World History

"A World in the Making is a kind of anthropological journey taken by four historians that assumes all societies are "hot," and all people make history and always have. We argue in our emphasis on lives and livelihoods for a world constructed, altered, renovated, remade by ordinary people even as we acknowledge the genius of individual innovators, disruptors who broke the mold or struck out in some new direction."--Provided by publisher.

World History Medieval and Early Modern Times

Most American young people, like their ancestors, harbor desires for a worthy life: a life of meaning, a life that makes sense. But they are increasingly confused about what such a life might look like, and how they might, in the present age, be able to live one. With a once confident culture no longer offering authoritative guidance, the young are now at sea—regarding work, family, religion, and civic identity. The true, the good, and the beautiful have few defenders, and the higher cynicism mocks any innocent love of wisdom or love of country. We are supercompetent regarding efficiency and convenience; we are at a loss regarding what it's all for. Yet because the old orthodoxies have crumbled, our "interesting time" paradoxically offers genuine opportunities for renewal and growth. The old Socratic question "How to live?" suddenly commands serious attention. Young Americans, if liberated from the prevailing cynicism, will readily embrace weighty questions and undertake serious quests for a flourishing life. All they (and we) need is encouragement. This book provides that necessary encouragement by illuminating crucial—and still available—aspects of a worthy life, and by defending them against their enemies. With chapters on love, family, and friendship; human excellence and human dignity; teaching, learning, and truth; and the great human aspirations of Western civilization, it offers help to both secular and religious readers, to people who are looking on their own for meaning and to people who are looking to deepen what they have been taught or to square it with the spirit of our times.

PRAXIS II History/Social Studies Test Prep Review--Exambusters World History Flash Cards

This is an informative history of NASA's rocket engine test facility, the Stennis Space Center in Mississippi. Chapter 1 - Decision for Mississippi * Chapter 2 - A Sense of Place * Chapter 3 - The Thorn Before the Rose * Chapter 4 - Temples in the Swamp * Chapter 5 - In Mississippi Mud * Chapter 6 - Testing Saturn * Chapter 7 - The Winds of Change * Chapter 8 - Growing Pains * Chapter 9 - Toward Full Utilization * Chapter 10 - In Search of a Role * Chapter 11 - Acceptance and Trust * Chapter 12 - Of Triumph and Tragedy * Chapter 13 - Testing the Way * Chapter 14 - Bigger Dreams * Chapter 15 - For Future Generations

Way Station to Space is a history of the NASA John C. Stennis Space Center, one of NASA's 10 Field Centers which was built in the enormously exciting days of the Apollo program for a specific purpose--to static fire and certify the huge Saturn V boosters used in the Apollo lunar landing program. With an eye to the future, the facility was planned as a national testing site for large propulsion systems that NASA might use for 25 to 50 years. This book provides the reader with a study of the Apollo

era when NASA engineers, technicians, and managers were engaged in that fantastic mission. It captures a sense of the excitement and determination of the NASA team as it prepared for those historic journeys to our nearest planetary neighbor. This book, however, also illustrates the evolution of the south Mississippi facility beyond the Apollo era. The development of the traditions and pride of the NASA Government and contractor teams, formulated during those early years, is likewise portrayed. As is indicated in the text, few of the men and women of that time are still actively working with us, but their tradition of excellence and hard work lives on. As the Apollo program began to ebb, the Nation's focus shifted away from the most ambitious plans for space exploration--to colonize the Moon, construct a Space Station, and mount a human mission to Mars--to less costly endeavors. Under creative management, the Mississippi team began to study the Nation's new priorities with the intention of becoming an integral part of the changing times. The Mississippi Test Facility (MTF--former name of SSC) diversified and brought in other Federal and State agencies to help share the cost of the Center and use of the developing technology. MTF personnel began looking for other customers, private and commercial, in addition to their new Government tenants. The men and women of the MTF were, in a real sense, "reinventing" Government over 25 years ago, long before that concept came into vogue. Way Station to Space takes the reader back through those interesting times and relates the story of how the small team evolved into a paradigm of engineering and scientific cooperation for others to follow. The MTF team recycled facilities and resources, turning part of the huge Center into a diverse environmental research center. The Stennis Space Center now serves as a model of multiagency synergy and is home to over 30 Federal and State agencies, universities, and private industries. This new addition to the NASA history series also illustrates how the men and women of this south Mississippi facility met challenges head-on. They not only preserved their installation, but they built a new foundation for the future. As a result in 1996, the Stennis Space Center was officially designated as NASA's Lead Center for rocket propulsion testing and in 1997 as the Lead Center for Commercial Remote Sensing.

A leader in the field presents a cohesive narrative of world history that effectively addresses the main challenge of the introductory survey: how to navigate beginning students through the vast detail of the subject. McNeill uses connective webs—along which trade, religious beliefs, technologies, pathogens, and much else traveled—to organize details and keep the big picture in view. Students emerge with clear takeaways and a strong sense of the basic dynamics of world history. Together with digital resources that amplify the webs approach and highlight diverse types of evidence, John McNeill's *The Webs of Humankind* offers a clear and effective teaching tool for the world history survey course.

Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the

history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, *The American Yawp* incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of *The American Yawp* will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and Africans. *The American Yawp* traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, *The American Yawp* gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

Give Me Liberty! An American History

New York Times Bestseller In the most ambitious one-volume American history in decades, award-winning historian and New Yorker writer Jill Lepore offers a magisterial account of the origins and rise of a divided nation, an urgently needed reckoning with the beauty and tragedy of American history. Written in elegiac prose, Lepore's groundbreaking investigation places truth itself—a devotion to facts, proof, and evidence—at the center of the nation's history. The American experiment rests on three ideas—"these truths," Jefferson called them—political equality, natural rights, and the sovereignty of the people. And it rests, too, on a fearless dedication to inquiry, Lepore argues, because self-government depends on it. But has the nation, and democracy itself, delivered on that promise? These Truths tells this uniquely American story, beginning in 1492, asking whether the course of events over more than five centuries has

proven the nation's truths, or belied them. To answer that question, Lepore traces the intertwined histories of American politics, law, journalism, and technology, from the colonial town meeting to the nineteenth-century party machine, from talk radio to twenty-first-century Internet polls, from Magna Carta to the Patriot Act, from the printing press to Facebook News. Along the way, Lepore's sovereign chronicle is filled with arresting sketches of both well-known and lesser-known Americans, from a parade of presidents and a rogues' gallery of political mischief makers to the intrepid leaders of protest movements, including Frederick Douglass, the famed abolitionist orator; William Jennings Bryan, the three-time presidential candidate and ultimately tragic populist; Pauli Murray, the visionary civil rights strategist; and Phyllis Schlafly, the uncredited architect of modern conservatism. Americans are descended from slaves and slave owners, from conquerors and the conquered, from immigrants and from people who have fought to end immigration. "A nation born in contradiction will fight forever over the meaning of its history," Lepore writes, but engaging in that struggle by studying the past is part of the work of citizenship. "The past is an inheritance, a gift and a burden," These Truths observes. "It can't be shirked. There's nothing for it but to get to know it."
