (W M Buckett et al.) The Role of the Nurse in an Ovulation Induction Programme (F Plowman & B Parker) Obstetric Outcome of Pregnancies Following Induction Ovulation (E Saridogan & S Sathanandan) Role of Audit and Computers in an Ovulation Induction Programme (D Vinnikier) Readership: Gynaecologists and infertility specialists. Keywords: Ovulation Induction; Physiology; Medical Technology; Infertility; Pregnancy; Gynaecology

[The Ultimate Guide on Building a PC](#)

Heat Exchanger Design Guide: A Practical Guide for Planning, Selecting and Designing of Shell and Tube Exchangers takes users on a step-by-step guide to the design of heat exchangers in daily practice, showing how to determine an effective driving temperature difference for heat transfer. Users will learn how to calculate heat transfer coefficients for convective heat transfer, condensing, and evaporating using simple equations. Dew and bubble points are covered, with all calculations supported with examples. This practical guide is designed to help engineers solve typical problems they might encounter in their day-to-day work, and will also serve as a useful reference for students about the field. The book is extensively illustrated with figures in support of the text and includes calculation examples to ensure users are fully equipped to select, design, and operate heat exchangers. Covers design methods and correlations needed to design practical heat exchangers for process application. Includes geometrical calculations for the tube and shell side, also covering boiling and condensation heat transfer. Explores heat transfer coefficients and temperature differences. Designed to help engineers solve typical problems they might encounter in their day-to-day work, but also ideal as a useful reference for students learning about the field.

Newly updated for 2016, the Southern Indiana Fishing Map Guide is a thorough, easy-to-use collection of detailed contour lake maps, fish stocking and survey data, and the best fishing spots and tips from area experts. Fish and detailed area road maps and exhaustive fishing information for lakes and streams in the southern portion of the state are provided in this handy eBook. The guide is loaded with lake maps and fishing information for inland lakes, reservoirs, plus Ohio River coverage. Some notable lakes includes Eagle Creek Reservoir, Monroe, Patoka, Maxinkuckee, Shafer, Brookville, Cecil M. Harden, Cagles Mill, state park lakes, Fish & Wildlife Areas, and city reservoirs. Whether you're catfishing on the Wabash River, throwing topwaters for largemouth bass on Patoka Lake, casting crankbaits for stripers on Cecil M. Harden, or dunking a worm under a bobber for bluegills on John Hay, you'll find the information you need to enjoy a successful day out on the water on one of Southern Indiana's many excellent fisheries. Know your waters. Catch more fish with the Southern Indiana Fishing Map Guide.

Improve your life on all levels—mentally, physically, emotionally, and spiritually—with this essential reference guide to 160 easily-procured crystals, minerals, and stones. Packed with practical knowledge and 190 beautiful full-page photos, this easy-to-use handbook will teach you all about the gemstone world. Each page provides you with concise information: stone name and properties, color, corresponding chakra, planet, element, zodiac sign, numerology, association, and mental, emotional, physical, and spiritual uses. Margaret Ann Lembo's metaphysical crystal directory will also give you Mohs scale ratings, divinatory meanings, and a series of positive affirmations for each stone. How to charge, cleanse, and use gemstones in healing grids, plus how to use them as oracles for personal development and spiritual awakening. Praise: "When energetically used with the understandings and tips provided in this essential guide, all good things are possible. Your 'everything' go-to for crystals!" —Cyndi Dale, bestselling author of *The Complete Book of Chakra Healing and Beyond Soul Mates* "A must-have guide for anyone who even enjoys playing with rocks. Her straight-from-the-hip approach is matched by her passion, love and knowledge of each and every geode, multifaceted crystal, and everything in between." —Joan Ranquet, author of *Communication with All Life*

[Fixing Your Computer Absolute Beginner's Guide](#)

Written by three of the most respected energy professionals in the industry, this fifth edition of a bestseller is an energy manager's guide to the most important areas of energy cost cutting. It examines the core objectives of energy management and illustrates the latest and most effective strategies, techniques, and tools for improving lighting efficiency, combustion processes, steam generation/distribution, and industrial waste reutilization. The book then brings up to date such topics as energy system management, energy auditing, rate structures, economic evaluation, HVAC optimization, control systems and computers, process energy, renewable energy, and industrial water management.

Fix your own computer—without becoming a technical expert! This book is the fastest way to save money on computer repairs, avoid unnecessary frustration, and keep using perfectly good equipment instead of throwing it away. You're completely non-technical, you'll learn how to get the job done, one incredibly clear and easy step at a time. Computer repair and maintenance has never, ever been this simple! Who knew how simple fixing your computer could be? This is the easiest, most practical beginner's guide to fixing your own computer... simple, reliable instructions and crystal-clear pictures that show you exactly how to do it yourself! Here's a small sample of what you'll learn: Maintain your computer so it's less likely to break in the first place Perform simple "ounce of prevention" tasks now, so it's easier to fix problems later Learn simple troubleshooting techniques for figuring out what's wrong Find the right tools (you might already have them) Buy the right parts without spending more than you have to Fix aggravating Windows startup problems Smoothly recover from PC crashes Perform basic hardware repairs or upgrades at home, often in minutes Install a new hard disk, CD/DVD drive, or Blu-ray drive Speed up your computer by adding memory or upgrading its processor Troubleshoot and fix network and Internet connection problems And much more... Paul McFedries is a full-time technical writer and passionate computer tinkerer. He has authored more than 80 computer books that have sold more than 4 million copies. His recent titles include My Office 2013 RT, Windows 8 In Depth, Microsoft Windows 7 Unleashed, Microsoft Home Server 2011 Unleashed, and Tweak It and Freak It: A Killer Guide to Making Windows Run Your Way. He is also proprietor of Word Spy (www.wordspy.com), a website that tracks new words and phrases as they enter the English language.
