"Over the past two centuries, technology has played a significant role in the understanding, diagnosis, and treatment of disease in Canada. Technology -- in the form of instruments, devices, machines, drugs, and systems -- has aided medical science, altered medical practice, and changed the illness experience of patients. Nineteenth-century medical technology consisted of predominantly surgical and diagnostic instruments used by individual practitioners. By the twentieth century, large, hospital-based technologies operated by teams emerged as powerful tools in the identification and management of disease [ ] Our selection of diseases, research initiatives, and medical treatments highlights larger patterns in medicine, identifies Canadian contributions, and considers the impact of these innovations on Canadian society. In this fifty-year period, public health initiatives limited the spread of contagious diseases
