## **An Introduction to Modern Stellar Astrophysics**

This book contains a collection of research papers on accounting information systems including their strategic role in decision processes, within and between companies. An accounting system is a complex system composed of a mix of strictly interrelated elements such as data, information, human resources, IT tool, accounting models and procedures. Accounting information systems are often considered the instrument by default for accounting automation. This book aims to sketch a clear picture of the current state of AIS research, including design, acceptance and reliance, value-added decision making, interorganizational links, and process improvements. The contributions in this volume emphasize that AIS has grown into a powerful strategic tool. The book provides evidence for this observation by examining a wide range of current issues ranging from theory development in AIS to practical applications of accounting information systems. In particular it focuses on themes of growing interest in the realm of XBRL and Financial Reporting, Management Information Systems, IT/IS Audit and IT/IS Compliance. The book will be of interest to financial and managerial accountants and IT/IS practitioners, including information systems managers and consultants.

financial reporting. This book is an essential tool for anyone applying, auditing, interpreting, regulating, studying or teaching IFRS. Written by EYs financial reporting professionals from around the world, this three-volume guide to reporting under IFRS provides a global perspective on the application of IFRS. Complex technical accounting issues are explained clearly and IFRS is set in a practical context with numerous worked examples and hundreds of illustrations from the published financial reports of major listed companies from around the world. The 2019 edition of International GAAP® has been fully revised and updated in order to:

- Continue to investigate the many implementation issues arising as entities adopt IFRS 9 (Financial Instruments) and IFRS 15 (Revenue from Contracts with Customers).
- Explore the complex implementation issues arising as entities adopt, in 2019, IFRS 16 (Leases).
- Include an updated chapter on the new insurance contracts standard IFRS 17 (Insurance Contracts), which reflects the recent discussions of the IASB's Transition Resource Group on implementation issues raised, proposed narrow-scope amendments to IFRS 17 intended by the IASB, and also explores other matters arising as users prepare for the adoption of this standard.
- Include an amended chapter on the revised Conceptual Framework, which was published in March 2018. The changes to the Conceptual Framework may affect the application of IFRS in situations where no standard applies to a particular transaction or event.
- Address amended standards and new interpretations issued since the preparation of the 2018 edition.
- Explain the many other initiatives that are currently being discussed by the IASB and by the IFRS Interpretations Committee and the potential consequential changes to accounting requirements.
- Provide insight on the many issues relating to the practical application of IFRS, based on the extensive experience of the book's authors in dealing with current issues.

This book presents a theoretical approach that allows the analysis of structures with magnetorheological and electrorheological layers, and shows, with the help of examples, how the mechanical behaviour of thin-walled laminated structures can be influenced. It consists of six chapters: Chapter 1 presents a brief overview of derivation approaches for theories of thin-walled structures, modelling of composites and modelling of laminated and sandwich structures. Chapter 2 describes the equivalent single layer model for thin laminated cylindrical shells, including the special cases of plates and beams. In addition to the classical mechanical properties, it also considers the electrorheological and magnetorheological properties. Chapter 3 presents the elastic buckling of laminated beams, plates, and cylindrical shells, discussing

various problems, such as the influence of the boundary conditions, external loading and magnetic fields. It also suggests different approximations for asymptotic methods. Chapter 4 focuses on the free vibrations of elastic laminated beams, plates and cylindrical shells, investigating the influence of the boundary conditions and other factors. Chapter 5 presents the latest results concerning vibration of laminated structures composed of smart materials and discusses in detail the influence of electric and magnetic fields on smart structures. These results provide insights into the optimal design of these structures. Lastly, Chapter 6 features a short appendix presenting asymptotic estimates and series.

