In 1880 the continent of Africa was largely unexplored by Europeans. Less than thirty years later, only Liberia and Ethiopia remained unconquered by them. The rest - 10 million square miles with 110 million bewildered new subjects - had been carved up by five European powers (and one extraordinary individual) in the name of Commerce, Christianity, 'Civilization' and Conquest. The Scramble for Africa is the first full-scale study of that extraordinary episode in history.

Hundreds of millions of people in China, India, Indonesia, and Brazil are eager to enter the marketplace. Yet multinational companies typically pitch their products to emerging markets' tiny segment of affluent buyers, and thus miss out on much larger markets further down the socioeconomic pyramid—which local rivals snap up. By applying the authors' recommendations, you can position yourself to compete innovatively in developing countries—and to unlock major new sources of revenue for your business. American Imperialism in the Image of Peer Gynt was first published in 1971. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. This is the life story of an economic historian whose distinguished career has included nine years of service as a United States government official in various capacities, both military and civilian, around the world. It is a revealing and often disturbing account, evoking in the author's mind, as he reflects on his own experiences and those of other American emissaries abroad, the image of

Ibsen's Peer Gynt, who wandered over the earth thinking he was doing good, only to find when he returned home that both his virtues and his sins were so insignificant that his soul was scheduled by the buttonmolder to be cast into limbo in the form of a little lead button. Professor Johnson's book is much more than an autobiography. From the vantage point of his experiences and observations he provides a critical evaluation of American efforts abroad. He discusses cultural factors that have shaped American preconceptions and attitudes over the last half century and attempts to explain why a generation of presumably well-equipped Americans has been singularly incapable of materializing the hopes and aspirations of both the American people and the world community.

Globalization is undoubtedly the great overarching paradigm of our era. However, there is still little agreement on what globalization actually 'is' and some do not accept that it 'is' anything at all. This new book addresses the contestation of globalization by the anti- or counter-globalization movement. To contest means to challenge, to call into question, to doubt, to oppose and to litigate. This study shows how globalization is 'contestable' in many different ways and how the counter-movements we have seen emerging over the last decade also 'bear witness' on behalf of an alternative human future. Ronaldo Munck presents an overarching framework that allows us to understand how globalization and its contestation are inextricably bound up

with one another. This volume insightfully explores a number of case studies, including: the battle of Seattle in 1999 the World Social Forum peasant internationalism environmental movements and reactionary movements including: the US Patriot's movement, Islamic fundamentalist movements and other nationalist movements. Globalization and Contestation will be of great interest to all students and scholars of international relations, politics and of globalization and global governance in particular.

People around the world are confused and concerned. Is it a sign of strength or of weakness that the US has suddenly shifted from a politics of consensus to one of coercion on the world stage? What was really at stake in the war on Iraq? Was it all about oil and, if not, what else was involved? What role has a sagging economy played in pushing the US into foreign adventurism and what difference does it make that neo-conservatives rather than neo-liberals are now in power? What exactly is the relationship between US militarism abroad and domestic politics? These are the questions taken up in this compelling and original book. Closely argued but clearly written, 'The New Imperialism' builds a conceptual framework to expose the underlying forces

The compulsions behind the projection of US power on the world as a 'new imperialism' are here, for the first time, laid bare for all to see. *A milestone in the understanding of British history and imperialism, this ground-breaking book radically reinterprets the course of modern economic development and the causes of overseas expansion during the past three centuries. Employing their concept of 'gentlemanly capitalism', the authors draw imperial and domestic British history together to show how the shape of the nation and its economy depended on international and imperial ties, and how these ties were undone to produce the post-colonial world of today. Containing a significantly expanded and updated Foreword and Afterword, this third edition assesses the development of the debate since the book's original publication, discusses the imperial era in the context of the controversy over globalization, and shows how the study of the age of empires remains relevant to understanding the post-colonial world. Covering the full extent of the British empire from China to South America and taking a broad chronological view from the seventeenth century to post-imperial Britain today, *British Imperialism: 1688-2015* is the perfect read for all students of imperial and global history.*

[World History: Connections to Today](#)

Winner of the James Harvey Robinson Prize from the American Historical Association--and widely acclaimed by educators and students--Abina and the Important Men, Second Edition, is a compelling and powerfully illustrated "graphic history" based on an 1876 court transcript of a West African woman named Abina, who was wrongfully enslaved and took her case to court. The book is a microhistory that does much more than simply depict an event in the past; it uses the power of illustration to convey important themes in world history and to reveal the processes by which history is made. The story of Abina Mansah--a woman "without history" who was wrongfully enslaved, escaped to British-controlled territory, and then took her former master to court--takes place in the complex world of the Gold Coast at the onset of late nineteenth-century colonialism. Slavery becomes a contested ground, as cultural practices collide with an emerging wage economy and British officials turn a blind eye to the presence of underpaid domestic workers in the households of African merchants. The main scenes of the story take place in the courtroom, where Abina strives to convince a series of "important men"--a British judge, two Euro-African attorneys, and a jury of local leaders--that her experiences and perceptions matter. "Am I free?" Abina inquires. Throughout both the court case and the flashbacks that dramatically depict her life in servitude, both the defendants and members of the court strive to "silence" Abina and to impose their own understandings and meanings upon her. The story seems to conclude with the

