The author recounts his move from the Southwest to Chicago, where he began his writing career in 1947, and chronicles his philosophical, political, and artistic development over the subsequent five years.

This book constitutes the refereed proceedings of the 10th International Conference on Web Reasoning and Rule RR 2016, held in Aberdeen, Scotland, UK, in September 2016. The 10 full papers and 3 technical communications presented were carefully selected from 17 submissions. Extensions and adaptations of classical rule-based languages have found their application in a range of areas, ontologies for the semantic web; querying web data; semantic data management; common-sense reasoning on the web

The complexity of the brain and the protean nature of behavior remain the most elusive science, but also the most important. van Hemmen and Sejnowski invited 23 experts from the many areas--from evolution to qualia--of systems neuroscience to formulate one problem each. Although each chapter was written independently and can be read separately, together they provide a useful roadmap to the field of systems neuroscience and will serve as a source of inspirations for future explorers of the brain.

The Oxford Handbook of American Drama Interweaving the interpretative methods of religious studies, literary criticism and cultural geography, essays in this volume focus on issues associated with the representation of place and space in the writing and reading of the postcolonial. It charts the ways in which contemporary writers extend and deepen our awareness of the ambiguities of economic, social and political relations in "sacred space" - the sense of spiritual significance associated with those concrete locations in which adherents of different religious traditions, past and present, maintain a ritual sense of the sanctity of life and its cycles. Part I, "Land, Religion and Literature after Britain," explores how postcolonial writers dramatize the contested processes of colonization, resistance and decolonization by which lands and landscapes may be viewed as now desecrated, now resacralized. Part II, "Sacred Landscapes and Postcoloniality across International Literatures," draws upon postcolonial theory to inquire into how contemporary fiction, drama and poetry represent themes of divine dispensation, dispossession and reclamation in regions such as Haiti, Israel, Bosnia-Herzegovina, the Arctic, and the North American frontier. A critical "Afterword" considers the implications of such multidisciplinary approaches to postcolonial literatures for present and future research in the field. Writers discussed in the essays include Russel Banks; James K. Baxter; Ursula Bethell; Erna Brodber; Marcus Clarke; Allen Curnow; Edwidge Danticat; Mak Dizdar; Sara Jeannette Duncan; Zee Edgell; "Grey Owl"; Haruki Murakami; Seamus Heaney; Peter Høeg; Hugh Hood; Janette Turner Hospital; James Houston; Dany Laferrière; B. K. Lings; Lee Kok Liang; K.S. Maniam; Mudrooroo; R.K. Narayan; Ngugi wa Thiong'o; Ben Okri; Chava Pinchas-Cohen; Mary Prince; Nancy Prince; Nanyang Sahgal; Ken Saro-Wiwa; Ibrahim Tahir; Amos Tutuola; W.D. Valgardson; Derek Walcott; and Rudy Wiebe. Maps accompany almost every essay.

SOFSEM 2015: Theory and Practice of Computer Science This book explores how working-class writers in the 1960s and 1970s significantly transformed British children's literature through their representations of working-class life and culture. Aidan Chambers, Alan Garner and Robert Westall provide examples of what Richard Hoggart termed 'scholarship boys': working-class individuals who were educated out of their class through grammar school education. This book highlights the role these writers played in changing the publishing and reviewing practices of the British children's literature industry while offering new readings of their novels featuring scholarship boys. As well as drawing on the work of Raymond Williams and Pierre Bourdieu, and referring to studies of scholarship boys in the fields of social science and education, this book also explores personal interviews and previously-unseen archival materials. Yielding significant insights on British children's literature of the period, this book will be of particular interest to scholars and students in the fields of children's and working-class literature and of British popular culture.

The Oxford Handbook of Management Makes concrete recommendations for peacebuilders in conflict-torn countries to improve capacity building, organisational learning, research and networking in locally appropriate ways. Local non-governmental organisations in conflict-torn countries often struggle to survive themselves in rapidly changing circumstances. This calls for flexibility and the capacity to learn. Locally appropriate ways to deal with conflict are needed but difficult to find. Peacebuilders (the dove) face various constraints as they develop and share their knowledge (the owl). Based on research carried out mainly in Liberia, Sierra Leone, Cambodia, and the Philippines, The Owl and the Dove maps these elements in order to find out how peacebuilders and workers can become more effective learners. It pays attention to exchanges with donor organisations, knowledge institutions and networks.

Mapping the Sacred Emphasizing why statistical techniques are essential tools for bioscientists, Biomeasurement removes the stigma attached to statistics by giving students the use key techniques for themselves. Placing the role of data analysis in the context of the wider scientific method and introducing students to common statistical concepts, the text demonstrates the power and importance of statistics throughout the study of bioscience.

