The State of New Testament Studies Leading Pauline-studies expert Thomas Schreiner provides an updated guide to the exegesis of the New Testament epistles traditionally assigned to Paul. The first edition helped thousands of students dig deeper into studying the New Testament epistles. This new edition is revised throughout to account for changes in the field and to incorporate the author's maturing judgments. The book helps readers understand the nature of first-century letters, do textual criticism, investigate historical and introductory issues, probe theological context, and much more.

Our Present Complaint Women and men are equally capable as leaders, but women have been trained to be nice. Being nice can take us only so far then it trips us up. To be effective, we need to reach inside ourselves and realize that just as mothers would walk in front of a bus to save their child, so we each can find a similar passion and commitment that pushes us onward removing fear and doubt so we simply do what we know to be right. Do you have to be born a leader? Have a title? Be a man? A certain age? The answer is: no. Each of us has leadership potential within and when we do our inner work, we can be the leader of our family, company, or community. Failure and mistakes are not generally accepted as the road to success, but they are often our most powerful tools to growth. Read how others, including Abraham Lincoln, used failed attempts to spur them on. Read stories of leaders and find out their secrets. Learn to recognize mercenaries and real leaders, and decide which you want to be. There are challenges throughout the book that provide valuable lessons to enhance your leadership skills. In Feisty & Fearless: Nice Girls CAN Be Leaders: * The characteristics of effective leaders * 14 Exercises to guide you through your work in becoming a more effective leader * Discover that Caring is one of the keys to authentic leadership Read stories of women leaders: * An artist who empowers children * A successful CEO who puts her family first * A divorced mother who reinvented herself to provide for her children * An actress turned successful business owner who heals a family rift * A child leader * A company leader who thinks empowering others is her main job * A world-renowned expert and author who puts her ego aside * A feminist who lets nothing stop her in her work to have women learn how to be safe "Wow, at last! Here is a feminist voice

that covers discrimination of all colors and sizes - bigotry against women, Jews, immigrants, having red hair, too little money and too much, fat, bossy. The list is endless." Carolyn Howard-Johnson, award-winning author of Imperfect Echoes"We all have a back story, the failures and the poor decision making we recognise when we look back on our lives, and Pauline is refreshingly frank about her own ups and downs. Her determination to step up and show responsibility is a practical manual in leadership skills which will inspire and motivate many women."Karen Abrams Lawyer/Lecturer, U.K.

Making Pearls From Grit reflections and insights on health, disease, and healing Now in paperback for the first time, A Piece of My Mind brings together revealing personal essays that first appeared in The Journal of the American Medical Association (JAMA). These engrossing, moving vignettes--written by physicians, patients, family members, medical students, and others--offer a unique glimpse into the everyday experiences and relationships in the medical world. Baring their souls and opening their hearts, the authors share their most personal moments, stories, and observations. You'll hear from the intern who could not hide her emotions, earning reprimand from her supervisors but appreciation from her patients . . . meet an alcoholic whose indomitable spirit helped her defy all the odds . . . experience the heartbreaking comedy of a Monday morning HIV clinic . . . be inspired by the oncology social worker who found a new love of life during her own struggle with breast cancer . . . and learn from the physician who realized that by witnessing her patients' courage she became a better physician. Compelling, touching, and at times humorous, A Piece of My Mind offers a deeper understanding of physicians, patients, medicine, and the simple human act of helping another person. "These stories, based in science, are transmitted to readers . . . after filtering through a human heart . . . consistently succeeds in bridging science and the humanities."

Bioethics: Legal and Clinical Case Studies With the fall of the Soviet Union in 1991, former Communist Party leaders in Central Asia were faced with the daunting task of building states where they previously had not existed: Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. Their task was complicated by the institutional and ideological legacy of the Soviet system as well as by a more actively engaged international community. These nascent states inherited a set of institutions that included bloated bureaucracies, centralized economic planning, and patronage networks. Some of these institutions survived, others have mutated, and new institutions have been created. Experts on Central Asia here examine the emerging relationship between state actors and social forces in the region. Through the prism of local institutions, the authors reassess both our understanding of Central Asia and of the state-building process more broadly. They scrutinize a wide array of institutional actors, ranging from regional governments and neighborhood committees to transnational and non-governmental organizations. With original empirical research and theoretical insight, the volume's contributors illuminate an obscure but resource-rich and strategically significant region.

