Between 1965 and 1972, political activists around the globe prepared to mount a revolution. While the Vietnam War raged, calls for black power grew louder

and liberation movements erupted everywhere from Berkeley, Detroit, and Newark, to Paris, Berlin, Ghana, and Peking. Rock and soul music fueled the revolutionary movement with anthems and iconic imagery. Soon the musicians themselves, from John Lennon and Bob Dylan to James Brown and Fela Kuti, were being dragged into the fray. From Mick Jagger's legendary appearance in Grosvenor Square standing on the sidelines and snapping pictures, to the infamous incident during the Woodstock Festival when Pete Townshend kicked yippie Abbie Hoffman off the stage while he tried to make a speech about an imprisoned comrade, Doggett unravels the truth about how these were not the "Street Fighting Men" they liked to see themselves as and how the increasing corporatization of the music industry played an integral role in derailing the cultural dream. *There's a Riot Going On* is a fresh, definitive, and exceedingly well-researched behind-the-scenes account of this uniquely turbulent period when pop culture and politics shared the world stage with mixed results.

Towards a Justice with a Human Face

This volume addresses the pluralistic identity of the legal order. It argues that the mutual reflexivity of the different ways society perceives law and law perceives society eclipses the unique formal identity of written law. It advances a distinctive approach to the plural ways in which legal cultures work in a modern society, through the metaphor of the mirror. As a mirror of society, it distinguishes between the

structure and function of legal culture within the legal system, and the external representation of law in society. This duality is further problematized in relation to the increasing transnationalisation of law. Based on a multi-level interpretation of the concept of legal culture, the work is divided into three parts: the first addresses the mutual reflections of social and legal norms that support a pluralist representation of internal legal cultures, the second concentrates on the external legal cultures that constantly enable pragmatic adjustments of the legal order to its social environment, and the third concludes the book with a theoretical discussion of the issues presented.

In How to Be a Marxist in Philosophy one of the most famous Marxist philosophers of the 20th century shares his concept of what it means to function fruitfully as a political thinker within the discipline and environs of philosophy. This is the first English translation to Althusser's provocative and, often, controversial guide to being a true Marxist philosopher. Althusser argues that philosophy needs Marxism. It can't exist fully without it. Similarly, Marxism requires the rigour and structures of philosophy to give it form and focus. He calls all thinking people to, 'Remember: a philosopher is a man who fights in theory, and when he understands

the reasons for this fight, he joined the ranks of the struggle of workers and popular classes.' In short, this book comprises Althusser's elucidation of what praxis means and why it continues to matter. With a superb introduction from translator and Althusser archivist G.M. Goshgarian, this is a book that will re-inspire contemporary Marxist thought and reinvigorate our notions of what political activism can be.

Roberta Gately's lyrical and authentic debut novel—inspired by her own experiences as a nurse in third world war zones—is one woman's moving story of offering help and finding hope in the last place she expected. Gripped by haunting magazine images of starving refugees, Elsa has dreamed of becoming a nurse since she was a teenager. Of leaving her humble working-class Boston neighborhood to help people whose lives are far more difficult than her own. No one in her family has ever escaped poverty, but Elsa has a secret weapon: a tube of lipstick she found in her older sister's bureau. Wearing it never fails to raise her spirits and cement her determination. With lipstick on, she can do anything—even travel alone to war-torn Afghanistan in the wake of 9/11. But violent nights as an ER nurse in South Boston could not prepare Elsa for the devastation she witnesses at the small medical clinic

she runs in Bamiyan. As she struggles to prove herself to the Afghan doctors and local villagers, she begins a forbidden romance with her only confidant, a charming Special Forces soldier. Then, a tube of lipstick she finds in the aftermath of a tragic bus bombing leads her to another life-changing friendship. In her neighbor Parween, Elsa finds a kindred spirit, fiery and generous. Together, the two women risk their lives to save friends and family from the worst excesses of the Taliban. But when the war waging around them threatens their own survival, Elsa discovers her only hope is to unveil the warrior within. Roberta Gately's raw, intimate novel is an unforgettable tribute to the power of friendship and a poignant reminder of the tragic cost of war.

