Scaling the Balkans

Modern Maritime Law and Risk Management provides comprehensive coverage of contemporary international admiralty and maritime law in an easily accessible style. It brings together substantive law, jurisdictional issues and international aspects of maritime liabilities and compensation with a practical discussion of modern risk management. The book is an essential guide for marine lawyers worldwide, students, shipowners, ship managers, salvors, shipbrokers, mortgagees, P&I Clubs, shipbuilders, port authorities, classification societies, regulators and other shipping and risk management professionals. With a wealth of information covered, the book is helpfully divided into four parts – Admiralty Jurisdiction and Procedure; Substantive Law; International Conventions; and Safety at Sea.

This volume contains papers presented at the 18th Annual EU Competition Law and Policy Workshop. The papers examine means of balancing effective (public) competition law enforcement and the requirements of legitimate and accountable exercise of public authority. The authors address the design and performance of various enforcement tools at European and national levels, including sanctions and remedies but also distinctive instruments under Regulation 1/2003 (eg commitment procedures) and under the Treaty on the Functioning of the European Union (Article 106(3) when used as a basis for infringement procedures). From the perspective of legitimacy, reflections focus on the implications of fundamental rights standards and general principles of law for the EU's complex and quasi-federal enforcement architecture. Issues that may sometimes escape judicial scrutiny are also discussed, such as how agencies prioritise their activities, and how investigation responsibilities are distributed within the European Competition Network. Effectiveness and legitimacy are then considered in the context of public enforcement cooperation beyond the EU, where international organisations, regional cooperation and a range of formal and informal modes of governance prevail.

The contract of employment is the central legal institution of modern English employment law. It provides the foundation upon which most statutory employment rights are constructed; it provides a conduit for the implementation of norms negotiated in collective bargaining; and it continues to provide a contractual structure for the terms and conditions of employment for a significant proportion of the working population. The Contract of Employment provides the most ambitious and comprehensive treatise on the theoretical and doctrinal aspects of the English contract of employment in the common law world. Under the general editorship of Professor Mark Freedland, the text has been produced by a team of world leading experts in employment law. Part I examines the theoretical context to the contract of employment, studying its structure and development from a wide variety of theoretical and comparative perspectives. Part II provides an exposition and analysis of the doctrinal aspects of the contract of employment. The coverage of The Contract of Employment is unrivalled in its depth, detail and sophistication. The legal analysis is always informed by a keen sense of the modern labour market context of the contract of employment, and it is sensitive to contemporary challenges such as precariousness, the interaction with migration law, the role of legislation in the contract of employment, and the decline of collective bargaining. It will be the principal reference point for the practitioners, judges, and academics concerned with the contract of employment as a legal category, both nationally and internationally.

English Regional Planning 2000-2010 chronicles a vital feature of recent UK planning activity, during the period of the Blair and Brown Labour governments up to 2010. It deals particularly with the regional scale of planning during these years, whereby large steps forward were made, but where policy making often proved very controversial. One purpose of the book is to learn from the many areas of policy development, method and skills which evolved during the decade up to 2010. This will mean that a future return to strategic planning should not have to reinvent the wheel. This book also helps to inform such planning in the rest of the developed world where higher-level planning is more prevalent. The book has eight chapters written by experts active in English regional planning during these years, alongside two chapters by the editors introducing and concluding on the experience as a whole. Thematic topics covered include the way in which housing and employment development was tackled in the varying English regional contexts, and the growing influence of transport and environmental factors on the spatial strategy. Process elements covered include how policy was made through public consultation and working with numerous stakeholders (economic, social, environmental), how the public examination of issues was organised, followed by final consideration by central government, and how monitoring informed the next policy review. The authors do not gloss over the difficulties encountered in the highly contested world of English local and regional politics, or the ways in which central government management of the regional planning process made life on the ground difficult for those engaged in the process. Nevertheless the account as a whole shows how a wealth of innovative and forward looking practices were developed. This multi-faceted study contributes to the understanding of how strategic planning can provide the framework for guiding spatial change and allocating resources, looking to a long-term sustainable future.

Text, Cases and Materials on European Union Law

The Contract of Employment

What is punishment? What is crime? What should be the normative and legal foundation for criminalization, for police suspicion, for the exclusion from the community, and for the deprivation of freedom? Who is the subject of rights within a society and what is the relevance of citizenship to criminal justice? These are fundamental and enduring questions of criminal justice and criminology, examined in this book as it charts the controversial use of immigration law for the purposes of the war on terror, closed detention centres, deportation, and border

policing. *The Borders of Punishment: Migration, Citizenship, and Social Exclusion* critically assesses the relationship between immigration control, citizenship, and criminal justice. It reflects on the theoretical and methodological challenges posed by mass mobility and its control and for the first time, sets out a particular sub-field within criminology, the criminology of mobility. Drawing together leading international scholars with newer researchers, the book systematically outlines why criminology and criminal justice should pay more attention to issues of immigration and border control.

