Johnny Long's last book sold 12,000 units worldwide. Kevin Mitnick's last book sold 40,000 units in North America. As the cliché goes, information is power. In this age of technology, an increasing majority of the world's information is stored electronically. It makes sense then that we rely on high-tech electronic protection systems to guard that information. As professional hackers, Johnny Long and Kevin Mitnick get paid to uncover weaknesses in those systems and exploit them. Whether breaking into buildings or slipping past industrial-grade firewalls, their goal has always been the same: extract the information using any means necessary. After hundreds of jobs, they have discovered the secrets to bypassing every conceivable high-tech security system. This book reveals those secrets; as the title suggests, it has nothing to do with high technology. • Dumpster Diving Be a good sport and don't read the two "D" words written in big bold letters above, and act surprised when I tell you hackers can accomplish this without relying on a single bit of technology (punny). • Tailgating Hackers and ninja both like wearing black, and they do share the ability to slip inside a building and blend with the shadows. • Shoulder Surfing If you like having a screen on your laptop so you can see what you're working on, don't read this chapter. • Physical Security Locks are serious business and lock technicians are true engineers, most backed with years of hands-on experience. But what happens when you take the age-old respected profession of the locksmith and sprinkle it with hacker ingenuity? • Social Engineering with Jack Wiles Jack has trained hundreds of federal agents, corporate attorneys, CEOs and internal auditors on computer crime and security-related topics. His unforgettable presentations are filled with three decades of personal "war stories" from the trenches of Information Security and Physical Security. • Google Hacking A hacker doesn't even need his own computer to do the necessary research. If he can make it to a public library, Kinko's or Internet cafe, he can use Google to process all that data into something useful. • P2P Hacking Let's assume a guy has no budget, no commercial hacking software, no support from organized crime and no fancy gear. With all those restrictions, is this guy still a threat to you? Have a look at this chapter and judge for yourself. • People Watching Skilled people watchers can learn a whole lot in just a few quick glances. In this chapter we'll take a look at a few examples of the types of things that draws a no-tech hacker's eye. • Kiosks What happens when a kiosk is more than a kiosk? What happens when the kiosk holds airline passenger information? What if the kiosk holds confidential patient information? What if the kiosk holds cash? • Vehicle Surveillance Most people don't realize that some of the most thrilling vehicular espionage happens when the cars aren't moving at all!

Highlighting the flexibility and fun of working with wire, these original designs twist, spiral, and wrap their way through necklaces, bracelets, and rings. Using only a few simple tools, a spool of wire, and a sprinkling of beads, aspiring jewelry designers can create adornments from metallic or colored wire. Projects are easy to adapt to taste and level of expertise, and wire-working techniques build up from simple to stunning, inspiring beginners and old hands alike. There are smart and sophisticated gold and silver wire designs, such as the Waterfall Chain necklace, as well as more casual designs made with colored wire, funky beads, and tiny seashells, including the Belly Dancer Bracelet or Exotic Charm Necklace. With sections on styles and further variations, this is a guide for anyone who wants to add some shine to their repertoire.

Sharing our stories, who we are, what we love, how we feel, why we fear, connects us to one another. Weaving moments of grace with spiritual practices that have grounded her through life's challenges, Laurie Blefeld invites the reader into her sacramental stories. You will find yourself in Laurie's stories and reclaim bits and pieces of your own. "Our days are a stream of moments - some devastating, some down to earth and some filled with ineffable meaning. Laurie Blefeld has written a book full of tender moments that warm the heart and remind us to be grateful for and conscious of how laced with grace our lives really are. This is a book to enjoy and treasure."-Gunilla Norris, author of Sheltered in the Heart and Companions on the Way: A Little Book of Heart-full Practices "Laurie's transformational stories, told in her authentic and lyrical voice, are evocative of the highs and lows in everyone's life. Laurie's generous prose connects us to her family's living history - and through it to our own. She is a natural spiritual teacher. Moments of Grace is luminous, warm, comforting and filled with such good practices."- Dr. Joan Borysenko, from the Foreword

In this paradigm-shattering book, leading behavioural economist and food psychologist Brian Wansink - dubbed the 'Sherlock Holmes of food' and the 'wizard of why' - offers a radical new philosophy for weight loss. The answer isn't to tell people what to do: it's to set up their living environments so that they will naturally lose weight. Using cutting-edge, never-before-seen research from his acclaimed Food and Brand Lab at Cornell University, Wansink reveals how innovative and inexpensive design changes - from home kitchens to restaurants, from grocery stores to schools and workplaces - can make it mindlessly easy for people to eat healthier and make it more profitable for the companies who sell the food. In Slim by Design, Wansink argues that the easiest, quickest and most natural way to reverse weight gain is to work with human nature, not against it. He demonstrates how schools can nudge kids to take an apple instead of a cookie, how restaurants can increase profits by selling half-size portions, how supermarkets can double the amount of fruits and vegetables they sell, and how anyone can cut plate refills at home by more than a third. Interweaving drawings, charts, floor plans and scorecards with new scientific studies and compelling insights that will make you view your surroundings in an entirely fresh way, this entertaining, eye-opening book offers practical solutions for changing your everyday environment to make you, your family and even your community slim by design.

