Daily Graphic This is open access under a CC BY 4.0 license The history of Charismatic Christianity in the Nordic countries reaches as far back as Pentecostalism itself. The bounds of the categories remain a topic of discussion, but Nordic countries have played a vital role in developing this rapidly spreading form of world-wide Christianity. Until now, research on global Charismatic Christianity has largely overlooked the region. This book addresses and analyzes its historical and contemporary trajectories in Finland, Norway, and Sweden. Through a series of cases written by Nordic scholars from various disciplines, it demonstrates historical and contemporary diversity as well as interconnections between local, national, and global currents. Highlighting change and continuity, the anthology reveals new aspects of Charismatic Christianity.

Iceland's Relationship with Norway c.870 – c.1100 This study argues that protestant society had traditionally sanctioned women's role in spreading literacy, but this became politicized in the 1790s. Wollstonecraft's literary vocation was shaped by the expectations of the power of print to educate and reform individuals and society, in the radical circles of the Unitarian Johnstone.

An Eagle Tells Flying Stories With Associated Drive! This third edition of one of the leading textbooks on world trade law offers what is, in a number of ways, a unique perspective on an important subject. Combining the best aspects of both casebook and treatise, this comprehensive textbook provides detailed explanations and analysis of the law to help understand it, as well as case extracts to offer a flavour of the judicial reasoning of trade adjudicators. Moreover, the book is truly global in outlook, being equally useful for students of international law in the UK, Europe, the US, Asia and elsewhere around the world. This updated edition includes in-depth discussions of the most recent developments in international trade jurisprudence and important precedents that help establish the boundaries between global trade rules and domestic national autonomy. In this era, when political developments place even more importance on international trade, it will be essential reading for all students, scholars and practitioners in the field.

The Changing Role of Geological Surveys Senior managers and Heads of Geological Survey Organizations (GSOs) from around the world have contributed a collection of papers to provide a benchmark on how GSOs are responding to national and international needs in a rapidly changing world. GSOs continue to provide key scientific information about Earth systems, natural hazards and climate change. As countries adopt sustainable development principles and the public increasingly turns to social media to find information about resource and environmental issues, the generation and communication of Earth science knowledge become increasingly important. This volume provides a snapshot of how GSOs are adapting their activities to this changing world. The different national perspectives presented converge around several common themes related to resources, environment and big data. Climate change and the UN's Sustainable Development Goals provide an increased incentive for GSOs of the world to work in harmony, to generate knowledge of Earth systems and to provide solutions for sustainable management of the planet.

Teaching Academic Writing in European Higher Education

Norway to America This publication is part of a series of reviews of national youth policies carried out by the Council of Europe, in collaboration with researchers, non-governmental organisations and governmental agencies responsible for the development and implementation of youth policy. The review comprises of a national report produced by the individual country together with a critical analysis of national policy and practice undertaken by a team of international experts in the subject. This report is the 10th in the series and focuses on national youth policy in Norway.

policies and programmes in Norway.

A Family Flight Through France, Germany, Norway and Switzerland There is a growing interest in understanding how early years care and education is organised and experienced internationally and many early years courses - from foundation degree and beyond - include an 'International Perspectives' module.

International Perspectives On Early Childhood Education And Care This volume describes in detail teaching philosophies, curricular structures, research approaches and organizational models used in European countries. It offers concrete teaching strategies and examples: from individual tutorials to large classes, from face-to-face to web-based teaching, and addresses cultural differences between writing instruction in Europe and the US.

Norway in America

Reshaping Markets This book covers the remarkable success of a first-generation Polish kid who, at the age of eighteen, enlisted in the United States Air Force during the Korean War. He rose from one of less than a handful of basic airmen who rose to the rank of four-star general. More importantly, it covers the reincarnation of WW II Air Commandos under the code name of Jungle Air Commandos, as well as US combat air operations from 1961 through 1967 flying obsolete B-26s and the newest jet fighter, the F-4D. Then airman Piotrowski qualified for aviation cadet training and earned his first wings as a navigator and electronic warfare officer (EWO). Following assignments in Korea and Japan, he returned to the United States for pilot training ranking number one in his class. He was selected for Project Jungle Jim and became a leading air force expert in conventional weapons and tactics. His flying ability, combat experience, and tactical expertise led to his assignment at the Air Force Top Gun School to instruct air force generals headed for Vietnam on conventional weapons and tactics. Following school and staff assignments, he was selected to command the Fortieth Tactical Group, Aviano, Italy. He led the group for three years, receiving a rating as "Best Wing in the USAF." Following Aviano, he was a special advisor to the commander in chief, and troubleshooter for, General Jones, air force chief. Shortly thereafter, he was selected to build the 552nd AWAC equipped with the E-3A aircraft and bring it to combat status. He then commanded Air Defense TAC, where he was selected to review the Desert One failure with five other officers. He provided inside information on how the rescue attempt in Iran unraveled. Following another special assignment, he was sent to Saudi Arabia as a special advisor to the Saudi chief of the defense staff with the mission to improve Saudi Air Defense. Following that, the general Piotrowski went to Oman with a diplomatic portfolio to forge an agreement with the Omani government on joint military training of US and Omani forces. Subsequently, he was assigned to the Tactical Air Command as the director of operations and vice commander. Here he grappled with a number of aircraft-related problems and brought the stealth fighter into the operational inventory. Next, he commanded Ninth Air Force with twelve subordinate wings with roughly one thousand fighter aircraft assigned, with responsibilities for air warfare in support of US and coalition forces in the Middle East. On one of his many visits to Sudan, he stopped an invasion from Ethiopia in one day. He was promoted to the rank of general to serve as the vice chief of staff. Here he revealed how the JCS operates, as well as inside information on the capture of the Achille Lauro hijackers and the punitive raid on Libya. His last assignment was commanding the American Aerospace Defense Command (NORAD) and the United States Space Command (USSPACECOM), where he had the opportunity to host and brief senior military members of the Soviet Union and People's Republic of China.

