of the topics examined in the AS and A-level specifications - Consolidates understanding with tips and knowledge check questions - Provides opportunities to improve exam technique with sample answers to exam-style questions - Develops independent learning and research skills - Provides the content for generating individual revision notes

NEW A-LEVEL BIOLOGY AQA PRACTICE PAPERS (FOR THE EXAMS IN 2020).

Nail your A2 EMPA. I have taught, marked and moderated A-level ISAs and EMPAs for AQA and from this written the only specific guide for this exam. With my knowledge of common mistakes and mark schemes I am sure that this is an effective and comprehensive guide to the hardest parts of the process - experimental design and statistics. Most students seem to get themselves in knots, mainly because their teachers don't really understand it. By reading and understanding the theory, following the worked examples and finally completing the exam style questions, you will be doing everything you can to get your best mark in the exam. As with all exams the same questions keep coming up. Make sure you know what they are AND how to answer them. What this book is: An educational resources reviewing the use of statistics and the three statistical tests you need to be familiar with for your EMPA. Exam style questions on experimental design with exemplar answers based on previous mark schemes. It clearly walks through when each statistical test is used, includes worked examples and then an exam style question with a following mark scheme based on previous past papers. It comprehensively and thoroughly sets you up for task 1 and 2 as well as section A of the written paper. It also gives some insight into the style of questions in section B. What it is not: Written based on having seen this coming year's exam. This is not cheating!

My Revision Notes: AQA AS Biology Second Edition

Gcse Aqa Biology

Covering the core content of the AQA Biology 2006 onwards (single award) specification, this revision guide reflects the 'How science works' element of the course.

Aqa Biology Synoptic Essays

AQA AS/A Level Year 1 Biology Student Guide: Topics 3 and 4

'Official SQA Past Papers' provide perfect exam preparation. As well as delivering at least three years of actual past papers - including the 2008 exam - all papers are accompanied by examiner-approved answers to show students how to write the best responses for the most marks.

AQA A Level Biology Student

The only book written for the new (first sitting 2017) AQA Biology exam. This book gives clear, concise and updated advice for every title found in the last 20 years and complete A* essays for 25 of them. On top of this are example paragraphs, key tips and how to organise your essay to get the most marks. This book has evolved over a period of years. I am fortunate to have had a number of truly excellent students (Oxbridge and full UMS). Over the years I have ordered the transcript of all our school's A* papers and collated the essays. Where there were gaps I gave these students the past-paper essay titles and mark schemes and paid them to write 'model essays'. Then, as a trained marker, I edited them all to make sure they were written to an A* standard. A colleague of mine, who has also marked for AQA, then went through them as a third independent determination of their grade. We have used this collection of essays in our school for a number of years with fantastic results. With the advent of the new specification, I have revisited them and made changes to reflect the new content. Topics that are no longer at A-level have been removed and new content added, which has meant a number of particular large changes in the field of Ecology. This has been a surprisingly onerous undertaking, but I am very proud of the result. Someone then suggested to me that I should publish my work and this is the product - an analysis of over 40 titles and 25 A* essays.

New Grade 9-1 GCSE Biology AQA Practice Papers: Higher Pack 1
