This open access book offers essential information on values-based practice (VBP): the clinical skills involved, teamwork and person-centered care, links between values and evidence, and the importance of partnerships in shared decision-making. Different cultures have different values; for example, partnership in decision-making looks very different, from the highly individualized perspective of European and North American cultures to the collective and family-oriented perspectives common in South East Asia. In turn, African cultures offer yet another perspective, one that falls between these two extremes (called batho pele). The book will benefit everyone concerned with the practical challenges of delivering mental health services. Accordingly, all contributions are developed on the basis of case vignettes, and cover a range of situations in which values underlie tensions or uncertainties regarding how to proceed in clinical practice. Examples include the patient's autonomy and best interest, the physician's commitment to establishing high standards of clinical governance, clinical versus community best interest, institutional versus clinical interests, patients insisting on medically unsound but legal treatments etc. Thus far, VBP publications have mainly dealt with clinical scenarios involving individual values (of clinicians and patients). Our objective with this book is to develop a model of VBP that is culturally much broader in scope. As such, it offers a vital resource for mental health stakeholders in an increasingly inter-connected world. It also offers opportunities for cross-learning in

values-based practice between cultures with very different clinical care traditions.

The International Handbook of Space Technology

This book brings a renewed critical focus to the history of novel writing, publishing, selling and reading, expanding its viewing beyond national territories. Relying on primary sources (such as advertisements, censorship reviews, publisher and bookstore catalogues), the book examines the paths taken by novels in their shifts between Europe and Brazil, investigates the flow of translations in both directions, pays attention to the successful novels of the time and analyses the critical response to fiction in both sides of the Atlantic. It reveals that neither nineteenth century culture can be properly understood by focusing on a single territory, nor literature can be fully perceived by looking only to the texts, ignoring their material existence and their place in social and economical practices.

Capoeira: The History of an Afro-Brazilian Martial Art explores capoeira as a field of confrontation where different struggles that divide Brazilian society are played out. It contains a first English language scholarly account of capoeira's early history and development to the present day.

Inspector Minahan Makes a Stand

This book is the result of a conference organised by the Contemporary Portuguese Political History Research Centre (CPHRC) and the University of Dundee that took place during September 2000. The purpose of this conference, and the resulting book, was to bring together various experts in the field to analyse and debate the process of Portuguese decolonisation, which was then 25 years old, and the effects of this on the Portuguese themselves. For over one century, the Portuguese state had defined its foreign policy on the basis of its vast empire - this was the root of its 'Atlanticist' vision. The outbreak of war of liberation in its African territories, which were prompted by the new international support for self determination in colonised territories, was a serious threat that undermined the very foundations of the Portuguese state. This book examines the nature of this threat, how the Portuguese state initially attempted to overcome it by force, and how new pressures within Portuguese society were given space to emerge as a consequence of the colonial wars. This is the first book that takes a multidisciplinary look at both the causes and the consequences of Portuguese decolonisation - and is the only one that places the loss of Portugal's Eastern Empire in the context of the loss of its African Empire. Furthermore, it is the only English language book that relates the process of Portuguese decolonisation with the search for a new Portuguese vision of its place in the world. This book is intended for anyone who is interested in regime change, decolonisation, political revolutions and the growth and development of the European Union. It will also be useful for those who are interested in contemporary developments in civil society and state ideologies. Given that a large part of the book is dedicated to the process of change in the various countries of the former Portuguese Empire, it will also be of interest to students of Africa. It will be useful to those who study decolonisation processes within the other former European Empires, as it provides comparative detail. The book will be most useful to academic researchers and students of comparative politics and area studies.

This Handbook represents the first concerted effort to understand male mental health in a way that facilitates a positive step forward in both theory and treatment. An alarming number of men experience serious mental health issues, as demonstrated by high rates of suicide and violent offending. Despite these problems, the study of male psychology has either been overlooked, or viewed as a problem of defective masculinity. This handbook brings together experts from across the world to discuss men's mental health, from prenatal development, through childhood, adolescence, and fatherhood. Men and masculinity are explored from multiple perspectives including evolutionary, cross-cultural, cognitive, biological, developmental, and existential viewpoints, with a focus on practical suggestions and demonstrations of successful clinical work with men. Throughout, chapters question existing models of understanding and treating men's mental health and explore new approaches, theories and interventions. This definitive handbook

encapsulates a new wave of positive theory and practice in the field of male psychology and will be of great value to professionals, academics, and those working with males through the lifespan in any sector related to male mental health and wellbeing.

Giggs (Classic Football Heroes) - Collect Them All!

Dogma 95, the avant-garde filmmaking movement founded by the Danish director Lars von Trier and three of his fellow directors, was launched in 1995 at an elite cinema conference in Paris—when von Trier was called upon to speak about the future of film but instead showered the audience with pamphlets announcing the new movement and its manifesto. A refreshingly original critical commentary on the director and his practice, *Playing the Waves* is a paramount addition to one of new media's most provocative genres: games and gaming. *Playing the Waves* cleverly puns on the title of one of von Trier's most famous features and argues that Dogma 95, like much of the director's low-budget realist productions, is a game that takes cinema beyond the traditional confines of film aesthetics and dramatic rules. Simons articulates the ways in which von Trier redefines the practice of filmmaking as a rule-bound activity, and stipulates the forms and structures of games von Trier brings to bear on his films, as well as the sobering lessons he draws from economic and evolutionary game theory. Much like the director's films, this fascinating volume takes the traditional point of view of film theory and film aesthetics to the next level and demonstrates we have much to learn from the perspective of game studies and game theory.

Neymar (Ultimate Football Heroes - Limited International Edition)

In Victorian London, the age of consent was just thirteen. Unwitting girls were regularly enticed, tricked and sold into prostitution. If not marked out for a gentleman in a city brothel, they were legally trafficked to Brussels, Paris and beyond. All the while, the Establishment turned a blind eye. That is, until one policeman wrote an incendiary report. Disgraced for testifying against a violent colleague, Irish inspector Jeremiah Minahan was transferred to the backwater of Chelsea as punishment. Here he met Mary Jeffries, a notorious trafficker and procuress who counted Cabinet members and royalty among her clientele. Within days of reporting Jeffries, Minahan was unceremoniously forced out of the Metropolitan Police. So he turned private detective, setting out to expose the peers and politicians more interested in shielding their own positions (and peccadilloes) than London's child prostitutes. The findings Minahan did reveal in 1885 sparked national outrage: riots, arrests, a tabloid war and a sensational trial other secrets were so fearful he took them to his grave, where they remained - until now. This is the true tale of a man caught between a corrupt English Establishment and his own rebel heart: a very Victorian scandal, but also, a story for our times. Victorian London: slums and stucco, strict morals and dark secrets. The sex trade in vulnerable young English girls was booming, fuelled by lax laws and lucrative trafficking to the brothels of Paris and Brussels. Chelsea's most 'exclusive establishment' counted cabinet members and royalty amongst its clientele. In the searing summer of 1885, the situation hit the headlines. There were arrests, riots, a tabloid scandal and a sensational trial - and one man lit the touchpaper. He was Jeremiah Minahan, Irish ex-inspector, exposé of corruption, rebel with a cause. This is his extraordinary story, and that of the women he helped to protect. It is a very Victorian scandal, but also, a tale for our time.
