biomédicaux (ingénieurs et techniciens) en établissement de santé afin d'enrichir de manière continue leur guide par de nouvelles bonnes pratiques. Aux trois bonnes pratiques d'activités connexes (BPAC) déjà publiées dans le Guide 2011 viennent s'ajouter deux autres présentes dans cet Addenda 2013, élaborées et validées par plus de 50 pairs internationaux francophones : • L'une pour l'ingénierie biomédicale en radioprotection, • L'autre pour la maintenance des dispositifs médicaux selon les recommandations de l'Agence Nationale de Sécurité du Médicament et des Produits de Santé (tutelle française). L'outil d'autodiagnostic automatisé présent dans cet Addenda 2013 est l'un des éléments-clés pour l'exploitation opérationnelle du Guide 2011. Il propose de mesurer l'état des 48 processus du Guide 2011 selon une échelle de maturité des processus, recommandée par les référentiels qualité internationaux comme l'ISO 9004. Il permet de pallier la subjectivité individuelle en proposant une analyse des moyennes et écarts-types obtenus jusqu'à 5 évaluateurs indépendants. Les graphes de synthèse permettent de représenter en un coup d'oeil les situations de bonnes pratiques d'un service biomédical en établissement de santé et d'identifier rapidement les axes d'amélioration prioritaires. Quand le niveau de maturité diagnostiqué est supérieur à 50%, il est alors possible de procéder à une autodéclaration de conformité, selon la norme internationale ISO 17050. Il est possible d'accéder librement à l'outil semi-automatisé réalisé à partir d'un tableau de type Excel® en se connectant au site : www.lexitiseditions.fr sur la page de présentation de cet Addenda. Avec cet Addenda 2013, la profession biomédicale en établissement de santé marque sa détermination à œuvrer au progrès de ses pratiques professionnelles et de contribuer ainsi à l'amélioration de la qualité et de la sécurité des soins délivrés au patient.

Beginner's Guide to Solidworks 2013 This book is intended to help new users to learn the basic concepts of SolidWorks and good solid modeling techniques in an easy to follow guide. It will be a great starting point for those new to SolidWorks or as a teaching aid in classroom training to become familiar with the software's interface, basic commands and strategies as the user completes a series of models while learning different ways to accomplish a particular task. At the end of this book, you will have a fairly good understanding of the SolidWorks interface and the most commonly used commands for part modeling, assembly and detailing after completing a series of components and their 2D drawings complete with Bill of Materials. The book focuses on the processes to complete the modeling of a part, instead of focusing on individual software commands or operations, which are generally simple enough to learn. The author strived hard to include the commands required in the Certified SolidWorks Associate test as listed on the SolidWorks website, as well as several more. SolidWorks is an easy to use CAD software that includes many time saving tools that will enable new and experienced users to complete design tasks faster than before. Most commands covered in this book have advanced options, which may not be covered in this book. This is meant to be a starting point to help new users to learn the basic and most frequently used commands.

Guide to Automotive Connectivity and Cybersecurity In a neo-liberal era concerned with discourses of responsible individualism and the 'selfie', there is an increased interest in personal lives and experiences. In contemporary life, the personal is understood to be political and these ideas cut across both the social sciences and humanities. This handbook is specifically concerned with auto/biography, which sits within the field of narrative, complementing biographical and life history research. Some of the contributors emphasise the place of narrative in the construction of auto/biography, whilst others disrupt the perceived boundaries between the individual and the social, the self and the other. The collection has nine sections: creativity and collaboration; families and relationships; epistolary lives; geography; madness; prison lives; professional lives; 'race'; and social justice and disability. They illustrate the inter- and multi-disciplinary nature of auto/biography as a field. Each section features an introduction from a section editor, many of whom are established researchers and/or members of the British Sociological Association (BSA) Auto/Biography study group. The handbook provides the reader with cutting-edge research from authors at different stages in their careers, and will appeal to those with an interest in auto/biography, auto-ethnography, epistolary traditions, lived experiences, narrative analysis, the arts, education, politics, philosophy, history, personal life, reflexivity, research in practice and the sociology of the everyday. Chapter 1: A Case for Auto/Biography; Julie Parsons and Anne Chappell. Section One: Creativity and Collaboration; edited by Gayle Letherby. Chapter 2: The Times are a Changing: Culture(s) of Medicine; Theresa Compton. Chapter 3: Seventeen Minutes and Thirty-One Seconds: An Auto/Biographical Account of Collaboratively Witnessing and Representing an Untold Life Story; Kitrina Douglas and David Carless. Chapter 4: Reflections on a Collaborative, Creative 'Working' Relationship; Deborah Davidson and Gayle Letherby. Section Two: Families and Relationships: Auto/Biography and Family, A Natural Affinity?; edited by David Morgan. Chapter 5: Life Story and Narrative Approaches in the Study of Family Lives; Julia Brannen. Chapter 6: The Research Methods for Discovering Housing Inequalities in Socio-Biographical Studies; Elizaveta Polukhina. LexisNexis Practice Guide New Jersey Trial, Post-Trial and Appellate Proceedings, 2013 Edition Urban transport systems worldwide are faced by a multitude of challenges. Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world. The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars, with a limited number of cities improving public transport systems in a sustainable manner. However, a number of challenges faced by urban transport systems – such as greenhouse gas emissions, noise and air pollution and road traffic accidents – do not necessarily get solved by the construction of new infrastructure. Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap. The purpose of 'transportation' and 'mobility' is to gain access to destinations, activities, services and goods. Thus, access is the ultimate objective of transportation. As a result, urban planning and design should focus on how to bring people and places together, by creating cities that focus on accessibility, rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods. Urban form and the functionality of the city are therefore a major focus of this report, which highlights the importance of integrated land-use and transport planning. This new report of the United Nations Human Settlements Programme (UN-Habitat), the world's leading authority on urban issues, provides some thought-provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems. The Global Report on Human Settlements is the most authoritative and up-to-date global assessment of human settlements conditions and trends. Preceding issues of the report have addressed such topics as Cities in a Globalizing World, The Challenge of Slums, Financing Urban Shelter, Enhancing Urban Safety and Security, Planning Sustainable Cities and Cities and Climate Change.