This classic book on the role of the Supreme Court in our democracy traces the history of the Court, assessing the merits of various decisions along the way. Eminent law professor Alexander Bickel begins with *Marbury vs. Madison*, which he says gives shaky support to judicial review, and concludes with the school desegregation cases of 1954, which he uses to show the extent and limits of the Court's power. In this way he accomplishes his stated purpose: "to have the Supreme Court's exercise of judicial review better understood and supported and more sagaciously used." The book now includes new foreword by Henry Wellington. Reviews of the Earlier Edition: "Dozens of books have examined and debated the court's role in the American system. Yet there remains great need

for the scholarship and perception, the sound sense and clear view Alexander Bickel brings to the discussion. Students of the court will find much independent and original thinking supported by wide knowledge. Many judges could read the book with profit." -Donovan Richardson, Christian Science Monitor "The Yale professor is a law teacher who is not afraid to declare his own strong views of legal wrongs One of the rewards of this book is that Professor Bickel skillfully knits in "ations from a host of authorities and, since these are carefully documented, the reader may look them up in their settings. Among the author's favorites is the late Thomas Reed Powell of Harvard, whose wit flashes on a good many pages." -Irving Dillard, Saturday Review Alexander M. Bickel was professor of law at Yale University.

Morals and Dogma of the Ancient and Accepted Scottish Rite of Freemasonry

The debate over the place of religion in secular, democratic societies dominates philosophical and intellectual discourse. These arguments often polarize around simplistic reductions, making efforts at reconciliation impossible. Yet more rational stances do exist, positions that broker a peace between relativism and religion in people's public, private, and ethical lives. Christianity, Truth, and Weakening Faith advances just such a dialogue, featuring the collaboration of two major philosophers known for their progressive approach to this issue. Seeking unity over difference, Gianni Vattimo and

René Girard turn to Max Weber, Eric Auerbach, and Marcel Gauchet, among others, in their exploration of truth and liberty, relativism and faith, and the tensions of a world filled with new forms of religiously inspired violence. Vattimo and Girard ultimately conclude that secularism and the involvement (or lack thereof) of religion in governance are, in essence, produced by Christianity. In other words, Christianity is "the religion of the exit from religion," and democracy, civil rights, the free market, and individual freedoms are all facilitated by Christian culture. Through an exchange that is both intimate and enlightening, Vattimo and Girard share their unparalleled insight into the relationships among religion, modernity, and the role of Christianity, especially as it exists in our multicultural world.

I signori della droga

With contributions from experts in the field of sociology of law, this book provides an overview of current perspectives on socio-legal studies. It focuses particularly on the relationship between law and society described in recent social systems theory as 'structural coupling'. The first part of the book presents a reconstruction of theoretical tendencies in the field of socio-legal studies, characterised by the emergence of a transnational model of legal systems no longer connected to territorial borders and culturally specific aspects of single legal orders. In the following parts of the book, the contributions analyse some concrete cases of interrelation between law and society from an empirical and theoretical perspective.

Afghan-American journalist Fariba Nawa delivers a revealing and deeply personal exploration of Afghanistan and the drug trade which rules the country, from corrupt officials to warlords and child brides and beyond. Khaled Hosseini, author of *The Kite Runner* and *A Thousand Splendid Suns* calls *Opium Nation* "an insightful and informative look at the global challenge of Afghan drug trade. Fariba Nawa weaves her personal story of reconnecting with her homeland after 9/11 with a very engaging narrative that chronicles Afghanistan's dangerous descent into opium trafficking...and most revealingly, how the drug trade has damaged the lives of ordinary Afghan people." Charles Carter (1887-1968) wrote this book in London during World War II. It was his first book in more than a dozen years. In this book, Carter turns his attention to fundamentals. book Carter tells us of aspects in terms of signs and the elements they represent. A planet in a fire sign, in square to a planet in an earth sign, Carter says, is an obviously difficult combination: Fire consumes earth, or, earth smothers fire. On the other hand, air/water squares are much less stressful. Carter was particularly fascinated by the nativities of Benito Mussolini and Adolf Hitler, his contemporaries. Charts for both men are given. Mussolini he declares to be a "bombastic Italian dictator," but Hitler remained a puzzle. _____ Charles E.O. Carter, one of the leading astrologers of the 20th century, was President of the Astrological Lodge at the Theosophical Society from 1920 to 1952. He was first Principal of the Faculty of Astrological Studies, which he helped found in 1948. He edited The Astrologer's Quarterly from 1926 until 1959. Essays on the Foundations of Astrology was first published in 1947.