Defending Shame Presents a memoir by a neurosurgeon, describing the tools in the operating room, the tough ethical dilemmas confronting doctors, some of the author's most bizarre cases, trends in the field, and possible advances on the horizon.

A Piece of My Mind This book is the culmination of a career of researching and teaching Paul's letters. Highly respected senior New Testament scholar James

Thompson offers a unique approach to Pauline theology, focusing on Paul's attempts to persuade his audience toward moral formation. Thompson recognizes Paul as a pastor who brought together theology and rhetoric to encourage spiritual formation in his communities. Attempts to find total consistency in Paul's writings fail, says Thompson, because Paul's persuasive tactics changed depending on the situation he was addressing.

Another Day in the Frontal Lobe The 1980s marked a revolution in the field of organ transplants, and Bud Shaw, M.D., was on the front lines. Now retired from active practice, Dr. Shaw relays gripping moments of anguish and elation, frustration and reward, despair and hope in his struggle to save patients. Within each emotionally charged vignette lie quieter moments, too, like growing up in rural Ohio, and being awakened late at night by footsteps in the hall as his father, also a surgeon, slipped out of the house to attend to a patient in the ER. *Exhilarating, fast-paced and beautifully written.*

We Still Demand! Charles E. Rosenberg, one of the world's most influential historians of medicine, presents a fascinating analysis of the current tensions in American medicine. Situating these tensions within their historical and social contexts, Rosenberg investigates the fundamental characteristics of medicine: how we think about disease, how the medical profession thinks about itself and its moral and intellectual responsibilities, and what prospective patients—all of us—expect from medicine and the medical profession. He explores the nature and definition of disease and how ideas of disease causation reflect social values and cultural negotiations. His analyses of alternative medicine and bioethics consider the historically specific ways in which we define and seek to control what is appropriately medical. At a time when clinical care and biomedical research generate as much angst as they offer cures, this volume provides valuable insight into how the practice of medicine has evolved, where it is going, and how lessons from history can improve its prognosis.

Moral Formation According to Paul Essays by Harvard Medical Students on what they learned about healing from the patients and physicians to whom they were assigned during their beginning years of medical training. This book provides a rare opportunity to understand what new medical students learn about the most intimate details of patients' lives and their roles as physicians.

Apostle of Persuasion An unflinching memoir by a working nurse As a child, Mary Jane Nealon dreams of growing up to become a saint or, failing that, a nurse. She idolizes Clara Barton, Kateri Tekakwitha, and Molly Pitcher, whose biographies she reads and rereads. But by the time she follows her calling to nursing school, her beloved younger brother is diagnosed with cancer, which challenges her to bring hope and healing closer to home. His death leaves her shattered, and she flees into her work, and into poetry. *Beautiful Unbroken* details Nealon's life of caregiving, from her years as a flying nurse, untethered and free to follow friends and jobs from the Southwest to Savannah, to more somber years in New York City, treating men in a homeless shelter on the Bowery and working in the city's first AIDS wards. In this compelling and revealing memoir, Nealon brings a poet's sensitivity to bear on the hard truths of disease and recovery, life and death.

Brunner & Suddarth's Textbook of Canadian Medical-surgical Nursing Leading biblical scholar James Thompson explains that Paul offers a coherent moral vision based not only on the story of Christ but also on the norms of the law. Paul did not live with a sharp dichotomy of law and gospel and recognized the

continuing importance of the law. --from publisher description

Jesus the Lord according to Paul the Apostle Through alternating chapters, the members of the Treadway family recount their lives and how they coped during the year following the diagnosis of David Treadway's cancer.

Beautiful Unbroken Our culture often views shame in a negative light. However, Paul's use of shame, when properly understood and applied, has much to teach the contemporary church. Filling a lacuna in Pauline scholarship, this book shows how Paul uses shame to admonish and to transform the minds of his readers into the mind of Christ. The author examines Paul's use of shame for moral formation within his Jewish and Greco-Roman context, compares and contrasts Paul's use of shame with other cultural voices, and offers a corrective understanding for today's church. Foreword by Luke Timothy Johnson.

