 This publication is compiled to provide quality and timely statistical data for the monitoring, evaluation, analysis, research, and promotion of the intra-African trade. It is intended to serve the needs of researchers, policy makers, and the public who work on trade issues. This seventh edition of the Compendium presents foreign trade data in sixteen chapters for all African countries for the period 2004 to 2012. Information on total, share, direction, and evolution of African trade is provided. Focusing on intra-African trade, related statistical data of trade flows are grouped by region, subregions, and Regional Economic Communities (RECs) in Africa, a unique feature that has been found nowhere else. It is hoped that the Compendium will provide the needed support to ongoing efforts aimed at ensuring the integration of the African continent.
 "With an appendix containing a full analysis of the debts of the United States, the several states, municipalities etc. Also statements of street railway and traction companies, industrial corporations, etc." (statement omitted on later vols.)

 This book presents tables which give a virtually complete survey of the direct ship ping between the Netherlands and Asia between 1595-1795. This period contains, first, the voyages of the so-called Voorcompagnieen and, then, those for and under control of the Verenigde Oostindische Compagnie (VOC). The survey ends in 1795. That year saw an end of the regular sailings of the VOC between the Netherlands and Asia, since, following the Batavian revolution in January, the Netherlands be came involved in war with England. The last outward voyage left on 26 December 1794. After news of the changed situation in the Netherlands was received in Asia, the last homeward voyage took place in the spring of 1795. The VOC itself was dis banded in 1798. In total 66 voyages of the voorcompagnieen are listed, one more than the tradition ally accepted number. The reconnaissance ship, POSTILJON, from the fleet ofMahu and De Cordes, that was collected en route is given its own number (0022). Since the attempt of the Australische Compagnie to circumvent the monopoly of the VOC can be considered as a continuation of the voorcompagnieen the voyage of Schouten and Le Maire is also listed (0196-0197). For the rest, exclusively the outward and homeward voyages of the VOC are men tioned in the tables. Of those there were in total 4722 outward and 3359 homeward.
 This report presents a statistical overview of the current housing conditions of selected races: White, Black; American Indian, Eskimo, or Aleut; and Asian or Pacific Islander households. Data are also shown for Hispanic-origin households. Generally, the report is based on data collected from the American Housing Survey (AHS) for the United States in 1987, a biennial national sample survey of approximately 55, 800 housing unites conducted by the Bureau of the Census for the Department of Housing and Urban Development. Since the AHS does not obtain data on the individual groups comprising the Asian or Pacific Islander and the Hispanic-origin populations, data from the 1980 Public-Use Microdata Sample, a 1-percent sample of the United States population as enumerated in the 1980 Census, are included in this publication.
 The oldest and most respected martial arts title in the industry, this popular monthly magazine addresses the needs of martial artists of all levels by providing them with information about every style of self-defense in the world - including techniques and strategies. In addition, Black Belt produces and markets over 75 martial

arts-oriented books and videos including many about the works of Bruce Lee, the best-known marital arts figure in the world.