Buku ini pertama-tama membahas mengenai persekutuan (partnership), secara lengkap dibahas dari pembentukan sampai dengan likuidasi. Hal ini perlu diketahui oleh mahasiswa karena persekutuan masih banyak di Indonesia dalam bentuk UMKM yang menggunakan modal sendiri tanpa menerbitkan saham dan lain-lain. Oleh karenanya, harus ditegaskan secara hukum, bagaimana pengikatannya antar-anggota, yang dibahas dalam Bab 1 yaitu pembentukan persekutuan. Setelah dibentuk, bagaimana mengoperasikan persekutuan tersebut, standar apa yang digunakan, dan bagaimana pendistribusian laba yang diperoleh dibahas pada Bab 2. Sesuai dengan karakteristik persekutuan yaitu limited life maka kemungkinan terjadi pembubaran yang dibahas di Bab 3 yaitu apabila ada anggota yang akan masuk atau ada anggota yang mengundurkan diri. Pembahasan selanjutnya mengenai persekutuan diakhiri dengan likuidasi, dibahas pada Bab 4 dan Bab 5. Pembahasan selanjutnya mengenai joint venture (usaha patungan) yang mempunyai karakteristik yang hampir sama dengan persekutuan, namun ini dalam skala besar yang berbentuk perusahaan untuk mengelola suatu proyek dengan pendanaan cukup besar yang dikelola bersama, baik secara jangka panjang maupun jangka pendek. Joint venture bisa berbentuk permanen atau temporer, tergantung objek yang dikelola. Hal ini dibahas dalam Bab 6. Bab 7 membahas mengenai konsinyasi, ini pun masih relevan dengan kondisi ekonomi sekarang dimana masih banyak kegiatan bisnis yang dilakukan dengan cara konsinyasi, baik bersifat sementara atau memang proses bisnisnya harus dilakukan dengan cara konsinyasi. Sistem ini biasanya terjadi pada perusahaan jasa transportasi (logistik) dan perusahaan yang bergerak di bidang percetakan dan fesyen. Sementara Bab 8 dan Bab 9 membahas penjualan angsuran (installment), hal ini juga masih banyak dilakukan oleh perusahaan, tidak hanya di bidang real estate, tetapi sekarang sudah ke semua produk kebutuhan rumah tangga. Hal ini juga terkait

dengan daya beli masyarakat dan penghasilan yang terbatas maka dibahas bagaimana membeli kendaraan secara angsuran, yang secara detil dibahas pada Bab 9. Bab 10 dan bab 11 membahas mengenai perusahaan yang sudah berkembang dengan membentuk cabang. Bagaimana akuntansi untuk cabang dan pusat secara standar akuntansi dan bagaimana menyusun laporan keuangan gabungan antara kantor pusat dan kantor cabang. Saat ini pun banyak perusahaan yang mempunyai cabang, dan bagian akuntansi mengalami kesulitan dalam menyusun laporan keuangan gabungan. Accountants have historically had an important role in the detection and deterrence of fraud. As Joe Wells' Principles of Fraud Examination 4th edition illustrates, fraud is much more than numbers; books and records don't commit fraud – people do. Widely embraced by fraud examination instructors across the country, Principles of Fraud Examination, 4th Edition, by Joseph Wells, is written to provide a broad understanding of fraud to today's accounting students – what it is and how it is committed, prevented, detected, and resolved. This 4th edition of the text includes a chapter on frauds perpetrated against organizations by individuals outside their staff—a growing threat for many entities as commerce increasingly crosses technological and geographical borders.

This revision by Jim Napolitano retains the original material and adds topics that extend the text's usefulness into the 21st century. The introduction of new material, and modification of existing material, appears in a way that better prepares the student for the next course in quantum field theory. Students will still find such classic developments as neutron interferometer experiments, Feynman path integrals, correlation measurements, and Bell's inequality. The style and treatment of topics is now more consistent across chapters. The Second Edition has been updated for currency and consistency across all topics and has been checked for the right amount of mathematical rigor.

The Concise, Easy-to-Use Guide to Designing Chemical Process Equipment and Evaluating Its Performance Trends such as shale-gas resource development call for a deeper understanding of chemical engineering equipment and design. Chemical Process Equipment Design complements leading texts by providing concise, focused coverage of these topics, filling a major gap in undergraduate chemical engineering education. Richard Turton and Joseph A. Shaeiwitz present relevant design equations, show how to analyze operation of existing equipment, and offer a practical methodology for designing new equipment and for solving common problems. Theoretical derivations are avoided in favor of working equations, practical computational strategies, and approximately eighty realistic worked examples. The authors identify which equation applies to each situation, and show exactly how to use it to design equipment. By the time undergraduates have worked through this material, they will be able to create preliminary designs for most process equipment found in a typical chemical plant that processes gases and/or liquids. They will also learn how to evaluate the performance of that equipment, even when operating conditions differ from the design case. Coverage includes Process fluid mechanics: designing and evaluating pumps, compressors, valves, and other piping systems Process heat transfer:

It complements popular undergraduate textbooks for practical courses in fluid mechanics, heat transfer, reactors, or separations; supports senior design courses; and can serve as a core title in courses on equipment design.

Copley's Essentials of Accounting for Governmental and Not-for-Profit Organizations, 12e is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial statements. Governmental activities are recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet.