Hot Lights, Cold Steel A brilliant and courageous doctor reveals, in gripping accounts of true cases, the power and limits of modern medicine. Sometimes in medicine the only way to know what is truly going on in a patient is to operate, to look inside with one's own eyes. This book is exploratory surgery on medicine itself, laying bare a science not in its idealized form but as it actually is -- complicated, perplexing, and profoundly human. Atul Gawande offers an unflinching view from the scalpel's edge, where science is ambiguous, information is limited, the stakes are high, yet decisions must be made. In dramatic and revealing stories of patients and doctors, he explores how deadly mistakes occur and why good surgeons go bad. He also shows us what happens when medicine comes up against the inexplicable: an architect with incapacitating back pain for which there is no physical cause; a young woman with nausea that won't go away; a television newscaster whose blushing is so severe that she cannot do her job. Gawande offers a richly detailed portrait of the people and the science, even as he tackles the paradoxes and imperfections inherent in caring for human lives. At once tough-minded and humane, Complications is a new kind of medical writing, nuanced and lucid, unafraid to confront the conflicts and uncertainties that lie at the heart of modern medicine, yet always alive to the possibilities of wisdom in this extraordinary endeavor. Complications is a 2002 National Book Award Finalist for Nonfiction.

The Real Doctor Will See You Shortly Paul's influence on the history of Christian life and theology is as profound as it is pervasive. A brief survey of almost twenty centuries of Christian thought and practice will confirm the enduring importance of Paul for the life of the church in the Roman and Protestant traditions of the West as well as the Orthodox traditions of the East. Even as

Christianity, at the dawn of its third millennium, has become increasingly global and traditions have come to develop and intersect in new and complex ways, Paul's place in the story of Christianity remains deeply rooted in the church's theology, worship, and pastoral life. In both past and present, Paul's influence on the Christian church can hardly be overestimated. Among the many intriguing issues generated by the historical Paul, his New Testament letters, and early church history is the question, what happened to Paul after Paul? Whether we think in terms of the reception of Paul's theology, or the ongoing legacy of Paul, or early Christian reinterpretation of his letters, the questions persist: what did the early church do with Paul's memory? How did it reshape his theology? And what role did his letters come to play in the life of the church? The focus of the present discussion is in the early decades and centuries of Christianity, a time when the memory and legacy of Paul came to serve varied and often competing interests in the emerging church. It was a time when Paul's reputation and importance to the church were being reinforced and when his epistles were gaining the authority that would ensure their place in the sacred library of Christianity. It was also the time when the Jesus movement forged itself into Christianity, a process in which Paul played a pivotal role and eventually also became an object of revision and transformation himself. What is virtually indisputable in this process is that Paul, during his lifetime and after, played a critical role in making Christianity what it was to become.

Stanley Kubrick We Still Demand! recovers the vibrant histories of sex and gender activism across Canada from the 1970s to the present. Highlighting queer, trans, sex-worker, and feminist struggles, this activist history focuses on remembering these struggles and on rethinking the boundaries of sex and gender activism and scholarship. By recovering the history of activism and outlining contemporary challenges, We Still Demand! provides a vital rewriting of the history of sex and gender activism in Canada that will enlighten current struggles and activate new forms of resistance.

Complications If you're seriously thinking about taking the GPC exam, the authors have written a guide that will help you prepare! This down-to-earth manual will help you prepare for the Grant Professional Certified (GPC) exam administered by Grant Professionals Certification Institute (GPCI). It's written in an informal, conversational style by four leading grant professionals, each of whom holds the GPC designation. Why a Guide on the GPC Exam? So, you're thinking of sitting for the GPC exam-more formally known as the Grant Professional Certified (GPC) examination. And no wonder! The GPC credential is highly sought-after by grant professional generalists, meaning grant professionals who've mastered a wide range of grant-related knowledge and who have a deep understanding of grant programs, funding sources, opportunities, organizational development, and community collaboration. To pass the exam, grant professionals must exhibit a number of skills, especially the ability to write persuasively. The authors, each of whom holds the GPC designation, have written a comprehensive yet conversational refresher-level look at the GPC exam administered by Grant Professionals Certification Institute (GPCI). If you're thinking of taking the exam, or simply want to know more about the grant field, this guide is for you! You may already know someone who's taken the exam and become certified. Maybe you've wondered what the exam is all about-what types of information is covered and what topics you may need to become more familiar with. This guide covers all this and much more. About the GPC Exam The GPC exam tests you on the skills and competencies you need to have to perform well in the grant field. In order to sit for the exam, you need to meet certain eligibility criteria. The GPC exam itself has two parts: a multiple

