This volume describes how ESOL tests and test users have changed greatly in the past few decades. Some widely used ESOL tests have been revised, with a number of new tests incorporating advances in computer technology. In addition, many more ESOL practitioners than in the past are responsible for selecting and using tests. Stephen Stoyhoff and Carol A. Chapelle introduce teachers and administrators to the principles, methods, and vocabulary of language assessment. Twenty-one reviewers of ESOL tests consider test purpose, methods, and justification of their use in particular situations.

A collection of 28 invited papers surveying the state of the art in language testing.

Winner of the SAGE/ILTA Book Award 2016 The Routledge Handbook of Language Testing will provide a comprehensive account of the area of language assessment and testing. Written by leading specialists from around the world, this volume brings together approximately 35 authoritative articles (around 8000 words each). The proposed outline for the Handbook (below) is divided into ten sections. The section titles reflect the contents of their Language Testing and Assessment—textbook in our RAL series and sketch a useful overview of the discipline. Each chapter has been carefully selected to relate to key issues raised in the respective topic, providing additional historical background, critical discussion, reviews of key research methods, and an assessment of what the future might hold.

Learn how to achieve success—and eat your marshmallows, too—with this motivational, life-changing book. What explains the difference between success and failure? And what does it mean to you and your children? The answer lies in a landmark Stanford University study. Children were left in a room, each with a marshmallow, and given the choice of eating it then or fifteen minutes later, when they were promised an extra marshmallow as a reward for waiting. Some ate theirs right away. Others waited. But the study's real significance came a decade later when the researchers discovered that the children who held out for the reward had become more successful adults than the children who gobbled their marshmallows immediately. The lesson wasn't lost on Joachim de Posada, a world-renowned motivational speaker to thousands of corporate executives and professional athletes. The "marshmallow theory" answered a thirty-year quest to find a compelling explanation for why some people succeed and others fail. Posada was convinced that the key difference between success and failure is not merely hard work or superior intelligence but the ability to delay gratification. "Marshmallow resisters" achieve high levels of success while the rest of us eat all our marshmallows at once, so to speak—accumulating debt and dissatisfaction no matter what our occupations or incomes. But it doesn't have to be that way. Using a simple parable and real-life examples (including basketball great Larry Bird and major league baseball catcher Jorge Posada, Joachim's cousin), this book shows you how the moves you make today can pay off big tomorrow—if you just don't eat the marshmallow...yet!

Reflecting the internationalization of the field of second language writing, this book focuses on political aspects and pedagogical issues of writing instruction and testing in a global context. High-stakes assessment impacts the lives of second language (L2) writers and their teachers around the world, be it the College English Test in China, Common Core-aligned assessments in the U.S., English proficiency tests in Poland, or the material conditions (such as access to technology, training, and other resources) affecting a classroom. With contributions from authors working in ten different countries in a variety of institutional contexts, the chapters examine the uses and abuses of various writing-related assessments, and the policies that determine their form and use. Representing a diverse range of contexts, methods, and disciplines, the authors jointly call for more equitable testing systems that consider the socioeconomic, psychometric, affective, institutional, and needs of all students who strive to gain access to education and employment opportunities related to English language proficiency.

First-hand experience is cited from two new impact studies. One analyses the impact of the International English Language Testing System (IELTS), the second looks at the Progetto Lingue 2000 (Year 2000 Languages Project), a state-school foreign-language education improvement programme undertaken by the Ministry of Education in Italy. The main findings of these studies are presented, as well as theoretical and practical lessons to be learnt from them. The context is the role of impact studies in the test development and validation systems of Cambridge ESOL, the sponsor of both impact studies.

This volume examines the nature of second language listening proficiency and how it can be assessed. The book highlights the need for test developers to provide a clear explication of the ability constructs which underpin the tests they offer in the public domain. This is increasingly necessary if claims about the validity of test score interpretation and use are to be supported both logically and with empirical evidence. It operationalises a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components, examining and then analysing Cambridge ESOL listening tasks from the following perspectives: Test Taker; Cognitive Validity; Context Validity; Scoring Validity; Criterion-related Validity; and Consequential Validity.

