The United States has long recognized and honored the service and sacrifices of its military and veterans. Veterans who have been injured by their service (whether their injury appears during service or afterwards) are owed appropriate health care and disability compensation. For some medical conditions that develop after military service, the scientific information needed to connect the health conditions to the circumstances of service may be incomplete. When information is incomplete, Congress or the Department of Veterans Affairs (VA) may need to make a "presumption" of service connection so that a group of veterans can be appropriately compensated. The missing information may be about the specific exposures of the veterans, or there may be incomplete scientific evidence as to whether an exposure during service causes the health condition of concern. For example, when the exposures of military personnel in Vietnam to Agent Orange could not be clearly documented, a presumption was established that all those who set foot on Vietnam soil were exposed to Agent Orange. The Institute of Medicine (IOM) Committee was charged with reviewing and describing how presumptions have been made in the past and, if needed, to make recommendations for an improved scientific framework that could be used in the future for determining if a presumption should be made. The Committee was asked to consider and describe the processes of all participants in the current presumptive disability decision-making process for veterans. The Committee was not asked to offer an opinion about past presumptive decisions or to suggest specific future presumptions. The Committee heard from a range of groups that figure into this decision-making process, including past and present staffers from Congress, the VA, the IOM, veterans service organizations, and individual veterans. The Department of Defense (DoD) briefed the Committee about its current activities and plans to better track the exposures and health conditions of military personnel. The Committee further documented the current process by developing case studies around exposures and health conditions for which presumptions had been made. Improving the Presumptive Disability Decision-Making Process for Veterans explains recommendations made by the committee general methods by which scientists, as well as government and other organizations, evaluate scientific evidence in order to determine if a specific exposure causes a health condition.

Familiar themes are approached in a new and fresh way to inspire and interest students. The course is easy to use: the layout and format is clear and easy to follow, while the planning and notes in the Teacher's Book and Coursemaster save preparation time. Independent learning is encouraged through plenary style activities at the end of each core teaching spread which encourage students to reflect on their learning and put it into practice. Further differentiation and extension material is included at the back of the book (Encore/En plus/Lecture pages). Skills and grammar are integrated from the beginning of the course, training students from the start for their GCSE exam. There is a dedicated grammar spread (Zoom grammare) and skills spread (Guide examen) in each unit. Builds on KS3 Framework: language is recycled in the opening Rappelez-vous spread - short, revision activities focussing on transferable skills and grammar. Fully integrated course which includes the following components: 2x Students' Books, 2x Workbooks; 2x Teacher's Books; CDs; 4x Practice and Assessment packs; 2x En solo self-study packs (with En solo CD); 1x coursemaster; 1x assessment CD-Rom; 1x whole-class presentation package on CD-Rom The Foundation Students' Book is for Foundation level candidates aiming for C-E grades.

Our brand-new resources are written specifically to tackle the demands of the GCSE (9-1) Maths.

Before New York Times bestselling author Bill Bryson wrote *The Road to Little Dribbling*, he took this delightfully irreverent jaunt around the unparalleled floating nation of Great Britain, which has produced zebra crossings, Shakespeare, Twiggie Winkie's Farm, and places with names like Farleigh Wallop and Titsey.

This new edition of the best-selling STP Mathematics series provides all the support you need to deliver the 2014 KS3 Programme of Study. These new student books retain the authoritative and rigorous approach of the previous editions, whilst developing students' problem-solving skills, helping to prepare them for the highest achievement at KS4. These student books are accompanied by online Kerboodle resources which include additional assessment activities, online digital versions of the student books and comprehensive teacher support.

Jung-ling's family considers her bad luck because her mother died giving birth to her. They discriminate against her and make her feel unwanted yet she yearns and continuously strives for her parents' love. Her stepmother is vindictive and cruel and her father dismissive. Jung-ling grows up to be an academic child, with a natural ability for writing. Only her aunt and grandfather offer her any love and kindness. The story is of survival in the light of the mental and physical cruelty of her stepmother and the disloyalty of her siblings. Jung-ling blossoms in spite of everything and the story ends as her father agrees to let her study in England. A Puffin Modern Classic edition of this bestselling autobiography, celebrating ten years of publication.

In this book, leading scholars address difficult but fascinating questions concerning intentionality as it is manifested in a wide variety of contexts, including imitation in infancy, early understanding of mental states, reasoning in nonhuman primates, executive function, language acquisition, and narrative understanding. Collectively, the contributors demonstrate that intentionality is a key issue in the cognitive and social sciences. Moreover, in a way that was anticipated more than a century ago by the seminal work of J. Mark Baldwin, they are beginning to reveal how the control of action is related in development to children's emerging self-consciousness and their increasingly sophisticated appreciation of other people's perspectives.

'This is a book for all who work in international education or want to understand more about a rapidly expanding sector. For those who are new to the field it provides an excellent introduction.