The "Messianic Aleph Tav Interlinear Scriptures" (MATIS) is the most unique Interlinear Study Bible of its kind in the world. MATIS is the first true Interlinear Study Bible to combine both the Paleo and the Babylonian Block Hebrew with a distinctive Hebrew translation for each word. The purpose of MATIS is to provide a Study Bible whereby each Hebrew word and its letters could be studied to obtain a deeper understanding of what the originators were trying to express. Charts are provided in the back of MATIS that break down both the potential meanings of the Hebrew letters and the Hebrew letter code used to translate the Hebrew. MATIS also incorporates the popular Strong's numbering system for each word in the interlinear section with a complete Strong's Hebrew Dictionary to provide for more in depth study. MATIS English translation began with the public domain version of the 1987 KJV and removed all the old English for easier reading. All English words originally used in the KJV for deities have also been replaced with their original Hebrew words. MATIS is also unique in regard to the Hebrew verses running in sequence from left to right with the English while the Hebrew individual words are written from right to left as originally written by the Sages for thousands of years. The word order the Hebrew verses are written is the exact order they were written originally except in reverse, which allows the verses to run parallel with the English. This combination is also unique and makes it easier for beginners to study the Hebrew language in comparison to both the Hebrew and English translations. The First Volume of MATIS is the TORAH with additional MATIS volumes being, volume two the WRITINGS, volume three the PROPHETS and volume four the B'rit Chadashah (New Testament). MATIS also furthers the journey of the study of the Aleph/Tav character symbol by revealing thousands of words that originally incorporate this symbol in Paleo Hebrew, and apparently for good reason! MATIS is truly the perfect gift for the believer who is interested in studying Hebrew and desires to analyze each Hebrew word and the meaning of each Hebrew letter in the original Hebrew text in order to obtain a deeper understanding of what the originators, as well as our creator was trying to express in the Hebrew language. MATIS comes in your choice of either Red Letter or Bold Black 8.5x11 editions. About the Author William H. Sanford is a licensed Minister of Bet Ami, a Messianic Congregation in Oklahoma City, Oklahoma, and has been studying and preaching the gospel for over 40 years. William has several videos about "The Messianic Aleph Tav Scriptures" (MATS) on YouTube, and he may be contacted through his website [www.AlephTavScriptures.com](http://www.AlephTavScriptures.com) or on Facebook at Aleph Tav Scriptures.

This was my first book and a true labor of love. I spent decades studying steam and the work of Dead Men, in both old buildings and on library shelves. I traveled the country, haunting used-book stores, looking for engineering books that held the answers to questions that nagged at me. I was obsessed with this topic, and when I finally sat to write, I poured all that I had learned into this book, and as I wrote, I tried my best to make the words sound good to you - like we were together and having a conversation. I wanted you to know what I know and I wanted you to be able to do what I can do when it comes to old steam systems. This book arrived in 1992 and has since gone through dozens of printings. We've sold it in every state as well as in foreign countries. Steam heat is everywhere there are old buildings, so why shouldn't you be the one with the answers? Dan Holohan

This unique A-Z guide to central heating wiring systems provides a comprehensive reference manual for hundreds of items of heating and control equipment, making it an indispensable handbook for electricians and installers across the country. The book provides comprehensive coverage of wiring and technical specifications, and now includes increased coverage of combination boilers, recently developed control features and SEDBUK (Seasonal Efficiency of Domestic Boilers in the UK) boilers ratings, where known. In addition to providing concise details of nearly 500 different boilers fuelled by electric, gas, oil and solid fuel, and over 400 programmers and time switches, this invaluable resource also features numerous easy-to-understand wiring diagrams with notes on all definitive systems. Brief component descriptions are provided, along with updated contact and website details for most major manufacturers. Ray Ward has spent over 20 years as a specialist in the field of wiring domestic central heating systems and the knowledge he has gained from hands-on experience and staff training is now brought together in this comprehensive handbook.

historic preservation efforts across the state. Cynthia G. Falk connects agricultural buildings—both extant examples and those long gone—with the products and processes they made and make possible. Great attention is paid not only to main barns but also to agricultural outbuildings such as chicken coops, smokehouses, and windmills. Falk further emphasizes the types of buildings used to support the cultivation of products specifically associated with the Empire State, including hops, apples, cheese, and maple syrup. Enhanced by more than two hundred contemporary and historic photographs and other images, this book provides historical, cultural, and economic context for understanding the rural landscape. In an appendix are lists of historic farm buildings open to the public at living history museums and historic sites. Through a greater awareness of the buildings found on farms throughout New York, readers will come away with an increased appreciation for the state's rich agricultural and architectural legacy.