How The Golden Legend shaped the medieval imagination It is impossible to understand the Middle Ages without grasping the importance of The Golden Legend, the most popular medieval collection of saints' lives. Assembled in the thirteenth century by Genoese archbishop Jacobus de Voragine, the book became the medieval equivalent of a bestseller. In Search of Sacred Time is the first comprehensive history and interpretation of this crucial book. Jacques Le Goff, who was one of the world's most

renowned medievalists, provides a lucid and compelling account that shows how The Golden Legend Christianized time itself, reconciling human and divine temporality. Authoritative, eloquent, and original, *In Search of Sacred Time* is a major reinterpretation of a book that is central to comprehending the medieval imagination.

Sociology of Constitutions

Of one and a half million surviving photographs related to Nazi concentration camps, only four depict the actual process of mass killing perpetrated at the gas chambers. *Images in Spite of All* reveals that these rare photos of Auschwitz, taken clandestinely by one of the Jewish prisoners forced to help carry out the atrocities there, were made as a potent act of resistance. Available today because they were smuggled out of the camp and into the hands of Polish resistance fighters, the photographs show a group of naked women being herded into the gas chambers and the cremation of corpses that have just been pulled out. Georges Didi-Huberman's relentless consideration of these harrowing scenes demonstrates how Holocaust testimony can shift from texts and imaginations to irrefutable images that attempt to speak the unspeakable. Including a powerful response to those who have criticized his interest in these images as voyeuristic, Didi-Huberman's eloquent reflections constitute an

invaluable contribution to debates over the representability of the Holocaust and the status of archival photographs in an image-saturated world.

Known for his deeply mystical writings about Christianity, Nicholas of Cusa wrote this, his most popular work, against a backdrop of widespread Church corruption. God, he believed, is found in all things, and thus cannot be perceived by man's senses and intellect alone. The path to ultimate knowledge, then, begins in recognizing our own ignorance. Deeply influenced by Saint Augustine, Nicholas mixes the metaphysical with the personal to create a deeply felt work, first published in 1453, designed to restore faith in even the most jaded.

The rites, practices, and texts collected by the mysterious UR group for the use of aspiring mages. • Rare Hermetic texts published in English for the first time. • Includes instructions for developing psychic and magical powers. In 1927 Julius Evola and other leading Italian intellectuals formed the mysterious UR group. Their goal: to bring their individual egos into a state of superhuman power and awareness in which they could act "magically" on the world. Their methods: the practice of ancient Tantric and Buddhist rituals and the study of rare Hermetic texts.

So successful were they that rumors spread throughout Italy of the group's power, and Mussolini himself became quite fearful of them. Now for the first time in English Introduction to Magic collects the rites, practices, and knowledge of the UR group for the use of aspiring mages. Included in Introduction to Magic are instructions for creating an etheric double, speaking words of power, using fragrances, interacting with entities, and creating a "magical chain." Among the arcane texts translated are the Tibetan teachings of the Thunderbolt Diamond Path, the Mithraic mystery cult's "Grand Papyrus of Paris," and the Greco-Egyptian magical text De Mysteriis. Anyone who has exhausted the possibilities of the mundane world and is ready to take the steps necessary to purify the soul in the light of knowledge and the fire of dedication will find a number of expert mentors here.

