The primary focus of the updated, second edition has not changedit embraces the narrative or storytelling approach to the study of argumentation. The first section introduces readers to rhetorical theorists and their principles. These significant contributions to the field of argumentation and debate include Aristotles views on audiences and the ethical character of an advocate, Burkes dramatistic theory of communication, Brockriedes metaphorical image of arguers, Fishers narrative paradigm, Mills guidelines for testing the causal correlation, Perelman and Obrechts-Tytecas conception of a universal audience, Rokeachs definition of values, and Toulmins model for developing and analyzing argument claims and his conception of arguments as field dependent. Hollihan and Baaskes discussions of these ideas and their applications are easy to follow, unencumbered by technical jargon, and illustrated with engaging examples drawn from current and well-known historical events. The key to the success of this text is the authors ability to show readers how foundational principles of argumentation are used in a variety of real-world situations. The second section covers specialized contexts such as academic debates, courts of law, politics, business and organizations, and interpersonal relationships. Activities that stimulate critical thinking and the implementation of the ideas discussed are provided at the end of each chapter.

What Works in Girls' Education

Widely praised, ARGUMENTATION AND DEBATE, 13E, uses a clear, concise, and engaging presentation that makes even complex material easy for students to understand. The authors have adapted the text over the years to match changing practices in debate and teaching while preserving classical and conventional approaches to learning debate. This edition retains its rhetorical roots with a flexible tone open to a diverse array of debate styles that is

appropriate in the contemporary context. It values the importance of inclusion and sensitivity to differences of culture, gender, orientation, class and other factors as they impact communicative choices and argumentation. The authors have a preference for team topic evidence-based policy debate; however, the text strives to offer viable tools for a wide range of readers interested in improving their critical thinking for reasoned decision making. Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.

The *Government and Politics of France* has been the leading textbook on French politics for over a generation, and continues to provide students with a comprehensive and incisive introduction to the intricacies of French politics and government. This edition updates every chapter, with the addition of a new chapter on France and Europe. Recent events necessitate a new edition, particularly the 2002 elections and the growing interpenetration of France and the EU in student programmes, as well as in the real world. Whether covering the shifting balance within France's two-headed executive, the paradoxes of the French party politics, the power and fragmentation of France's administration, the growing assertiveness of French local government, or the newly visible world of the judiciary, *The Government and Politics of France* has always sought to confront established paradigms with the complex and untidy reality of French politics at the grass roots.

This study explores the dynamic relationship between science, numbers and politics. What can scientific evidence realistically do in and for politics? The volume contributes to that debate by focusing on the role of "numbers" as a means by which knowledge is expressed and through which that knowledge can be transferred into the political realm. Based on the assumption that numbers are constantly being actively created, translated, and used, and that they need to be interpreted in their respective and particular contexts, it examines how numbers and quantifications are made 'politically workable', examining their production, their transition into the sphere of politics and their eventual use therein. Key questions that are addressed include: In what ways does scientific evidence affect political decision-making in the contemporary world? How and why did quantification come to play such an important role within democratic politics? What kind of work do scientific evidence and numbers do politically?

Democratic peace theory - the argument that democracies very rarely go to war with each other - has come under attack recently for being too naïve and for neglecting the vast amount of wars fought by democracies, especially since the end of the Cold War. This volume offers a fresh perspective by arguing that the same norms that are responsible for the democratic peace can be argued to be responsible for democratic war-proneness. The authors show that democratic norms, which are usually understood to cause peaceful behaviour, are heavily contested when dealing with a non-democratic other. The book thus integrates democratic peace and democratic war into one consistent theoretical perspective, emphasising the impact of national identity. The book concludes by arguing that all democracies have a 'weak spot' where they would be willing to engage militarily.

This unique volume offers an original collection of essays on the theme of America's 'special relationships'. It interrogates in an original and provocative manner the distinctive character of America's interactions with an array of allies and clients, both international and domestic. The essays vary in their focus; some are primarily historical, some are more contemporary. All consider the quality of 'specialness' in the context of America's relationship with particular countries, including the United Kingdom, Canada, Australia, New Zealand, Holland, Russia, Iran and Israel. The collection also concerns the relationship between the American state and key 'special' foreign policy interests, notably ethnic lobbies and religious groups. Bringing together a wide range of experts, this timely collection provides a valuable addition to the debates surrounding US foreign policy, and will be of great interest to students and scholars of American politics, American history and international relations.

Preface When you write a book like this after ten years' working as an environmental specialist, you end up with something that reflects your career. Of course, when I started working at the Ministry of the Environment in the Netherlands, I could not foresee that I would now be at TNO, nor that I would have performed research into chlorine, PVC, waste, etc. , that would come to form the basis for this book. But step by step, with some coincidence and with the support of several people - who were probably unaware of the crucial role that, with hindsight, they played - I arrived at a position where I could start to consider this enterprise. At this point I shall try something dangerous - thanking a few of those people who gave that support. At the same time, it is obvious that I cannot mention them all. I hope that those whom I do not mention will forgive me. A first, crucial moment in this sequence of events came quite soon after I joined TNO in 1990. Just a few weeks later, all the senior staff in my section decided to leave in order to set up their own company. I decided to stay at TNO. As a consequence, I had to manage it on my own.