English Regional Planning 2000-2010

This book elaborates on the rules governing the prosecution and sentencing of multi-offenders. The term 'multi-offender' is used for an offender that has committed a series of offences (either in one single act or in different acts); hence the addition of 'multi' in 'multi-offender'. A crucial element thereto is that the whole series of offences – which make the offender a multi-offender – has been committed before being subject to a final conviction. A comparative EU-study was conducted, focussing on the rules governing multi-offenders within different EU Member States. It reveals that this type of offenders challenge both the legislator and the prosecution and judges: when the offences are prosecuted in one go, the challenges are linked to finding an appropriate way to assess the severity of the criminal behaviour; if however the offences are prosecuted in several simultaneous or consecutive proceedings, the challenges are linked to taking account of the simultaneous or past proceeding. These challenges only grow if proceedings take place in different EU Member States. The analysis presented in this book is essential reading for EU policy makers, national policy makers, academics and defence lawyers throughout the EU working with multi-offenders. Undoubtedly, it will be an asset to their work in both mere national as well as in cross-border cases.

The granting of diplomatic asylum to Julian Assange, the dangers faced by diplomats in hotspots around the world, WikiLeaks and the publication of thousands of embassy cables - situations like these place diplomatic agents and diplomatic law at the very centre of contemporary debate on current affairs. *Diplomatic Law in a New Millennium* brings together 20 experts to provide insight into some of the most controversial and important matters which characterise modern diplomatic law. They include diplomatic asylum, the treatment (and rights) of domestic staff of diplomatic agents, the inviolability of correspondence, of the diplomatic bag and of the diplomatic mission,

the immunity to be given to members of the diplomatic family, diplomatic duties (including the duty of non-interference), but also the rise of diplomatic actors which are not sent by States (including members of the EU diplomatic service). This book explores these matters in a critical, yet accessible manner, and is therefore an invaluable resource for practitioners, scholars and students with an interest in diplomatic relations. The authors of the book include some of the leading authorities on diplomatic law (including a delegate to the 1961 conference which codified modern diplomatic law) as well as serving and former members of the diplomatic corps.

Each chapter of this Book is intended to stand alone so that the reader can refer to the chapter which deals with his or her specific area of interest. Hence some repetition may occur. If the reader wishes to gain further knowledge and deep understanding of the subject, he or she is directed to consult the scholistic work of the authors in the bibliography.

The Borders of Punishment

This book contains papers presented at the 11th Symposium of Computer Aided Process Engineering (ESCAPE-11), held in Kolding, Denmark, from May 27-30, 2001. The objective of ESCAPE-11 is to highlight the use of computers and information technology tools, that is, the traditional CAPE topics as well as the new CAPE topics of current and future interests. The main theme for ESCAPE-11 is process and tools integration with emphasis on hybrid processing, cleaner and efficient technologies (process integration), computer aided systems for modelling, design, synthesis, control (tools integration) and industrial case studies (application of integrated strategies). The papers are arranged in terms of the following themes: computer aided control/operations, computer aided manufacturing, process and tools integration, and new frontiers in CAPE. A total of 188 papers, consisting of 5 keynote and 183 contributed papers are included in this book.

European Symposium on Computer Aided Process Engineering - 11

This book gives a detailed analysis of the making of the Treaty of Nice, the current treaty of the European Union, adopted in 2000. It analysis the interests and strategies of the various actors, including the 15 Member States, during the negotiations and tries to explain the main institutional changes: re-weighting of votes in the Council of Ministers, future changes in the composition of the European Commission, extended use of qualified majority voting and easier conditions for a smaller group of Member States going faster in the integration process ('enhanced cooperation').

This book studies the normative intersection between integration, immigration and nationality in the European Union (EU). It examines the relationship between integration and the legal frameworks of admission, stay and access to nationality by third country nationals at national and European levels. Integration is being subject to multifaceted processes transforming its traditional policy and legal settings, as well as its classical theoretical premises and approaches. The Europeanisation of immigration policy has provoked the emergence of distinctive European approaches on integration. The legal elements of integration are being developed through two parallel settings: the EU Framework on Integration and European immigration law. These venues constitute two of the main pillars upon which the common EU immigration policy is being constructed, and their nexus raises several elements in need of reflection and study. This book examines the processes through which integration becomes a norm in nationality and immigration law and policy at the national and EU levels, and the implications of these processes for the legal status of third country nationals and the overall coherency of the common EU immigration policy.

