Hunter Allen and Andy Coggan, PhD have completely revised the book that made power meters understandable for amateur and professional cyclists and triathletes. Power meters have become essential tools for competitive cyclists and triathletes. No training tool can unlock as much speed and endurance as a power meter--for those who understand how to interpret their data. A power meter displays and records exactly how much energy a cyclist expends, which lends unprecedented insight into that rider's abilities and fitness. With the proper baseline data, a cyclist can use a power meter to determine race strategy, pacing, and tactics. Training and Racing with a Power Meter makes it possible to exploit the incredible usefulness of the power meter by explaining how to profile strengths and weaknesses, measure fitness and fatigue, optimize workouts, time race readiness, and race using power. This new edition: Enables athletes to predict future performance and time peak form Introduces fatigue profiling, a new testing method to pinpoint weaknesses Includes two training plans to raise functional threshold power and time peaks for race day Offers 75 power-based workouts tuned for specific training goals This updated edition also includes new case studies, a full chapter on triathlon training and racing, and improved 2-color charts and tables throughout. Training and Racing with a Power Meter, will continue to be the definitive guide to the most important training tool ever developed for endurance sports.

This book has potential to improve every workout you do for the rest of your life. Smart Bodyweight Training is more than a book about how to achieve superior results through bodyweight training. It's about using the discipline of calisthenics as a tool to learn how to use every muscle in your body in a smarter and more effective way. Author Matt Schifferle first discovered bodyweight training after years of struggling with classic weight and cardio workouts. Within a few months, of using little more than a pull-up bar, Matt found new levels of strength and health through using techniques that required a fraction of the time and effort of costly gym-based workouts. Unsatisfied with classic step-by-step calisthenics routines, Matt has created an infinitely customizable approach that delivers fast, proven results for anyone from the rank beginner to the elite athlete. No matter where you are in your fitness journey, your best workouts are still yet to come not just by working harder, but through working smarter than ever before.

How to Train As if Your VERY LIFE Depended on Your Degree of REAL Strength, Power and Toughness Most physical training systems are designed for the domesticated human animal. That is to say, for us humans who live lives of such relative security that we cultivate our strength and power more out of pride and for a sense of accomplishment than out of an absolute need to survive in the wild. The professional athlete hones his body to function well in a sports event--rather than to emerge safe from a life-or-death struggle. And even those in our military and LEO rely more on the security of their weapons and armor than on their own personal, raw power and brute strength to carry the day. There remains one environment where exuding the necessary degree of authoritative strength and power can mean the difference between life or death: the maximum security prison. In maximum security, the predator preys on the weak like we breathe air. Intimidation is the daily currency. You either become a professional victim or you develop that supreme survival strength that signals the predator to stay at bay. Paul Wade spent 19 years in hell holes like San Quentin, Angola and Marion. He entered this world a gangly, terrorized weakling and he graduated to final freedom, pound-for-pound one of the strongest humans on the planet. Paul Wade dedicated his prison life to the cultivation of that supreme survival strength. And ironically, it is in America's prisons that we can find some of the great, lost secrets of how to get immensely powerful and strong. Paul Wade mined these secrets as if his life depended on it--and of course in many ways it did. Finally free, Paul Wade pays his debt to society--not just with the horrors of his years in the hole--but with the greatest gift he could possibly give us: a priceless set of progressions that can take ANYONE who has the will from abject weakness to strength specimen extraordinaire. In Convict Conditioning Paul Wade has laid out a logical and effective zero to hero progression in key bodyweight strength exercises and presented a solid training philosophy. Get this book. -Pavel Tsatsouline, author of The Naked Warrior Convict Conditioning Gives honor and respect to body-weight training. I feel Convict Conditioning provides the progression, precision and clarity that is necessary to combat our cultural decline in simple body knowledge. -Gray Cook, AMSPT, OCS, CSCS, Functional Movement Systems, author of Body in Balance Convict Conditioning is a fantastic text crammed with solid information, and tons of vital nuggets and powerful insights that when followed will pack your frame with rock-hard, functional muscle. You provide the body, Convict Conditioning gives you the rest in a highly readable, easy-to-understand format that teaches you what to do and how to do it. As a guy who has written extensively on exercise, I highly recommend this book. -Loren Christensen, author of Solo Training and The Fighter's Body. Coach Wade has laid out a set of progressions in Convict Conditioning that can lead to mastery of the big 6 bodyweight exercises and you would be wise to listen. This is knowledge proven in extreme conditions. So respect the progressions and put in your time--you'll be stronger for it. -Brett Jones Master RKC, CSCS, CK-FMS Outstanding! By far the most innovative fitness book in years. Many talk about mastering your body weight yet Convict Conditioning actually delivers a blueprint for anyone, regardless of your current fitness. The training progressions are genius. -Tim Larkin, Master Close Combat Instructor If you are a serious student of bodyweight exercise and physical culture, you must get this book. -Craig Ballantyne, Turbulence Training I LOVE IT. Convict Conditioning is probably the best compilation of callisthenic exercises and training progressions I have seen. Coach Wade goes to the heart of true training with correct biomechanics, kinesiology and training progressions that so many in the world of physical training just seem to miss these days. Bravo Coach, bravo, an epic book that deserves to be in the library of all who love the world of strength. -Mark Reifkind, Master RKC Instructor, Girya Kettlebell Training Convict Conditioning is jam packed with the most powerful bodyweight training information I have ever come across. It's the book I WISH I had in my hands when I was a competitive wrestler, BUT, even more important to me is that I can pass on this knowledge to my clients AND my son and daughter when they grow up. -Zach Even-Esh, author The Ultimate Underground Strength System

First published in 1961, "[T]his book is the result of ten years of research and experiment in the problems of muscle strength and muscle training at the Max-Planck-Institut für Arbeitsphysiologie, Dortmund, Germany supplemented by further work at the Lankenau Hospital, Division of Research, Philadelphia, Pennsylvania. There is provided the present status of these problems, and there is demonstrated how muscle strength may be built and maintained with a minimum of time and effort. "The methods used are adaptable, with suitable modification, to children, to average young people, to athletes in training, to sedentary workers and older persons who wish to maintain bodily strength, and to those who have undergone surgery and need rehabilitation of the muscle structure—in short, to anyone who wishes to develop and maintain good muscle tone. "A strong and well-built body not only has pleasing appearance, it permits the undertaking of arduous physical activities or active sports without undue fatigue, and with real enjoyment. "It is the author's hope that in this age of fast living and nervous tension, when there often seems neither time nor place for extensive exercise, this book will assist those who wish to maintain bodily strength and fitness—simply, at home, without elaborate equipment—on a do-it-yourself basis. It should prove of special benefit to teachers of physical education and rehabilitation."—THEODOR HETTINGER, M.D.