World Trade Law "This book provides an overview of Glaserian grounded theory and its application to nursing research. It is easy to understand and should serve as a good reference for researchers using grounded theory method." Score: 93, 4 stars --Doody's This book illustrates the development of the Grounded Theory (GT) method as applied to nursing research. Initially developed by Glaser & Strauss (1967), and further described by Glaser in Theoretical Sensitivity (1978), this groundbreaking research method proposes that the first step is to collect data, and then to generate the theory that emerges from that data. In essence, this method allows theory to capture experience. The authors present an engaging overview of the GT method, followed by a discussion of early modes of GT studies. The book focuses on how novice researchers, working at the descriptive level, can apply GT to their nursing research with sensitivity to emerging theoretical

Features: Guidelines for using Glaserian grounded theory in nursing research Readable research designs suitable for novice researchers Techniques of conceptual mapping to assist in the analytical process Use of emergent theoretical codes to enhance and integrate descriptive theory Testing of completed research in intervention programs in clinical practice Supplementary materials with definitions of the different modes of GT, a presentation of the Intersystem Model, and more

Trotsky in Norway The historical schools of economics have been neglected within the arena of economic theory since the Second World War in favour of the now-dominant classical and neoclassical schools of economic thought. As alternative frameworks re-emerge, this book offers a reevaluation of the legal theorist, economist and politician Torkel Aschehoug (1821-1892). His historical-empirical approach to economics, a highly influential current in Norway during the last decades of the nineteenth century.

American International Law Cases This book explores new grounds that public diplomacy is entering today, as domestic publics come to the forefront of the policy – acting both as constituencies and public diplomacy actors cooperating with their foreign counterparts. The author discusses the phenomena of public diplomacy's domestic dimension described as the ability to engage its own society in foreign policy practices through information, cooperation and identity-defining. By analysing data from over 80 recorded interviews with Australian and American public diplomacy practitioners, this volume illustrates both successful and unsuccessful models of such cooperation. From Norwegian Peace Diplomacy, through Australian ambivalent engagement with Asia, to U.S. Government-sponsored exchange programs, the author argues that governments around the world are slowly accepting a paradigm shift in public diplomacy practice from monological/dialogical to a more collaborative public diplomacy. This book is an essential resource for students, scholars, experts and diplomats interested in world's best practice of engaging domestic civil society actors in foreign policy statecraft.

Contemporary Shamanisms in Norway This major history documents the German invasion of Norway, focusing on the events at sea. The first operation in which the air force, army, and navy worked closely together, Operation WeserÜbung included the first dive-bomber attack to sink a major warship and the first carrier task-force operations. Based on primary sources from German, and Norwegian archives, this book gives a balanced account of the reasons behind the invasion and showcases an unrivaled collection of photographs. As the definitive study of Germany's first and last major seaborne invasion, it offers a close look at an important but often neglected aspect of World War II.

Holding Worlds Together: Ethnographies of Knowing and Belonging

Flying to Norway, Grounded in Burma This review provides policy advice to support the Norwegian government in implementing digital government.

BLACKS IN AMERICA NORWAY THE ARTS OF MEMORY Norway, one of the world's richest economies and the second largest oil exporter, has been a model of prudent economic management of resource wealth. Executive Directors commended the impressive economic performance, marked by sustained solid growth, low inflation, unemployment, and strong external positions. They noted that countercyclical fiscal management was a key pillar of the strategy, and stressed the need to tighten fiscal and monetary policies, accelerate structural reforms, increase labor supply, restrain public expenditure, and move forward with privatization initiatives.

