The Elements has become an international sensation, with over one million copies in-print worldwide. The highly-anticipated paperback edition of The Elements is finally available. An eye-opening, original collection of gorgeous, never-before-seen photographic representations of the 118 elements in the periodic table. The elements are what we, and everything around us, are made of. But how many elements has anyone actually seen in pure, uncombined form? The Elements provides this rare opportunity. Based on seven years of research and photography, the pictures in this book make up the most complete, and visually arresting, representation available to the naked eye of every atom in the universe. Organized in order of appearance on the periodic table, each element is represented by a spread that includes a stunning, full-page, full-color photograph that most closely represents it in its purest form. For example, at -183°C, oxygen turns from a colorless gas to a beautiful pale blue liquid. Also included are fascinating facts, figures, and stories of the elements as well as data on the properties of each, including atomic weight, density, melting and boiling point, valence, electronegativity, and the year and location in which it was discovered. Several additional photographs show each element in slightly altered forms or as used in various practical ways. The element's position on the periodic table is pinpointed on a mini rendering of the table and an illustrated scale of the element's boiling and/or melting points appears on each page along with a density scale that runs along the bottom. Packed with interesting information, this combination of solid science and stunning artistic photographs is the perfect gift book for every sentient creature in the universe. Includes a tear-out poster of Theodore Gray's iconic Photographic Periodic Table!

The second installment in Jasper Fforde's New York Times bestselling series follows literary detective Thursday Next on another adventure in her alternate reality of literature-obsessed England—from the author of The Constant Rabbit The inventive, exuberant, and totally original literary fun that began with The Eyre Affair continues with New York Times bestselling author Jasper Fforde's magnificent second adventure starring the resourceful, fearless literary sleuth Thursday Next. When Landen, the love of her life, is eradicated by the corrupt multinational Goliath Corporation, Thursday must moonlight as a Prose Resource Operative of Jurisfiction—the police force inside the BookWorld. She is apprenticed to the man-hating Miss Havisham from Dickens's Great Expectations, who grudgingly shows Thursday the ropes. And she gains just enough skill to get herself in a real mess entering the pages of Poe's "The Raven." What she really wants is to get Landen back. But this latest mission is not without further complications. Along with jumping into the works of Kafka and Austen, and even Beatrix Potter's The Tale of the Flopsy Bunnies, Thursday finds herself the target of a series of potentially lethal coincidences, the authenticator of a newly discovered play by the Bard himself, and the only one who can prevent an unidentifiable pink sludge from engulfing all life on Earth. It's another genre-bending blend of crime fiction, fantasy, and top-drawer literary entertainment for fans of Douglas Adams and P. G. Wodehouse. Thursday's zany investigations continue with The Well of Lost Plots.

LEGOified: Building Blocks as Media offers a multi-faceted exploration of LEGO fandom, addressing a blindspot in current accounts of LEGO and an emerging area of interest to media scholars: namely, the role of hobbyist enthusiasts and content producers in LEGO's emergence as a ubiquitous transmedia franchise. This book examines a range of LEGO hobbyism and their attendant forms of mediated self-expression and identity (their "technicities"): artists, aspiring Master Builders, collectors, and entrepreneurs who refashion LEGO bricks into new commodities (sets, tchotchkes, and minifigures). The practices and perspectives that constitute this diverse scene lie at the intersection of multiple transformations in contemporary culture, including the shifting relationships between culture industries and the audiences that form their most ardent consumer base, but also the emerging forms of entrepreneurialism, professionalization, and globalization that characterize the burgeoning DIY movement. The major aim of this edited volume, and what makes it a compelling project for media scholars, is its rigorous, multi-dimensional articulation of how LEGO functions not just as toy, as cultural icon, or as transmedia franchise, but as a media platform. LEGOified is centered around their shared experiences, qualitative observations, and semi-structured interviews at a number of LEGO hobbyist conventions. Working outwards from these conventions, each chapter of the book engages additional modes of inquiry -- media archaeology, aesthetics, posthumanist philosophy, feminist media studies, and science and technology studies -- to explore the origins, permutations and implications of different aspects of the contemporary LEGO fandom scene.

Over the last century the way that we live at home has changed dramatically. Nothing short of a design revolution has transformed our houses and the spaces within them - moving from traditional patterns of living all the way through to an era of more fluid, open-plan and modern styles. Whether we live in a new home or a period house, our spaces will have been shaped one way or another by the pioneering Modernists and Mid-century architects and designers who argued for a fresh way of life. Architectural and design writer Dominic Bradbury charts the course of this voyage all the way from the late 19th century through to the houses of today in this ground-breaking book. Over nineteen thematic chapters, he explains the way our houses have been reinvented, while taking in - along the way - the giants of Art Deco, influential Modernists including Le Corbusier and Frank Lloyd Wright, as well as post-war innovators such as Eero Saarinen and Philip Johnson. Taking us from the 20th to the 21st century, Bradbury explores the progress of 'modernity' itself and reveals the secret history of our very own homes.

