### [The Architects' Journal](#)

Your guide to transforming your space, however big or small.

### [Standard Commodity Classification](#)

This book focuses on both two- and four-stroke reciprocating engines with particular emphasis on their characteristics and the materials used in their construction. It considers the engine in terms of each specific part and covers the metallurgy, surface modification, wear resistance and chemical composition of each engine constituent. The text includes supplementary notes and will be essential reading for engineers and designers of engines as well as for graduate students in the fields of combustion engineering, machine design and materials science.

### [Public Housing Design](#)

### [The Art of Good Housekeeping](#)

Construction prices rose over the last year by 5%, according to AECOM's tender price index, with construction price inflation continuing to run above the long-run average. The main drivers are rising input costs. Producer price indices have moved up at a clip in recent quarters, with sharp increases in prices for materials and fuels consumed by UK manufacturers. Demand- and supply-side factors make the probability of short-term price falls very slim. SPON'S ARCHITECTS' AND BUILDERS' PRICE BOOK 2018, compiled by AECOM, still provides the most accurate, detailed and professionally relevant construction price information for the UK. Its unique Tender Index, updated through the year, gives an ongoing reality check and allows you to adjust for changing market conditions. Although it suits a wide range of project sizes, this is the only price book which sets out a detailed cost base for contracts exceeding £ 4,000,000 in value. Use the access code inside the front cover of the book to get set up with a VitalSource® ebook of this 2018 edition. This versatile and powerful online data viewing package is available for use until the end of December 2018. Major changes have been made to this 143rd edition: New Cost Models for a retail distribution unit, a palliative care unit, and a cinema As well as an overhaul of prices, several new items have been added, including: An expanded range of beam & block flooring Rainwater harvesting — with a precast concrete tank A precast concrete flow attenuation system Precast concrete communication boxes along with the standard features you have come to expect from SPON'S ARCHITECTS' AND BUILDERS' PRICE BOOK: 20,000 prices for the most frequently specified items, the majority with labour constants and detailed build-ups. Hundreds of alternative materials prices for the more unusual items. Detailed guidance on wage rates, daywork, cost limits and allowances, property insurance and professional fees, plus useful formulae, design criteria and trade association addresses. Updates, free of charge, two or three times a year — see inside for registration details. Updates are available online at [www.pricebooks.co.uk](http://www.pricebooks.co.uk)

### [Spon's Architects' and Builders' Price](#)

This new textbook provides a comprehensive introduction to every aspect of the technology of low-rise construction. It includes sub-structure (site work, setting out and foundations) and superstructure (flooring, roofs, finishes, fittings and fixtures). The material here covers the first year course requirement of all courses on which construction technology is taught - no matter what the ultimate qualification. It offers tried and tested solutions to a range of construction problems and is organised following the sequence of construction. It will show what has been done in the past, demonstrating good practice - what works and what doesn't - and common faults. There are summaries of the more important BSI documents and reference to the latest building regulations. Lengthy explanations are avoided by relying heavily on hundreds of illustrations, pairing detail drawings with clear photographs to show real life construction situations. The supporting spreadsheet referred to in the book can be found at [http://www.blackwellpublishing.com/pdf/fleming/Fleming\\_spreadsheet.xls](http://www.blackwellpublishing.com/pdf/fleming/Fleming_spreadsheet.xls)

UK construction shows its underlying strength. Tender prices have risen strongly since last year's book was compiled -- increasing by around 8%, and at an annualised rate of close to 10% in the last half year. Spon's Architects' and Builders' Price Book 2017, compiled by AECOM, still provides the most accurate, detailed and professionally relevant construction price information for the UK. Its unique Tender Index, updated through the year, gives an ongoing reality check and allows you to adjust for changing market conditions. Although it suits a wide range of project sizes, this is the only price book which sets out a detailed cost base for contracts exceeding £ 4,000,000 in value. Use the access code inside the front cover of the book to get set up with internet access to this 2017 edition until the end of December 2017. We now provide a VitalSource® ebook, giving a versatile and powerful online data viewing package. Major changes have been made to this 142nd edition: Major revision and simplification has been made to the in situ concrete section, and plasterboard linings and partitions sections have been heavily revised and developed. New Cost Models are included: a laboratory, a car park and an updated London Office. More plant prices have been separated out in the measured works section. As well as an overhaul of prices, several new items have been added, including: Foamglas insulation Carlite waterproof concrete and an expanded range of stone flooring along with the standard features you have come to expect from Spon's A&B: 20,000 prices for the most frequently specified items, the majority with labour constants and detailed build-ups. Hundreds of alternative materials prices for the more unusual items. Detailed guidance on wage rates, daywork, cost limits and allowances, property insurance and professional fees, plus useful formulae, design criteria and trade association addresses. Updated, free of charge, two or three times a year — see inside for registration details. Updates are available online at [www.pricebooks.co.uk](http://www.pricebooks.co.uk)

The way you design your home says just as much about you as the clothes you wear. This great new book is packed with practical advice on how to achieve the look you want, for a budget you can afford. Before you begin any kind of home-decorating project you need to make sure your canvas is in good order. We include a handy checklist of common problems to look out for and how to fix them - including cracks in walls, creaking stairs, damp patches, draughts, leaking roofs or blocked chimneys. Doing it yourself is fun and economical, so we include step-by-step instructions on how to achieve a variety of home improvements. Of course it is not always possible (or safe) to do everything yourself - sometimes the decision needs to be made: DIY or GSI (get someone in)!? Getting the builders in can be stressful, but we include plenty of advice on finding the best workmen for the job, and how best to brief them and keep to budget. Planning makes perfect - so we have plenty of useful information on making a moodboard, designing a room layout, choosing and using colour and pattern, deciding on wall finishes and treatments and making the most of your space. Your home should be perfectly suited to your lifestyle, so whether you are looking for a cool, calm oasis, a stylish minimalist haven for entertaining or a useful family space, this book is packed full of ideas and inspiration so that you can really make your house a home to be proud of.

Students setting out for a career in plumbing need a clear, concise and comprehensive textbook to help them study for their Technical Certificate and Level 2 NVQ – and this book meets all those needs. Steve Muscroft expertly guides you through each of the key areas and processes in plumbing, from the basics through cold and hot water systems to health and safety and best practice on site. The best way to learn something is to do it for yourself – so along with the theory this book is full of practical advice and guidance on how to get the job done. Every chapter is packed with colour photographs and diagrams to make learning easier. To help reinforce understanding each section features self-test exercises based on the standard City and Guilds assessment method. Steve Muscroft ' s Plumbing isn ' t just a guide to passing the exam – it goes into much more detail than other textbooks, Extra material on key topics outside the core syllabus, and references to additional resources and organisations make this book a handy companion as you begin your plumbing career. For the price of a spanner, can you afford to be without it!

A broad spectrum of technical papers on the most diverse nondestructive testing techniques (NDT) and correlated fields are presented in this volume. The main applications and methods of these important quality control techniques are reviewed in depth. Apart from reporting on the improvements and developments of new techniques and the rapid automatization of nondestructive testings, many papers address the environment from the point of view of inspection surveys. The 265 contributions demonstrate that nondestructive testing techniques (NDT) play a vital role, not only in the quality assurance and control of manufactured products, but also as instruments of public, environmental and industrial safety. The quality of the articles in this book attest to the contribution this conference has made in the technical interchange of experience between NDT professionals, and indicate the present accelerated rate of development of ideas and knowledge in this field.
