Long before biblical times, dreams may have been a source of divine and creative impulses to push humanity to greater levels of awareness, to initiate discoveries, and to develop inventions. Dreams have offered protection and guidance on the spiritual path towards the soul's divine purpose. Ancient tribal priests, medicine men, and shamans often used dreams to foretell fortunes and direct the travels of nomadic tribes to ensure their survival and safe journey. In *Afflatus: A Collection of Dreams and Their Gnostic Influence on Human Evolution*, author Trudy Fox presents a collection of historical events demonstrating how, through spiritual intervention, dreams have shaped the events of history and will continue to do so in the future. Fox seeks to inspire you to pursue the insight, guidance, and ideas that may be transmitted during the sleep state. She prompts everyone to pursue their heart's passions. The stories shared are about ordinary people who achieved extraordinary things through their dreams. There are those souls who at the right time in their personal evolution and the evolution of the world are open to receiving divine Gnostic inspiration. *Afflatus: A Collection of Dreams and Their Gnostic Influence on Human Evolution* aims to help you to become open to receiving divine guidance and, through this awareness, find your true meaning and purpose in life.

Seminar paper from the year 2009 in the subject Business economics - Accounting and Taxes, grade: 1,7, AKAD University of Applied Sciences Stuttgart, course: IFRS, language: English, abstract: 1 Introduction In a global economy there is a need for common accounting rules. It is simply important for an enterprise to know that national and international stock exchange rules require the application of internationally accepted accounting directives. So there are several good reasons for a trend towards internationalization. For an investor means internationalization usually accompanied by a standardization of accounting rules that he can compare financial statements quicker and easier. There are no longer time-consuming and expensive conversions of financial statements necessary. Internalization means also that the national differences in the determination of profit will disappear. Standardization would give the term "profit" substance and would allow the comparison of financial statements of different enterprises from several countries. In the European Union enterprises have a special responsibility since 2005. On the 12th of March 2002 the European Parliament endorsed the EC Commission's proposal that all EU listed companies must follow standards issued by the International Accounting Standards Board (IASB) in their consolidated financial statements starting no later than 2005. In this assignment I want to give a short overview about what the main principles of the International Financial Accounting Principles (IFRS) are all about and what differences to the German Statutory Accounting Rules (HGB) can be distinguished (chapter 2). Then I want to focus on the accounting of deferred taxes under IFRS (chapter 3). After a definition of deferral I want to explain the concepts and methods of deferral in this part. Finally I will have a closer look on deferred tax assets and deferred tax liabilities.

The March 2019 edition of Competition Power e-Magazine brings the highlights of the Current Affairs of February 2019 in detail under the name, "Newsmakers of the Month". This is followed by the one-liners of current affairs January 2019 under the title, "Current Affairs Zinger".