The Quest for Environmental Regulatory Integration in the European Union

The Treaty of Nice

In this landmark effort to understand African American people in the New World, Gunnar Myrdal provides deep insight into the contradictions of American democracy as well as a study of a people within a people. The title of the book, *An American Dilemma*, refers to the moral contradiction of a nation torn between allegiance to its highest ideals and awareness of the base realities of racial discrimination. The touchstone of this classic is the jarring discrepancy between the American creed of respect for the inalienable rights to freedom, justice, and opportunity for all and the pervasive violations of the dignity of blacks. The appendices are a gold mine of information, theory, and methodology. Indeed, two of the appendices were issued as a separate work given their importance for systematic theory in social research. The new introduction by Sissela Bok offers a remarkably intimate yet rigorously objective appraisal of Myrdal—a

social scientist who wanted to see himself as an analytic intellectual, yet had an unbending desire to bring about change. An American Dilemma is testimonial to the man as well as the ideas he espoused. When it first appeared An American Dilemma was called "the most penetrating and important book on contemporary American civilization" by Robert S. Lynd; "One of the best political commentaries on American life that has ever been written" in *The American Political Science Review*; and a book with "a novelty and a courage seldom found in American discussions either of our total society or of the part which the Negro plays in it" in *The American Sociological Review*. It is a foundation work for all those concerned with the history and current status of race relations in the United States.

Social Protection of Civil Servants in Europe

This volume fills a gap in the literature regarding questions around the interactive dynamics between law and diplomacy on international trade and investment. It brings together lawyers and political scientists from Europe and Asia in an interdisciplinary effort at tracing the respective roles of law and diplomacy in the relations of the European Union (EU) with its trade and investment partners in Asia. Focusing on trade and investment relations with Asia, the EU presents a particularly interesting case as it has been a strong proponent of a rules-based international economic order for years and a frequent user of the formal procedures established in international treaties in case of disputes. At the same time, it has kept diplomatically active to adjust dispute management and international agreements to the needs and demands of the partners involved. Furthermore, not only is this region of crucial importance due to the presence of both vigorous emerging economies, like China, India and Vietnam, and more established partners, like Japan, EU-Asia relations also present a broad set of economic disputes and recent negotiation efforts analyzed in the contributions to this volume. This book will be of key interest to scholars and students of international trade/economic law, EU politics, EU external relations (law), international relations, diplomacy and more broadly to international relations and Asian studies.

Rural Land Takings Law in Modern China

It is a commonplace that pollution knows no borders, and that environmental law must allow for cross-border implementation. The European Union specifies this principle in EC directives on integrated pollution prevention and control (IPPC), on environmental impact assessment (EIA), and on the control of major accident hazards involving dangerous substances (Seveso II). This is the first book to investigate from both empirical and normative perspectives the effectiveness of these directives at the national level. It provides by far the most extensive comparative analysis and evaluation of the industrial permitting and inspections, EIA, and major accident prevention in the EU. Offering an in-depth study of the transposition and implementation of EC environmental directives in eight EU member states (Denmark, France, Germany, Italy, the Netherlands, Spain, Sweden, and the United Kingdom), the author who has played a significant role in the formulation of environmental legislation and regulation at both the national (German) and EU levels and provides a stable base for an assessment of the benefits and costs of the integrated approach to environmental protection. Among the factors considered are the following: key features of national constitutional, administrative, and judicial systems which provide the framework for

Acces PDF Chapter 20 Section 2 European Nations Settle North America

environmental regulations and their implementation in the eight countries under study; procedures and substantive requirements transposing the IPPC, EIA and Seveso II directives into national laws; and evaluation of national deficiencies and the extent of muddling through. The empirical part of Dr Bohne's analysis draws on 138 expert interviews with public and private actors, a survey of 178 public authorities, and document analyses of selected industrial permits and environmental impact statements. His comparative analysis of procedural, organizational, and substantive integration makes it possible to identify and compare national accomplishments in regulatory integration, and offers new insights into the effectiveness and limits of EC law. The study concludes with a discussion of the implications of the findings for European governance and better regulation after the enlargement of the EU. This thoroughly researched, rigorous, and insightful study will be of great interest and value to policymakers, regulators, business people, environmental NGOs, consultants, and lawyers, as well as to students of environmental policies and European governance.

European Competition Law Annual 2013

Infectious Diseases of Wild Mammals and Birds in Europe is a key resource on the diagnosis and treatment of infectious diseases in European wildlife that covers the distinctive nature of diseases as they occur in Europe, including strains, insect vectors, reservoir species, and climate, as well as geographical distribution of the diseases and European regulations for reporting, diagnosis and control. Divided into sections on viral infections, bacterial infections, fungal and yeast infections, and prion infections, this definitive reference provides valuable information on disease classification and properties, causative agents, epidemiology, pathogenesis, and implications for human, domestic and wild animal health. Key features:

- Brings together extensive research from many different disciplines into one integrated and highly useful definitive reference.
- Zoonotic risks to human health, as well as risks to pets and livestock are highlighted.
- Each disease is covered separately with practical information on the animal species in which the disease has been recorded, clinical signs of the disease, diagnostic methods, and recommended treatments and vaccination.
- Wildlife vaccination and disease surveillance techniques are described.
- Examines factors important in the spread of disease such as changing climate, the movement of animals through trade, and relaxations in the control of wide animal populations.