short-term success of the "important men," as Abina loses her case. But it doesn't end there: Abina is eventually redeemed. Her testimony is uncovered in the dusty archives by Trevor Getz and, through Liz Clarke's illustrations, becomes a graphic history read by people around the world. In this way, the reader takes an active part in the story along with the illustrator, the author, and Abina herself. Following the graphic history in Part I, Parts II-V provide detailed historical context for the story, a reading guide that reconstructs and deconstructs the methods used to interpret the story, and strategies for using Abina in various classroom settings. This second edition features a new gender-rich section, Part V: Engaging Abina, which explores Abina's life and narrative as a woman. Focusing on such important themes as the relationship between slavery and gender in pre-colonial Akan society, the role of marriage in Abina's experience, colonial paternalism, and the meaning of cloth and beads in her story, this section also includes a debate on whether or not Abina was a slave, with contributions by three award-winning scholars--Antoinette Burton, Sandra Greene, and Kwasi Konadu--each working from different perspectives. The second edition includes new, additional testimony that was rediscovered in the National Archives of Ghana, which is also reflected in the graphic history section.

2015 Recipient of the American Book Award The first history of the United States told from the perspective of indigenous peoples Today in the United States, there are more than five hundred federally recognized Indigenous nations comprising nearly three million people, descendants of the fifteen million Native people who once inhabited this land. The centuries-long genocidal program of the US settler-colonial regimen has largely been omitted from history. Now, for the first time, acclaimed historian and activist Roxanne Dunbar-Ortiz offers a history of the United States told from the perspective of Indigenous peoples and reveals how Native Americans, for centuries, actively resisted expansion of the US empire. In An Indigenous Peoples' History of the United States, Dunbar-Ortiz adroitly challenges the founding myth of the United States and shows how policy

against the Indigenous peoples was colonialist and designed to seize the territories of the original inhabitants, displacing or eliminating them. And as Dunbar-Ortiz reveals, this policy was praised in popular culture, through writers like James Fenimore Cooper and Walt Whitman, and in the highest offices of government and the military. Shockingly, as the genocidal policy reached its zenith under President Andrew Jackson, its ruthlessness was best articulated by US Army general Thomas S. Jesup, who, in 1836, wrote of the Seminoles: "The country can be rid of them only by exterminating them." Spanning more than four hundred years, this classic bottom-up peoples' history radically reframes US history and explodes the silences that have haunted our national narrative.

Making Sense of World History is a comprehensive and accessible textbook that helps students understand the key themes of world history within a chronological framework stretching from ancient times to the present day. To lend coherence to its narrative, the book employs a set of organizing devices that connect times, places, and/or themes. This narrative is supported by: Flowcharts that show how phenomena within diverse broad themes interact in generating key processes and events in world history. A discussion of the common challenges faced by different types of agent,

including rulers, merchants, farmers, and parents, and a comparison of how these challenges were addressed in different times and places. An exhaustive and balanced treatment of themes such as culture, politics, and economy, with an emphasis on interaction. Explicit attention to skill acquisition in organizing information, cultural sensitivity, comparison, visual literacy, integration, interrogating primary sources, and critical thinking. A focus on historical “episodes” that are carefully related to each other. Through the use of such devices, the book shows the cumulative effect of thematic interactions through time, communicates the many ways in which societies have influenced each other through history, and allows us to compare and contrast how they have reacted to similar challenges. They also allow the reader to transcend historical controversies and can be used to stimulate class discussions and guide student assignments. With a unified authorial voice and offering a narrative from the ancient to the present, this is the go-to textbook for World History courses and students. From the first Arab-Islamic Empire of the mid-seventh century to the Ottomans, the last great Muslim empire, the story of the Middle East has been the story of the rise and fall of universal empires and, no less important, of imperialist dreams. So argues Efraim Karsh in this highly provocative book. Rejecting the conventional Western interpretation of Middle Eastern history as an offshoot of global power politics, Karsh contends that the region's experience is the culmination of long-existing indigenous trends, passions, and patterns of behavior, and that foremost among these is Islam's millenarian imperial tradition. The author explores the history of Islam's imperialism and the persistence of the Ottoman imperialist dream that outlasted World War I to haunt Islamic and Middle Eastern politics to the present day. September 11 can be seen as simply the latest expression of this dream, and such attacks have little to do with U.S. international behavior or policy in the Middle East, says Karsh. The

'A landmark in the process of decolonizing imperial Western knowledge.' Walter Mignolo, Duke University To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically, the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date.