Catalog of Copyright Entries. Third Series This book constitutes the thoroughly refereed proceedings of the 8th Joint International Semantic Technology Conference, JIST 2018, held in Awaji, Japan, in November 2018. The 23 full papers and 6 short papers presented were carefully reviewed and selected from 75 submissions. They present applications of semantic technologies, theoretical results, new algorithms and tools to facilitate the adoption of semantic technologies and are organized in topical sections on knowledge graphs; data management; question answering and NLG; ontology and reasoning; government open data; and semantic web for life sciences.

The Harleian Miscellany The Complete Works: Modern Critical Edition is part of the landmark New Oxford Shakespeare—an entirely new constellation of all of Shakespeare's works, edited afresh from all the surviving original versions of his work, and drawing on the latest literary, textual, and archival scholarship. In one attractive volume, the Modern Critical Edition gives today's students and playgoers the very best resources they need to read and enjoy all Shakespeare's works. The authoritative text is accompanied by extensive explanatory and performance notes, and innovative introductory materials which lead the reader into exploring questions about interpretation, textual variants, literary criticism, and performance, for themselves. The Modern Critical Edition presents the plays and poetry in the order in which Shakespeare wrote them, so that readers can follow the development of his imagination, his engagement with a rapidly evolving culture and theatre, and his relationship to his literary contemporaries. The New Oxford Shakespeare consists of four interconnected publications: the Modern Critical Edition (with modern spelling), the Critical Reference Edition (with original spelling), a companion volume on Authorship, and an online version integrating all of this material on OUP's high-powered scholarly e-content platform. Together, they provide the perfect resource for the future of Shakespeare studies.

British Working-Class Writing for Children The two-volume set LNCS 8218 and 8219 constitutes the refereed proceedings of the 12th International Semantic Web Conference, ISWC 2013, held in Sydney, Australia, in October 2013. The International Semantic Web Conference is the premier forum for Semantic Web research, where cutting edge scientific results and technological innovations are presented, where problems and solutions are discussed, and where the future of this vision is being developed. It brings together specialists in fields such as artificial intelligence, database networks, distributed computing, Web engineering, information systems, human-computer interaction, natural language processing, and the social sciences. Part 1 (LNCS 8218) contains a total of 45 papers which were presented in the research track. They were carefully reviewed and selected from 210 submissions. Part 2 (LNCS 8219) contains 16 papers from the in-use track which were accepted from 90 submissions. In addition, it includes contributions to the evaluations and experiments track and 5 papers of the doctoral consortium.

The Annual American Catalog, 1900-1909 This book constitutes the refereed proceedings of the 20th International Conference on Knowledge Engineering and Knowledge Management, EKAW 2016, held in Bologna, Italy, in November 2016. The 51 full papers presented were carefully reviewed and selected from 171 submissions. The papers cover all aspects of eliciting, acquiring, modeling, and managing knowledge, the construction of knowledge-intensive systems and services for the Semantic Web, knowledge management, e-business, natural language processing, intelligent information integration, personal digital assistance systems, and a variety of other related topics. A special focus was on "evolving knowledge: impact of space and time on knowledge representation, concerning all aspects of the management and acquisition of knowledge representation: evolving, contextual, and local models.

Knowledge Engineering and Knowledge Management The fairy tales collected by the brothers Grimm are among the best known and most widely read stories in western literature. In recent years commentators such as Bruno Bettelheim have, usually from a psychological perspective, pondered the underlying meaning of the stories, why children are so enthralled by them, and what effect they have on the the best-known tales (Hansel and Little Red Riding Hood, Cinderella, Snow White, and Sleeping Beauty) and shows that the Grimms saw them as Christian fables. Murphy examines arguments of previous interpreters of the tales, and demonstrates how they missed the Grimms' intention. His own readings of the five so-called "magical" tales reveal them as the beautiful and inspiring "documents of faith" that the Grimms meant them to be. Offering an entirely new perspective on these often-analyzed tales, Murphy's book will appeal to those concerned with the moral and religious education of children, to students of folk literature and children's literature, and to the many general readers who are captivated by fairy tales and their meanings.

The Owl, The Raven, and the Dove James Anthony Froude remains one of the most commonly referenced and frequently cited of Victorian pu intellectuals. Known to intellectual historians as the author of a monumentalHistory of England in the sixteenth century and as a key expos

