*The SEND Code of Practice (2015) has reinforced the requirement that all teachers must meet the needs of all learners. This topical book provides practical, tried and tested strategies and resources that will support teachers in making history lessons accessible and exciting for all pupils, including those with special needs. The authors draw on a wealth of experience to share their understanding of special educational needs and disabilities and show how the history teacher can reduce or remove any barriers to learning. Offering strategies that are specific to the context of history teaching, this fully revised edition will enable teachers to: Make history education accessible and engaging to pupils of all abilities Create an inclusive classroom environment that responds to the emotional needs of the class and nurtures a culture of learning Develop inclusive practical demonstration and role play techniques to aid conceptual understanding Set assessment objectives Deploy in-class support effectively An invaluable tool for continuing professional development, this text will be essential for teachers (and their teaching assistants) seeking guidance specific to teaching history to all pupils, regardless of their individual needs. This book will also be of interest to SENDCOs, senior management teams and ITT providers. In addition to practical activities and supporting material contained in the book, there are also free online resources for readers to download and use in the preparation of successful, inclusive lessons for all pupils.*

*Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more*

*importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.*

*Praise for the author:: 'For anyone researching the subject, this is the book you've been waiting for.' Washington Post From the death of Richard III on Bosworth Field in 1485 to the execution of Charles I after the Civil Wars of 1642-48, England was transformed by two dynasties. First, the Tudors, who had won the crown on the battlefield, changed both the nature of kingship and the nation itself. England became Protestant and began to establish itself as a trading power; facing down seemingly impossible odds, it defeated its enemies on land and sea. But after a century, Elizabeth I died with no heir and the crown was passed to the Stuarts, who sought to remould the kingdom in their own image. Leading authority on the history of the British Isles in the sixteenth and seventeenth centuries, Ronald Hutton brilliantly recreates the political landscape of this early modern period and shows how the modern nation was forged in these febrile, transformative years. *skilful pen portraits of the leading figures of the day with descriptions of its culture, economics and vivid accounts of everyday life, Hutton provides telling insights into this critical period on Britain's national history. This the second book in the landmark four-volume Brief History of Britain which brings together leading historians to tell Britain's story, from the Norman Conquest of 1066 to the present day. Combining the latest research with accessible and entertaining story-telling, the series is the ideal introduction for students and general readers.*

*A bestselling modern classic—both poignant and funny—about a boy with autism who sets out to solve the murder of a neighbor's dog and discovers unexpected truths about himself and the world. Nominated as one of America's best-loved novels by PBS's The Great American Read Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. He relates well to animals but has no understanding of human emotions. He cannot stand to be touched. And he detests the color yellow. This improbable story of Christopher's quest to investigate the suspicious death of a neighborhood dog makes for one of the most captivating, unusual, and widely heralded novels in recent years.*

*The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. *techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.*

*While the date 1066 is familiar to almost everybody as the year of the Norman conquest of England, few can place the event in the context of the dramatic year in which it took place. *the Suffragettes. The main task is for pupils to create an advertising campaign to persuade some apathetic couch potatoes to vote in an election. Their campaign is to be built around the historical example set by the Chartists and the Suffragettes, some of whom were prepared to die to win the right to vote. The task builds steadily through the book as, unit by unit, pupils work on a poster, then a leaflet, then a web page and finally a short television advert to add to their campaign. The campaign has a strong literacy element with persuasive writing being analysed and modelled and pupil writing being carefully structured. The book also has a strong citizenship thrust providing the third episode (after King John and 'King' Cromwell?) and summarising the development of parliamentary democracy in Britain. *In a Europe aflame with wars of religion and dynastic conflicts, Elizabeth I came to the throne of a realm encircled by menace. To the great Catholic powers of France and Spain, England was a heretic pariah state, a canker to be cut away for the health of the greater body of Christendom. Elizabeth's government, defending God's true Church of England and its leader, the queen, could stop at nothing to defend itself. Headed by the brilliant, enigmatic, and widely feared Sir Francis Walsingham, the Elizabethan state deployed every dark art: spies, double agents, cryptography, and torture. Delving deeply into sixteenth-century archives, Stephen Alford offers a groundbreaking, chillingly vivid depiction of Elizabethan espionage, literally recovering it from the shadows. In his company we follow Her Majesty's agents through the streets of London and Rome, and into the dank cells of the Tower. We see the world as they saw it-ever unsure who could be trusted or when the fatal knock on their own door might come. The Watchers is a riveting exploration of loyalty, faith, betrayal, and deception with the highest possible stakes, in a world poised between the Middle Ages and modernity.*