After gaining his wings he joined No 233 General Reconnaissance Squadron of Coastal Command based at Thornaby in Yorkshire. The aircraft he flew was the Avro Anson, a small twin-engine aircraft that was originally designed for civilian use but had been hastily modified with the addition of two machine guns and a 280 lb bomb load. Before the outbreak of war the squadron moved to Leuchers. Early in 1939, Coastal Command crews were ordered to ferry some Blenheim twin-engined bombers to Middle East Command and Gron was selected as a navigator on a long flight to Egypt. Upon landing in Egypt they found that they had set a record time of 33 hours, 3 hours less than Imperial Airways. 233 Squadron were re-equipped with the Lockheed Ventura, a larger aircraft that enabled reconnaissance patrols along the Norwegian coast. In April 1940, as they were approaching the Norwegian coast, Gron spotted a Heinkel 115. He attacked and damaged the aircraft. Although very nearly flying into the sea. Patrols continued, searching for German capital ships hiding in the Fjords. During the first five months of the Norwegian campaign 233 Squadron suffered 35% casualties even 50% on one shipping strike. Gron was awarded the DFC for his part in this operation. After becoming short-sighted and night-blind he was given a brief respite and then posted to the Navigational School at Cranage in Cheshire and a little later qualified as a Specialist Armament Officer. In September 1944 he sailed for India and then travelled overland to Manipur, 500 miles north-east of Imphal. Gron took the job of Armament Officer of No 221 Group, a close-support fighter/bomber group of about 20 squadrons attached to the 14th Army. With the Japanese in retreat the group moved to Indianggye in Burma. Gron commanded the RAF advance party. During his service there he was Mentioned in Despatches.

OECD Digital Government Studies Digital Government Review of Norway Boosting the Digital Transformation of the Public Sector This book examines Sami shamanism in Norway as a distinctive local manifestation of a global new religious phenomenon. It takes the diversity and hybridity within shamanic practices seriously through case studies from a Norwegian perspective and highlights the ethnic dimension of these currents, through a particular focus on Sami versions of shamanism. The book's thesis is that the construction of a Sami shamanistic movement is seen from the perspective of the broader ethno-political search for a Sami identity, with respect to connections to indigenous peoples worldwide and trans-historically. It also makes sense of shamanism and marketing terms. Based on more than ten years of ethnographic research, the book paints a picture of contemporary shamanism in Norway in its cultural context, relating it both to local and mainstream cultures in which it is situated and to global networks. By this, the book provides the basis for a study revealing the development of inventiveness, nuances and polyphony when a global religion of shamanism is merged in a Norwegian setting, colored by its own political and cultural circumstances.

Non-State Actors, Soft Law and Protective Regimes

Journal of a Residence in Norway During the Years 1834, 1835, & 1836 Den britiske pilot, Goronwy Edwards, beretter om sin tid i Royal Air Force før og under 2. verdenskrig.

Travels and adventures in Sweden and Norway; or, Notes from the north, etc By offering critical perspectives of normative developments within international law, this volume of essays by leading academics from various disciplines to address concerns regarding the interpretation and application of international law in context. The authors present common challenges within international law, criminal law, human rights, environmental law and trade law, and point to unintended risks and consequences, in particular for vulnerable interests such as women and the environment. Omissions within normative or institutional frameworks are highlighted and the importance of addressing accountability of state and non-state actors for violations or regressions of international protection guarantees is underscored. Overall, it advocates harmonisation over fragmentation, pursuant to the aspiration of asserting the interests of our collective humanity without advocating an international constitutional order.

Naval Research Reviews Set against the origins and consequences of the global financial crisis, this timely book offers an enriching and revealing narrative of the role that the state plays in regulating markets. Focusing on core areas of private law such as corporate, labour and banking law, the contributors offer a conceptual framework in which to examine the central role of private law in today's global economy. In the current climate of ever increasing economic inequality and austerity measures, the authors highlight the urgent need for a comprehensive analysis of the continuing tension between ideas of market liberalism and theories of society. With a focus on both the domestic and transnational dimensions of market governance

Read PDF Flying To Norway Grounded In Burma A Hudson Pilot In World War II

offer a crucial insight into the co-existence and interaction between state and market-based economic governance.

Youth Policy in Norway This book is about a shy boy, who learned discipline from strict parents and seven years of Parochial School. My ten years in a band taught marching. A graduate mechanical engineer, who loved to fly control line model airplanes, was commissioned a 2nd Lieutenant, and found the Air Force a piece of cake. The Air Force taught me to fly, although I had a little desire to do so, and pushed me to be an extremely aggressive pilot. Skill, knowledge, and training allowed me to advance through the highest performance jet aircraft during the years of 1955 through 1984. Jet aircraft flown were the T-33A, F86F (Sabre), F100 (Series A, D & F Super-Sabre), F105 (B & D Thunderchief), and the F110 (F4D Phantom). My stories progress from Primary Flight School, through all training and missions in the above aircraft as Pilot, Test Pilot, Instructor, and Air to Air Fighter Pilot. Few understand the training and life of an Air Force Pilot, so the "Drivel" shows a portion of life with these interesting, actual flying stories. A most enjoyable read!