Documents the development of the Cambridge ESOL Certificates in English Language Skills (CELS), a suite of modular examinations first offered in 2002. As a context for how CELS was conceived, developed, constructed, validated and managed, the book traces the history of exams which have influenced CELS. The Royal Society of Arts (RSA), later UCLES (University of Cambridge Local Examinations Syndicate) Communicative Use of English as a Foreign Language examinations (CUEFL) was one such influence, as were the Certificates in Communication Skills in English (CCSE), these exams being a development of the CUEFL. The University of Oxford Delegacy of Local Examinations (UODLE) examinations, taken over by UCLES in 1995, were a further influence on CELS. UODLE itself had worked in partnership with the Association of Recognised Language Schools (ARELS) Examinations Trust, the Oxford EFL reading and writing exams for many years offered in tandem with the ARELS Oral English exams.

The World Wide Web is the most revolutionary innovation of our time. In the last decade, it has utterly transformed our lives. But what real effects is it having on our social world? What does it mean to be a modern family when dinner table conversations take place over smartphones? What happens to privacy when we readily share our personal lives with friends and corporations? Are our Facebook updates and Twitterings inspiring revolution or are they just a symptom of our global narcissism? What counts as celebrity, when everyone can have a following or be a paparazzo? And what happens to relationships when love, sex and hate can be mediated by a computer? Social psychologist Aleks Krotoski has spent a decade untangling the effects of the Web on how we work, live and play. In this groundbreaking book, she uncovers how much humanity has - and hasn't - changed because of our increasingly co-dependent relationship with the computer. In *Untangling the Web*, she tells the story of how the network became woven in our lives, and what it means to be alive in the age of the Internet.

Business Benchmark helps students get ahead with their Business English vocabulary and skills and gives them grammar practice in business contexts. The Audio Cassettes contain all the recorded material for the listening activities in both editions of Business Benchmark 2, including BEC practice test listening.

It also explores and looks forward to the further extension of assessment frameworks to encompass a model for multilingual education. Key features of the volume include:- a clear and comprehensive explanation of several major multilingual projects - combination of theoretical insights and practical advice - discussion of the interpretation and use of the CEFR. Bestselling author Alain de Botton considers how our private homes and public edifices influence how we feel, and how we could build dwellings in which we would stand a better chance of happiness. In this witty, erudite look at how we shape, and are shaped by, our surroundings, Alain de Botton applies

Stendhal's motto that "Beauty is the promise of happiness" to the spaces we inhabit daily. Why should we pay attention to what architecture has to say to us? de Botton asks provocatively. With his trademark lucidity and humour, de Botton traces how human needs and desires have been served by styles of architecture, from stately Classical to minimalist Modern, arguing that the stylistic choices of a society can represent both its cherished ideals and the qualities it desperately lacks. On an individual level, de Botton has deep sympathy for our need to see our selves reflected in our surroundings; he demonstrates with great wisdom how buildings — just like friends — can serve as guardians of our identity. Worrying about the shape of our sofa or the colour of our walls might seem self-indulgent, but de Botton considers the hopes and fears we have for our homes at a new level of depth and insight. When shopping for furniture or remodelling the kitchen, we don't just consider functionality but also the major questions of aesthetics and the philosophy of art: What is beauty? Can beautiful surroundings make us good? Can beauty bring happiness? The buildings we find beautiful, de Botton concludes, are those that represent our ideas of a meaningful life. The Architecture of Happiness marks a return to what Alain does best — taking on a subject whose allure is at once tantalizing and a little forbidding and offering to readers a completely beguiling and original exploration of the subject. As he did with Proust, philosophy, and travel, now he does with architecture.

This publication highlights the need for test developers to provide clear explanations of the ability constructs which underpin tests offered in the public domain. An explanation is increasingly required, if the validity of test score interpretation and use are to be supported both logically, and with empirical evidence. The book demonstrates the application of a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components which reflect the practical nature and quality of an actual testing event. It examines Cambridge ESOL writing tasks from the following perspectives: Test Taker, Cognitive Validity, Context Validity, Scoring Validity, Criterion-related Validity and Consequential Validity. The authors show how an understanding and analysis of the framework and its components in relation to specific writing tests can assist test developers to operationalise their tests more effectively, especially in relation to criterial distinctions across test levels.