choice section and a written section. If you pass both sections, you'll receive the GPC credential for an initial period of three years. What Does This Manual Cover? The topics in this manual are based on the GPC Competencies and Skills and are written for practitioners in the trenches as a refresher for the GPC exam. The authors have organized the manual into 10 self-contained chapters which include each of the GPC competencies as well as a final chapter on strategies to reduce test anxiety. Here are the chapters: Chapters Introduction Chapter One: Grant Research Chapter Two: Organizational Development Chapter Three: Good Project Design Chapter Four: Grant Proposal Development Chapter Five: Grant Postaward Management Chapter Six: Ethics Chapter Seven: Professional Practices Chapter Eight: Relationships! Relationships! Relationships! Chapter Nine: The Writing Prompt Chapter Ten: Strategies to Reduce Test Anxiety Appendix A: Authors' Recommended Reading List Appendix B: GPCI Literature Review The Authors This manual was written by Pauline Annarino, Danny W. Blitch II, Kimberly Hays de Muga, and Leslie Mitchell. Each proudly holds the Grant Professionals Certification (GPC) credential. The Bluest Eye "A young doctor stumbles through his experience as a first year intern at a major New York hospital"--

My Own Country In a candid and witty memoir, Jodi recounts how her life was transformed when, as a thirty-three-year-old wife and mother, she was diagnosed with an inoperable brain tumor. Unwilling to accept her new fate, Jodi's family searches for a doctor who will join their fight against the odds. But when the surgery that could save her life thrusts her into battle with a devastating spinal fluid leak and facial paralysis, even her own children fear her new appearance and physical failings. Jodi perseveres, even with an injured body and spirit. Interweaving the inspiring, provoking, and sometimes disturbing, Jodi reveals the hells and highs of her journey as she fights for hope and purpose-and life.

Last Night in the OR Bioethics: Legal and Clinical Case Studies is a case-based introduction to ethical issues in health care. Through seventy-eight compelling scenarios, the authors demonstrate the practical importance of ethics, showing how the concerns at issue bear on the lives of patients, health-care providers, and others. Many central topics are covered, including informed consent, medical futility, reproductive ethics, privacy, cultural competence, and clinical trials. Each chapter includes a selection of important legal cases as well as clinical case studies for critical analysis. The case studies are often presented as moral dilemmas and are conducive to rich discussion. A companion website offers a curated collection of relevant legal precedents along with additional case studies and other resources.

Pauline Elizabeth Hopkins When Michael Collins decides to become a surgeon, he is totally unprepared for the chaotic life of a resident at a major hospital. A natural overachiever, Collins' success, in college and medical school led to a surgical residency at one of the most respected medical centers in the world, the famed Mayo Clinic. But compared to his fellow residents Collins feels inadequate and unprepared. All too soon, the euphoria of beginning his career as an orthopedic resident gives way to the feeling he is a counterfeit, an imposter who has infiltrated a society of brilliant surgeons. This story of Collins'

*four-year surgical residency traces his rise from an eager but clueless first-year resident to accomplished Chief Resident in his final year. With unparalleled humor, he recounts the disparity between people's perceptions of a doctor's glamorous life and the real thing: a succession of run down cars that are towed to the junk yard, long weekends moonlighting at rural hospitals, a family that grows larger every year, and a laughable income. Collins' good nature helps him over some of the rough spots but cannot spare him the harsh reality of a doctor's life. Every day he is confronted with decisions that will change people's lives-or end them-forever. A young boy's leg is mangled by a tractor: risk the boy's life to save his leg, or amputate immediately? A woman diagnosed with bone cancer injures her hip: go through a painful hip operation even though she has only months to live? Like a jolt to the system, he is faced with the reality of suffering and death as he struggles to reconcile his idealism and aspiration to heal with the recognition of his own limitations and imperfections. Unflinching and deeply engaging, *Hot Lights, Cold Steel* is a humane and passionate reminder that doctors are people too. This is a gripping memoir, at times devastating, others triumphant, but always compulsively readable.*