****THE INSTANT NEW YORK TIMES BESTSELLER**** "The Minimalists show you how to disconnect from our conditioned material state and reconnect to our true essence: love people and use things. This is not a book about how to live with less, but about how to live more deeply and more fully." -Jay Shetty, #1 New York Times bestselling author of Think Like a Monk AS SEEN ON THE NETFLIX DOCUMENTARIES MINIMALISM & LESS IS NOW How might your life be better with less? Imagine a life with less: less stuff, less clutter, less stress and debt and discontent—a life with fewer distractions. Now, imagine a life with more: more time, more meaningful relationships, more growth and contribution and contentment—a life of passion, unencumbered by the trappings of the chaotic world around you. What you're imagining is an intentional life. And to get there, you'll have to let go of some clutter that's in the way. In Love People, Use Things, Joshua Fields Millburn and Ryan Nicodemus move past simple decluttering to show how minimalism makes room to reevaluate and heal the seven essential relationships in our lives: stuff, truth, self, money, values, creativity, and people. They use their own experiences—and those of the people they have met along the minimalist journey—to provide a template for how to live a fuller, more meaningful life. Because once you have less, you can make room for the right kind of more.

NEW YORK TIMES BESTSELLER - OPRAH'S BOOK CLUB PICK - The Pulitzer Prize-winning, bestselling author of The Warmth of Other Suns examines the unspoken caste system that has shaped America and shows how our lives today are still defined by a hierarchy of human divisions. "An instant American classic."—Dwight Garner, The New York Times "As we go about our daily lives, caste is the wordless usher in a darkened theater, flashlight cast down in the aisles, guiding us to our assigned seats for a performance. The hierarchy of caste is not about feelings or morality. It is about power—which groups have it and which do not." In this brilliant book, Isabel Wilkerson gives us a masterful portrait of an unseen phenomenon in America as she explores, through an immersive, deeply researched narrative and stories about real people, how America today and throughout its history has been shaped by a hidden caste system, a rigid hierarchy of human rankings. Beyond race, class, or other factors, there is a powerful caste system that influences people's lives and behavior and the nation's fate. Linking the caste systems of America, India, and Nazi Germany, Wilkerson explores eight pillars that underlie caste systems across civilizations, including divine will, bloodlines, stigma, and more. Using riveting stories about people—including Martin Luther King, Jr., baseball's Satchel Paige, a single father and his toddler son, Wilkerson herself, and many others—she shows the ways that the insidious undertow of caste is experienced every day. She documents how the Nazis studied the racial systems in America to plan their out-cast of the Jews; she discusses why the cruel logic of caste requires that there be a bottom rung for those in the middle to measure themselves against; she writes about the surprising health costs of caste, in depression and life expectancy, and the effects of this hierarchy on our culture and politics. Finally, she points forward to ways America can move beyond the artificial and destructive separations of human divisions, toward hope in our common humanity. Beautifully written, original, and revealing, Caste: The Origins of Our Discontents is an eye-opening story of people and history, and a reexamination of what lies under the surface of ordinary lives and of American life today.

#1 New York Times Bestseller "SignificantThe book is both instructive and surprisingly moving." —The New York Times Ray Dalio, one of the world's most successful investors and entrepreneurs, shares the unconventional principles that he's developed, refined, and used over the past forty years to create unique results in both life and business—and which any person or organization can adopt to help achieve their goals. In 1975, Ray Dalio founded an investment firm, Bridgewater Associates, out of his two-bedroom apartment in New York City. Forty years later, Bridgewater has made more money for its clients than any other hedge fund in history and grown into the fifth most important private company in the United States, according to Fortune magazine. Dalio himself has been named to Time magazine's list of the 100 most influential people in the world. Along the way, Dalio discovered a set of unique principles that have led to Bridgewater's exceptionally effective culture, which he describes as "an idea meritocracy that strives to achieve meaningful work and meaningful relationships through radical transparency." It is these principles, and not anything special about Dalio—who grew up an ordinary kid in a middle-class Long Island neighborhood—that he believes are the reason behind his success. In Principles, Dalio shares what he's learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book's hundreds of practical lessons, which are built around his cornerstones of "radical truth" and "radical transparency," include Dalio laying out the most effective ways for individuals and organizations to make decisions, approach challenges, and build strong teams. He also describes the innovative tools the firm uses to bring an idea meritocracy to life, such as creating "baseball cards" for all employees that distill their strengths and weaknesses, and employing computerized decision-making systems to make believability-weighted decisions. While the book brims with novel ideas for organizations and institutions, Principles also offers a clear, straightforward approach to decision-making that Dalio believes anyone can apply, no matter what they're seeking to achieve. Here, from a man who has been called both "the Steve Jobs of investing" and "the philosopher king of the financial universe" (CIO magazine), is a rare opportunity to gain proven advice unlike anything you'll find in the conventional business press.

From the author of the international bestseller In and Out of the Garden and the wondrous sketchbook Sara Midda's South of France comes a long-awaited treasure of a book. Drawn from the artist's wealth of impressions and memories, it is a book for lovers of food and art and fine gift books—a book for anyone who, upon arriving in a new town, seeks first the local market, or who believes the best thing to do on a given night is to share a table with friends. Sara Midda is a watercolorist whose delicate and beautiful paintings shine like jewels, evoking the sweet purple taste of a summer raspberry or the silvery greens and gnarled burnt umber of an olive grove. And she is also a collagist, weaving together photographs, line drawings, her personal swatches—all the hues of a spice cabinet, or the sensations of a picnic, the colors of the breeze, sunshine, laughter, the cooling grass. And a poet, in love with words that sing, like podding and wicker, nettle and snug. By turns reverent and playful, A Bowl of Olives is a work of pure enchantment, celebrating food-of the seasons, of family, of travel and memory. It is as richly layered as a favorite meal. The book is cloth-bound, jacketed, and printed on uncoated stock to convey the feeling of an artist's sketchbook.
