Specifically designed for California students and teachers. The California Mathematics Content Standards are unpacked, taught, and then reinforced throughout our program so that teachers can plan, diagnose, teach, assess, and intervene with the standards in mind." Prealgebra is designed to meet scope and sequence requirements for a one-semester prealgebra course. The text introduces the fundamental concepts of algebra while addressing the needs of students with diverse backgrounds and learning styles. Each topic builds upon previously developed material to demonstrate the cohesiveness and structure of mathematics. Prealgebra follows a nontraditional approach in its presentation of content. The beginning, in particular, is presented as a sequence of small steps so that students gain confidence in their ability to succeed in the course. The order of topics was carefully planned to emphasize the logical progression throughout the course and to facilitate a thorough understanding of each concept. As new ideas are presented, they are explicitly related to previous topics."--BC Campus website Expressions, equations, and functions -- Properties of real numbers -- Solving linear equations -- Graphing linear equations and functions -- Writing linear equations -- Solving and graphing linear inequalities -- Systems of equations and inequalities -- Exponents and exponential functions -- Polynomials and factoring -- Quadratic equations and functions -- Radicals and geometry connections -- Rational equations and functions -- Probability and data analysis Glencoe Pre-Algebra is focused, organized, and easy to follow. The program shows your students how to read, write, and understand the unique language of mathematics, so that they are prepared for every type of problem-solving and assessment situation. Provide a strong foundation for future math learning Algebra 1 is for students and young adults who need extra help grasping new algebraic concepts. This full-color text teaches the key elements of algebra in a step-by-step approach, and helps prepare all students for high school exit exams and state testing. Lexile Level 650 Reading Level 3-4 Interest Level 6-12 On core mathematics provides complete coverage of the Common Core State Standards for Mathematics, including the Standards for Mathematical Practice"--Back cover Algebra 1 covers all the topics in a first-year algebra course and builds the algebraic foundation essential for all students to solve increasingly complex problems.