In this "artful, informative, and delightful" (William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, Guns, Germs, and Steel chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. global historical subject. The book covers the emergence of nationalist ideas, sentiments, and cultural movements before the formation of a world of nation-states as well as nationalist politics before and after the era of the nation-state, with chapters covering Europe, the Middle East, North-East Asia, South Asia, Southeast Asia, sub-Saharan Africa, and the Americas. Essays on everyday national sentiment and race ideas in fascism are accompanied by chapters on nationalist movements opposed to existing nation-states, nationalism and international relations, and the role of external intervention into nationalist disputes within states. In addition, the book looks at the major challenges to nationalism: international socialism, religion, pan-nationalism, and globalization, before a final section considering how historians have approached the subject of nationalism. Taken separately, the chapters in this Handbook will deepen understanding of nationalism in particular times and places; taken together they will enable the reader to see nationalism as a distinct subject in modern world history.

Genocide has scarred human societies since Antiquity. In the modern era, genocide has been a global phenomenon: from massacres in colonial America, Africa, and Australia to the Holocaust of European Jewry and mass death in Maoist China. In recent years, the discipline of 'genocide studies' has developed to offer analysis and comprehension. The Oxford Handbook of Genocide Studies is the first book to subject both genocide and the young discipline it has spawned to systematic, in-depth investigation. Thirty-four renowned experts study genocide through the ages by taking regional, thematic, and disciplinary-specific approaches. Chapters examine secessionist and political genocides in modern Asia. Others treat the violent dynamics of European colonialism in Africa, the complex ethnic geography of the Great Lakes region, and the structural instability of the continent's northern horn. South and North America receive detailed coverage, as do the Ottoman Empire, Nazi-occupied Europe, and post-communist Eastern Europe. Sustained attention is paid to themes like gender, memory, the state, culture, ethnic cleansing, military intervention, the United Nations, and prosecutions. The work is multi-disciplinary, featuring the work of historians, anthropologists, lawyers, political scientists, sociologists, and philosophers. Uniquely combining empirical reconstruction and conceptual analysis, this Handbook presents and analyses regions of genocide and the entire field of 'genocide studies' in one substantial volume.

“Harsha Walia has played a central role in building some of North America’s most innovative, diverse, and effective new movements. That this brilliant organizer and theorist has found time to share her wisdom in this book is a tremendous gift to us all.”—Naomi Klein, author of The Shock Doctrine

Undoing Border Imperialism combines academic discourse, lived experiences of displacement, and movement-based practices into an exciting new book. By reformulating immigrant rights movements within a transnational analysis of capitalism, labor exploitation, settler colonialism, state building, and racialized empire, it provides the alternative conceptual frameworks of border imperialism and decolonization. Drawing on the author’s experiences in No One Is Illegal, this work offers relevant insights for all social movement organizers on effective strategies to overcome the barriers and borders within movements in order to cultivate fierce, loving, and sustainable communities of resistance striving toward liberation. The author grounds the book in collective vision, with short contributions from over twenty organizers and writers from across North America. Harsha Walia is a South Asian activist, writer, and popular educator rooted in emancipatory movements and communities for over a decade. Praise for Undoing Border Imperialism: “Border imperialism is an apt conceptualization for capturing the politics of massive displacement due to capitalist neoglobalization. organizer who has done a lot of thinking and can write—not a common combination. Besides being brilliantly conceived and presented, this book is the first extended work on immigration that refuses to make First Nations sovereignty invisible.”—Roxanne Dunbar Ortiz, author of *Indians of the Americas and Blood on the Border* “Harsha Walia’s *Undoing Border Imperialism* demonstrates that geography has certainly not ended, and nor has the urge for people to stretch out our arms across borders to create our communities. One of the most rewarding things about this book is its capaciousness—astute insights that emerge out of careful organizing linked to the voices of a generation of strugglers, trying to find their own analysis to build their own movements to make this world our own. This is both a manual and a memoir, a guide to the world and a guide to the organizer’s heart.”—Vijay Prashad, author of *The Darker Nations: A People’s History of the Third World* “This book belongs in every wannabe revolutionary’s war backpack. I addictively jumped all over its contents: a radical mixtape of ancestral wisdoms to present-day grounded organizers theorizing about their own experiences. A must for me is Walia’s decision to infuse this volume’s fight against border imperialism, white supremacy, and empire with the vulnerability of her own personal narrative. This book is a breath of fresh air and offers an urgently needed movement-based praxis. *Undoing Border Imperialism* is too hot to be sitting on bookshelves; it will help make the revolution.”—Ashanti Alston, Black Panther elder and former political prisoner