The Soul of a Patient *The Voyage of the Dawn Treader* sees Edmund and Lucy, along with their priggish cousin Eustace Scrubb, return to Narnia. Once there, they join Caspian's voyage on the ship to find the seven lords who were banished when Miraz took over the throne. As they sail toward Aslan's country at the edge of the world, they come face to face with many dangers and wonders, including the place where dreams come true. They discover that their quest is more than they imagined and that the world's end is only the beginning...

The Red Chamber Draws on the latest scientific findings to identify the unique characteristics, chemical makeups, and structural differences of migraine-prone brains, offering insight into the role of the central nervous system while outlining a comprehensive program to reduce the frequency and intensity of headaches. Paul, the Pastoral Epistles, and the Early Church (Library of Pauline Studies) Born into an educated free black family in Portland, Maine, Pauline Elizabeth Hopkins (1859-1930) was a pioneering playwright, journalist, novelist, feminist, and public intellectual, best known for her 1900 novel *Contending Forces: A Romance of Negro Life North and South*. In this critical biography, Lois Brown documents for the first time Hopkins's early family life and her ancestral connections to eighteenth-century New England, the African slave trade, and twentieth-century race activism in the North. Brown includes detailed descriptions of Hopkins's earliest known performances as a singer and actress; textual analysis of her major and minor literary works; information about her most influential mentors, colleagues, and professional affiliations; and details of her battles with Booker T. Washington, which ultimately led to her professional demise as a journalist. Richly grounded in archival sources, Brown's work offers a definitive study that clarifies a number of inconsistencies in earlier writing about Hopkins. Brown re-creates the life of a remarkable woman in the context of her times, revealing Hopkins as the descendant of a family comprising many distinguished individuals, an active participant and supporter of the arts, a woman of stature among professional peers and clubwomen, and a gracious and outspoken crusader for African American rights.

Match Day Three new doctors—all women—struggle to balance professional ambitions and personal relationships, triumphs and crises, uncertainties and

decisions, through one pressure-packed day and the first year of their careers in medicine Each year, on the third Thursday in March, more than 15,000 graduating medical students exult, despair, and endure Match Day: the decision of a controversial computer algorithm, which matches students with hospital residencies in every field of medicine. The match determines where each graduate will be assigned the crucial first job as an intern, and shapes the rest of his—or, in increasing number, her—life. In Match Day, Brian Eule follows three women from the anxious months before the match through the completion of their first year of internship. Each woman makes mistakes, saves lives, and witnesses death; each must keep or jettison the man in her life; each comes to learn what it means to heal, to comfort, to lose, and to grieve, while maintaining a professional demeanor. Just as One L became the essential book about the education of young attorneys, so Match Day will be for every medical student, doctor, and reader interested in medicine: a guide to what to expect, and a dramatic recollection of a pressured, perilous, challenging, and rewarding time of life.

Feisty & Fearless A young doctor of eastern Tennessee describes the town's first introduction to the AIDS virus, which preceded a disturbing epidemic and introduced the doctor to many unique people

Mastering Communication with Seriously Ill Patients This book surveys the current landscape of New Testament studies, offering readers a concise guide to contemporary discussions. Bringing together a diverse group of experts, it covers research on the most important issues in New Testament studies, including new discipline areas, making it an ideal supplemental textbook for a variety of courses on the New Testament. Michael Bird, David Capes, Greg Carey, Lynn Cohick, Dennis Edwards, Michael Gorman, and Abson Joseph are among the contributors.

Every Patient Tells a Story In 18th-century China, the beautiful orphan Daiyu leaves her home in the provinces to seek shelter with her mother's family in Beijing. At Rongguo Mansion, she is drawn into a world of luxury, as well as a complex web of secret rivalries. When she falls in love with the family's brilliant, unpredictable heir, she finds the forces of the family and convention arrayed against her.

