Hobbies like painting, sewing, scrapbooking, woodworking, and photography provide crafters with more than just a way to have fun or make gifts. Even at their most basic, they're potent art forms that can distract the mind, soothe the soul, and de-stress the body. "Craft to Heal" describes how creative pursuits can be transformed into healing arts, which, in turn, can transform you. Mind-body research now shows that crafts are good for our mental, physical, and spiritual health, so we no longer need to make excuses for doing what we love. The truth is, crafts aren't just enjoyable, they're downright therapeutic!

Today's quilters have many demands on their time but still want to create beautiful quilts. By the Block shows the time-poor quilter how to make sophisticated, complex-looking quilts that are each based on an easy-to-assemble block that is used as a design tool. The 18 quilts in the book feature modern fabric choices and clever design, but all use standard quilting techniques that are in virtually every quilter's skill set. Author Siobhan Rogers has designed 18 quilts for the book, ranging from crib- to king-size quilts for beds as well as several large projects suitable for hanging. Four of the quilts have colourway variations that show the versatility of the basic design. The book is organized according to technique such as log cabins, half-square triangles, or curved piecing, but each project offers a new twist on the traditional methods of piecing and constructing quilts. Some of the blocks are over-sized, which help the quilter work efficiently, and the author offers additional time-saving tips. Several of the quilts use pre-cuts such as fat quarters, and some of the projects are perfect for using up fabric in the quilter's stash. Most of the quilt blocks used in the designs are constructed with easy-to-cut blocks requiring nothing more than a rotary cutter and a quilter's ruler; some quilts are created with simple templates that will be included in the book. |Simple, sophisticated quilts sewn ?by the block.? "Tells the story of migrants and communities in the Southeast Asian borderlands. The Black Flags raided their way from southern China into northern Vietnam, competing in the second half of the nineteenth century against other armed migrants and uplands communities for control of commerce (e.g., opium) and natural resources (e.g., copper for making coins). At the edges of empires--the Qing empire in China, the Vietnamese empire governed by the Nguyen dynasty, and, eventually, French colonial Vietnam--the Black Flags and their rivals sustained networks of power and dominance through the framework of political regimes. The history of these imperial bandits and the communities that resisted them demonstrates the plasticity of borderlines, the limits of imposed boundaries, and the flexible division between apolitical banditry and political rebellion in the borderlands of China and Vietnam. Historical studies of these areas tend to examine events only from the perspective of local communities or from the anxious view of imperial officials. By focusing on the Black Flags, upland communities, and their relationships to various empires, this study illustrates borderland processes at the violent edges of empire. It contributes to the ongoing reassessment of borderland areas as frontiers for state expansion, arguing that projects of empire often were instruments of power for armed migrants and their allies, and that, as a setting for forms of human activity that defy tight boundaries, borderlands continued to exist well after the establishment of formal boundaries"--

Create a sampler quilt as unique as you are! Tula Pink gives you an inspiring quilt block collection with Tula Pink's City Sampler. Make a beautiful, modern quilt of your own design with the 100 original quilt blocks or try one of the 5 city-themed sampler quilts designed by Tula. A note from Tula: "You will notice that the blocks are not named but simply numbered. This is intentional. I may have designed the blocks and given you the instructions on what to cut and where to stitch, but I have not infused the blocks with any meaning. This is your quilt. The fabrics that you choose, the colors that you use and why you are making it are what will give the quilt a purpose. Name your blocks, write in the margins, cross out the ones that you don't like, draw hearts around the ones that you love. In a perfect world, everyone's book would end up looking like a journal, coffee stains and all. The more adventurous ones might rename the book and write their own introduction. Tula Pink's City Sampler is a collaboration between you and me. I am the platform and you are the speaker, so stand on my shoulders and tell the future who you are and why you make."

Pucker or Puckering is the most used (abused?) term in the garment manufacturing industry. Pick up any quality controllers report, and the first thing that will strike your eye will be "...Puckering in armhole, ...Puckering in neckline binding, ...control Puckering in bottom hem..." the list is endless. Buying office quality controllers are as enamoured of this term as much as manufacturers abhor it. What is it that makes it so distasteful? Why does it occur? How can it be controlled? While there are numerous leaflets, documents and articles available on pucker, we have found that the majority of them lay great stress on "inherent pucker" (only material parameters). In this booklet have tried to include process parameters as well as sewing of lightweight fabrics. All said and done, the problem is so intricately interdependent that exhaustive compilation is well nigh impossible. We are sure this booklet will help manufacturers to understand the rationale behind this publication and we will consider our effort successful if enthusiastic readers regularly inform us about newer methods to tackle the problem.