Victorian religious doubt, he is also frequently referenced as the author of a series of scandalously provocative novels and of a hugely controversial biography of Thomas Carlyle. Historians of the British Empire and of Ireland have frequently been compelled to address his sometimes outrageous (often representative) historical writings. Scholars of mid-Victorian politics have no less often turned to Froude as a typical representative of the fears of democracy, while more recently students of political thought have identified him as an early representative of a new form of Communitarian civic republicanism. Yet for all that Froude remains a strangely marginalised, fragmented, and neglected figure. Ciaran Brady now addresses this remarkable gap. Based on a thorough critical examination of all of Froude's published works - many of which have been discovered and identified for the first time - and supplemented by intensive research into Froude's private and widely scattered manuscript materials, he offers the first full study of Froude's life and thought. Against the common assumption that Froude's life can be divided along simple lines - the sometime enfant terrible who aged into a respectable man of letters - he argues that there was a deeper coherence underlying everything he wrote from the scandalous productions of the 1840s to the authoritative university lectures of the 1890s. In addition to providing a study of a major but neglected nineteenth-century intellectual, Brady offers a critical analysis of the impulses, the aspirations, and the unquestioned assumptions underlying the Romantic project of personal renovation, and an alternative view of that unique phenomenon known as 'the Victorian sage'.

Web Reasoning and Rule Systems This digital edition combines, for the first time, both volumes of *The Complete Works of Aristotle: The Revised Oxford Translation*, which is universally recognized as the standard English version. The Oxford Translation of Aristotle was originally published in two volumes between 1912 and 1954. The revised edition contains the substance of the original translation, slightly emended in light of recent scholarship: three of the original versions have been replaced by new translations; and a new and enlarged selection of fragments has been added. The original translation remains the same: to make the surviving works of Aristotle readily accessible to English-speaking readers.

St. Nicholas This book constitutes the proceedings of the 41st International Conference on Current Trends in Theory and Practice of Computation, held in Pec pod Sněžkou, Czech Republic, during January 24-29, 2015. The book features 8 invited talks and 42 regular papers which were carefully reviewed and selected from 101 submissions. The papers are organized in topical sections named: foundations of computer science; software engineering; data, information, and knowledge engineering; and cryptography, security, and verification.

The Semantic Web - ISWC 2013 Management - the pursuit of objectives through the organization and co-ordination of people - has been an essential feature, and function, of modern society. Some 'classic' forms of corporate and bureaucratic management may come to be seen as a prevalent way of organization and organizing in the 20th century, and in the post-Fordist, global, knowledge driven contemporary world we are seeing different principles, and styles of management as old models are questioned. The functions, ideologies, practices, and theories of management have changed over time, as recorded by many scholars; and may vary according to different models of organization; and between different cultures and societies. The purpose of this Handbook is to analyse and explore the evolution of management; the core functions and how they may have changed; its place in the culture/zeitgeist of modern society; the institutions and ideologies that support it; and likely challenges and changes in the future. This book provides what management is, and how this may change over time. It provides an overview of management - its history, development, context, change, and its place in organization and society, key elements and functions, and contemporary and future challenges.

23 Problems in Systems Neuroscience Everyone wants to live a meaningful life. Long before our own day of self-help books offering twelve-week programs and other guides to attain happiness, the philosophers of ancient Greece explored the riddle of what makes a life worth living, providing a wide variety of ideas and examples to follow. This rich tradition was recast by Diogenes Laertius into an anthology, a miscellany of maxims and anecdotes, that generations of Western readers have consulted for edification as well as entertainment ever since the *Lives of the Eminent Philosophers* first compiled in the third century AD, came to prominence in Renaissance Italy. To this day, it remains a crucial source for much of what we know about the origins and practice of philosophy in ancient Greece, covering a longer period of time and a larger number of figures—from Pythagoras, Socrates to Aristotle and Epicurus—than any other ancient source. This new edition of the *Lives*, in a faithful and eminently readable translation by Pamela Mensch, is the first rendering of the complete text into English in nearly a century. Lavishly illustrated with a vast array of artwork, the profound impact of Diogenes on the Western imagination, this edition also includes detailed notes and a variety of newly commissioned essays by leading scholars that shed light on the work's historical and intellectual contexts as well as its rich legacy. The result is a capacious, fascinating, and charming compendium of ancient inspiration and instruction.

Ballou's Dollar Monthly Magazine This volume is the first affordable, modern collection of all eleven of the known Middle English Gawain tales. It aims to make these texts accessible to a wider, contemporary audience. These poems—The Wedding of Sir Gawain and Dame Ragnelle, Sir Gawain and the Carle of Carlisle, The Avowyng of Arthur, The Awyyntrs off Arthur, The Knightly Tale of Gologras and Gawain, The Greene Knight, The Turke and Sir Gawain, The Marriage of Sir Gawain, The Carle of Carlisle, The Jeaste of Sir Gawain, and King Arthur and King Cornwall—are united by their common concern with the theme of chivalry. Sir Gawain was by far the most popular of Arthur's knights in medieval England, and the verses here offer a window not only into English views on Gawain but also attitudes towards the knightly ideal and chivalry. Incorporating glosses and introductions for each text as well as an extensive glossary, this edition is excellent for students of Middle English romance.