Critical Care The story of Pecola Breedlove profiles an eleven-year-old African-American girl growing up in an America that values blue-eyed blondes and the tragedy that results from her longing to be accepted.

Interpreting the Pauline Epistles "Doctors heal, or try to, but as nurses we step into the breach, figure out what needs to be done for any given patient today, on this shift, and then, with love and exasperation, do it as best as we can."—from Critical Care "At my job, people die," writes Theresa Brown, capturing both the burden and the singular importance of her profession. Brown, a former English professor at Tufts University, chronicles here her first year as an R.N. in medical oncology. As she does so, Brown illuminates the unique role of nurses in health care, giving us a deeply moving portrait of the day-to-day work nurses do: caring for the person who is ill, not just the illness itself. Critical Care takes us with Brown as she struggles to tend to her patients' needs, both physical (the rigors of chemotherapy) and emotional (their late-night fears). Along the way, we see the work nurses do to fight for their patients' dignity, in spite of punishing treatments and an often uncaring hospital bureaucracy. We also see how a twelve-hour day of caring for the

seriously ill gives Brown herself a deeper appreciation of what it means to be alive. Ultimately, this is a book about embracing life, whether in times of sickness or health. As she takes us into the place where patients and nurses meet, Brown shows us the power of human connection in the face of mortality. She does so with a keen sense of humor and remarkable powers of observation, making Critical Care a powerful contribution to the literature of medicine.

Tell Me Everything You Don't Remember In a series of reflections on the world of modern medicine, a young doctor describes how physicians must deal with the inescapable reality of death, the risks and rewards of emotional involvement, patients' expectations concerning their doctors, and her personal experiences throughout her education, residency, and practice with mortality. Reprint. 75,000 first printing.

Final Exam Physicians who care for patients with life-threatening illnesses face daunting communication challenges. Patients and family members can react to difficult news with sadness, distress, anger, or denial. This book defines the specific communication tasks involved in talking with patients with life-threatening illnesses and their families. Topics include delivering bad news, transition to palliative care, discussing goals of advance-care planning and do-not-resuscitate orders, existential and spiritual issues, family conferences, medical futility, and other conflicts at the end of life. Drs Anthony Back, Robert Arnold, and James Tulsy bring together empirical research as well as their own experience to provide a roadmap through difficult conversations about life-threatening issues. The book offers both a theoretical framework and practical conversational tools that the practising physician and clinician can use to improve communication skills, increase satisfaction, and protect themselves from burnout.

The Sun Still Shines Representing the fruit of a lifetime of study, this work from a revered evangelical scholar provides a concise summary of Paul's teaching about Jesus. Over the years, Gordon Fee has written and taught extensively on Paul's understanding of the person of Christ. In this handy volume, he offers the results of his exegetical work in a form accessible to any interested reader of Scripture. The book includes a foreword by Cherith Fee Nordling.

Home Before Dark No monarchy has proved more captivating than that of the British Royal Family. Across the globe, an estimated 2.4 billion people watched the wedding of Prince William and Catherine Middleton on television. In contemporary global consumer culture, why is the British monarchy still so compelling? Rooted in fieldwork conducted from 2005 to 2014, this book explores how and why consumers around the world leverage a wide range of products, services, and experiences to satisfy their fascination with the British Royal Family brand. It demonstrates the monarchy's power as a brand whose narrative has existed for more than a thousand years, one that shapes consumer behavior and that retains its economic and cultural significance in the twenty-first century. The authors explore the myriad ways consumer culture and the Royal Family intersect across collectors, commemorative objects, fashion, historic sites, media products, Royal brands, and tourist experiences. Taking a case study approach, the book examines both producer and consumer perspectives. Specific chapters illustrate how those responsible for orchestrating experiences related to the British monarchy engage the public by creating compelling consumer experiences. Others reveal how and why people devote their time, effort, and money to Royal consumption—from a woman who boasts a collection of over 10,000 pieces of British Royal Family trinkets to a

retired American stockbroker who spends three months each year in England hunting for rare and expensive memorabilia. Royal Fever highlights the important role the Royal Family continues to play in many people's lives and its ongoing contribution as a pillar of iconic British culture.

