THE BESTSELLING CLASSIC ON 'FLOW' – THE KEY TO UNLOCKING MEANING, CREATIVITY, PEAK PERFORMANCE, AND TRUE HAPPINESS
Legendary psychologist Mihaly Csikszentmihalyi's famous investigations of "optimal experience" have revealed that what makes an experience genuinely satisfying is a state of consciousness called flow. During flow, people typically experience deep enjoyment, creativity, and a total involvement with life. In this new edition of his groundbreaking classic work, Csikszentmihalyi ("the leading researcher into 'flow states'" —Newsweek) demonstrates the ways this positive state can be controlled, not just left to chance. Flow: The Psychology of Optimal Experience teaches how, by ordering the information that enters our consciousness, we can discover true happiness, unlock our potential, and greatly improve the quality of our lives. "Explores a happy state of mind called flow, the feeling of complete engagement in a creative or playful activity." —Time

Respiratory Care Exam Review - E-Book

Coquito is an educational and scientific instructional book through which more than 38 million Spanish-speaking children have learned to read, write and think. Coquito was conceived and structured in 54 sequential lessons, with which the child is able to start reading and writing, opening a future of intellectual and emotional potential, increasing their awareness and self-esteem. This provides great satisfaction to teachers and parents because the students' reading comprehension is high. The "Reading by Visual Method", created with the book Coquito Clásico, is built on the children's vocabulary and on the unique feature of the Spanish language that is read as it is written, as it is spoken, unlike other languages, whose phonetic complexity is remarkable. It is therefore not advisable to teach how to read in Spanish using methods from other languages such as English and French because it will extend the learning process up to fifteen months for what can be accomplished in three months using our method. The constant interest of the author and his team of specialists is to restructure and update the book according to the improvements and suggestions from teachers and parents, with remarkable success, exceeding expectations in most Spanish-speaking countries. Coquito Clásico brings graphic colored themes, illustrated with captivating visual aids to engage and develop the child's imagination. This initiates the process of oral expression and reading as well as writing and mathematics. We thank the teachers and parents for using our materials, and we guarantee that they have chosen a method of proven quality and excellence that develops mental processes, taking into account the unique features of the Spanish language.

How a simple creative act spreads a message of love and acceptance around the world Emily's idea started small. Many beautiful ideas do. She folded, doodled, and shared. But also, like many ideas, Emily's small idea grew. When a little girl decides to create a paper chain of dolls, her idea catches on. Then it spreads far and wide as children around the world begin to create and share their own. This is the story of how that girl's simple creative act spreads the message of love and acceptance around the world. Readers ages 4-8. Includes a make-your-own page to help you get started on your own paper doll chains.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they conduct their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the text, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and application questions to help students understand--and apply--key concepts.

“Neel emerges as a resolute survivor who lived by her convictions, both aesthetically and politically.” —Publisher’s Weekly Phoebe Hoban’s definitive biography of the renowned American painter Alice Neel tells the unforgettable story of an artist whose life spanned the twentieth century, from women’s suffrage through the Depression, McCarthyism, the civil rights movement, the sexual revolution, and second-wave feminism. Throughout her life and work, Neel constantly challenged convention, ultimately gaining an enduring place in the canon. Alice Neel’s stated goal was to “capture the zeitgeist.” Born into a proper Victorian family at the turn of the twentieth century, Neel reached voting age during suffrage. A quintessential bohemian, she was one of the first artists participating in the Easel Project of the Works Progress Administration, documenting the challenges of life during the Depression. An avowed humanist, Neel chose to paint the world around her, sticking to figurative work even during the rise of abstract expressionism. Neel never ceased pushing the envelope, creating a unique chronicle of her time. Neel was fiercely democratic in selecting her subjects, with an extraordinarily diverse population—from such legendary figures as Joe Gould to her Spanish Harlem neighbors in the 1940s, the art critic Meyer Schapiro, Nobel Laureate Linus Pauling, Andy Warhol, and major figures of the labor, civil rights, and feminist movements—producing an indelible portrait of twentieth-century America. By her own terms, Neel was able to transcend such personal tragedy as the death of her infant daughter, Santillana, a nervous breakdown and suicide attempts, and the loss of her second child, Isabetta. After spending much of her career in relative obscurity, Neel finally received a major museum retrospective in 1974, at the Whitney Museum of American Art, in New York. In this first paperback edition of the authoritative biography of Neel, which serves also as a cultural history of twentieth-century New York, the book documents the tumultuous life of the artist in vivid detail, creating a portrait as incisive as Neel’s relentlessly honest paintings. With a new introduction by Hoban, Neel’s enduring relevance, this biography is essential to understanding and appreciating the life and work of one of America’s foremost artists.

* Newbery Honor Book * #1 New York Times Bestseller * Winner of the Schneider Family Book Award * Wall Street Journal Best Children's Books of the Year * New Public Library's 100 Books for Reading and Sharing An exceptionally moving story of triumph against all odds set during World War II, from the acclaimed author of *Words*, and for fans of *Fish in a Tree* and *Number the Stars*. Ten-year-old Ada has never left her one-room apartment. Her mother is too humiliated by Ada's twisted life to let her outside. So when her little brother Jamie is shipped out of London to escape the war, Ada doesn't waste a minute—she sneaks out to join him. So begins a journey for Ada, and for Susan Smith, the woman who is forced to take the two kids in. As Ada teaches herself to ride a pony, learns to read, and watches for German spies, she begins to trust Susan—and Susan begins to love Ada and Jamie. But in the end, will their bond be enough to hold them together through wartime? Or will Ada and her brother end up back into the cruel hands of their mother? This masterful work of historical fiction is equal parts adventure and a moving tale of family and identity—a classic in the making.