The Transformation of Central Asia An engrossing biography of one of the most influential filmmakers in cinematic history Kubrick grew up in the Bronx, a doctor's son. From a young age he was consumed by photography, chess, and, above all else, movies. He was a self-taught filmmaker and self-proclaimed outsider, and his films exist in a unique world of their own outside the Hollywood mainstream. Kubrick's Jewishness played a crucial role in his idea of himself as an outsider. Obsessed with rebellion against authority, war, and male violence, Kubrick was himself a calm, coolly masterful creator and a talkative, ever-curious polymath immersed in friends and family. Drawing on interviews and new archival material, Mikics for the first time explores the personal side of Kubrick's films.

The San Francisco Tape Music Center A memoir of reinvention after a stroke at age thirty-three. Christine Hyung-Oak Lee woke up with a headache on the morning of December 31, 2006. By that afternoon, she saw the world—quite literally—upside down. By New Year's Day, she was unable to form a coherent sentence. And after hours in the ER, days in the hospital, and multiple questions and tests, her doctors informed her that she had had a stroke. For months afterward, Lee outsourced her memories to a journal, taking diligent notes to compensate for the thoughts she could no longer hold on to. It is from these notes that she has constructed this frank and compelling memoir. In a precise and captivating narrative, Lee navigates fearlessly between chronologies, weaving her childhood humiliations and joys together with the story of the early days of her marriage; and then later, in painstaking, painful, and unflinching detail, the account of her stroke and every upset—temporary or permanent—that it caused. Lee illuminates the connection between memory and identity in an honest, meditative, and truly funny manner, utterly devoid of self-pity. And as she recovers, she begins to realize that this unexpected and devastating event has provided a catalyst for coming to terms with her true self—and, in a way, has allowed her to become the person she's always wanted to be.

Prepare for the Gpc Exam: Earn Your Grant Professional Certified Credential A riveting exploration of the most difficult and important part of what doctors do, by Yale School of Medicine physician Dr. Lisa Sanders, author of the monthly New York Times Magazine column "Diagnosis," the inspiration for the hit Fox TV series House, M.D. "The experience of being ill can be like waking up in a foreign country. Life, as you formerly knew it, is on hold while you travel through this other world as unknown as it is unexpected. When I see patients in the hospital or in my office who are suddenly, surprisingly ill, what they really want to know is, 'What is wrong with me?' They want a road map that will help them manage their new surroundings. The ability to give this unnerving and unfamiliar place a name, to know it—on some level—restores a measure of control, independent of whether or not that diagnosis comes attached to a cure. Because, even today, a diagnosis is frequently all a good doctor has to offer." A healthy young man suddenly loses his memory—making him unable to remember the events of each passing hour. Two patients diagnosed with Lyme disease improve after antibiotic treatment—only to have their symptoms mysteriously return. A young woman lies dying in the ICU—bleeding, jaundiced, incoherent—and none of her doctors know what is killing her. In Every Patient Tells a Story, Dr. Lisa Sanders

takes us bedside to witness the process of solving these and other diagnostic dilemmas, providing a firsthand account of the expertise and intuition that lead a doctor to make the right diagnosis. Never in human history have doctors had the knowledge, the tools, and the skills that they have today to diagnose illness and disease. And yet mistakes are made, diagnoses missed, symptoms or tests misunderstood. In this high-tech world of modern medicine, Sanders shows us that knowledge, while essential, is not sufficient to unravel the complexities of illness. She presents an unflinching look inside the detective story that marks nearly every illness—the diagnosis—revealing the combination of uncertainty and intrigue that doctors face when confronting patients who are sick or dying. Through dramatic stories of patients with baffling symptoms, Sanders portrays the absolute necessity and surprising difficulties of getting the patient's story, the challenges of the physical exam, the pitfalls of doctor-to-doctor communication, the vagaries of tests, and the near calamity of diagnostic errors. In Every Patient Tells a Story, Dr. Sanders chronicles the real-life drama of doctors solving these difficult medical mysteries that not only illustrate the art and science of diagnosis, but often save the patients' lives.