Law, Legal Culture and Society

In the West, media coverage of Afghanistan and Pakistan is framed by military and political concerns, resulting in a simplistic picture of ageless barbarity, terrorist safe havens, and peoples in need of either punishment or salvation. Under the Drones looks beyond this limiting view to investigate real people on the ground, and to analyze the political, social, and economic forces that shape their lives. Understanding the complexity of life along the 1,600-mile border between Afghanistan and Pakistan can help America and its European allies realign their priorities in the region to address genuine problems, rather than

fabricated ones. This volume explodes Western misunderstandings by revealing a land that abounds with human agency, perpetual innovation, and vibrant complexity. Through the work of historians and social scientists, the thirteen essays here explore the real and imagined presence of the Taliban; the animated sociopolitical identities expressed through traditions like Pakistani truck decoration; Sufism's ambivalent position as an alternative to militancy; the long and contradictory history of Afghan media; and the simultaneous brutality and potential that heroin brings to women in the area. Moving past shifting conceptions of security, the authors expose the West's prevailing perspective on the region as strategic, targeted, and alarmingly dehumanizing. Under the Drones is an essential antidote to contemporary media coverage and military concerns.

The Hidden God: Film and Faith, which accompanies a MoMA Film at the Gramercy Theatre program in the winter of 2003-2004, offers a range of approaches to cinema's explorations of a hidden God. Its thirty-five authors include filmmakers, magazine and newspaper critics, film scholars, curators of The Museum of Modern Art's Department of Film and Media, and others; together they discuss over fifty films, some more or less explicitly religious in theme, others from a gamut of genres not always connected with questions of faith: the western, the thriller, the policier, the costume drama, science fiction, horror,

comedy. The films come from Africa, the Middle East, and Japan as well as Europe and the United States, but even so, the book and exhibition are intended not as an encyclopedic anthology but, more humbly, as starting points in the study of an eternal theme.

This collection brings together some of the most influential sociologists of law to confront the challenges of current transnational constitutionalism. It shows the constitution appearing in a new light: no longer as an essential factor of unity and stabilisation but as a potential defence of pluralism and innovation. The first part of the book is devoted to the analysis of the concept of constitution, highlighting the elements that can contribute from a socio-legal perspective, to clarifying the principle meanings attributed to the constitution. The study goes on to analyse some concrete aspects of the functioning of constitutions in contemporary society. In applying Luhmann's General Systems Theory to a comparative analysis of the concept of constitution, the work contributes to a better understanding of this traditional concept in both its institutionalised and functional aspects. Defining the constitution's contents and functions both at the conceptual level and by taking empirical issues of particular comparative interest into account, this study will be of importance to scholars and students of sociology of law, sociology of politics and comparative public law.

Leo is an Italian writer in his thirties. Thomas, his German lover, is dead. On a plane to Munich, Thomas's home town, Leo slips into a reverie of their meeting and life in Paris, nights in Thomas's flat in Montmartre and a desperate, drug-induced flight through the forests of northern France that spells the end for Leo and Thomas languid, erotic life together. Leo travels to find anonymity. Structured in three musical movements, *Separate Rooms* is a story of ideal love, broken by absence and separation. When Thomas was alive, he and Leo had separate rooms in order to preserve the urgency of their passion. Now, Leo faces solitude, the impossible striving of memory to recreate life and the hostility of a prejudiced world. *Separate Rooms*, Tondelli's last book, is a powerful novel of the strength of love and the trauma

of death.

In *Doughnut Economics*, she sets out seven key ways to fundamentally reframe our understanding of what economics is and does. Along the way, she points out how we can break our addiction to growth; redesign money, finance, and business to be in service to people; and create economies that are regenerative and distributive by design. Named after the now-iconic "doughnut" image that Raworth first drew to depict a sweet spot of human prosperity (an image that appealed to the Occupy Movement, the United Nations, eco-activists, and business leaders alike), *Doughnut Economics* offers a radically new compass for guiding global development, government policy, and corporate strategy, and sets new standards for what economic success looks like. Raworth handpicks

the best emergent ideas—from ecological, behavioral, feminist, and institutional economics to complexity thinking and Earth-systems science—to address this question: How can we turn economies that need to grow, whether or not they make us thrive, into economies that make us thrive, whether or not they grow? Simple, playful, and eloquent, Doughnut Economics offers game-changing analysis and inspiration for a new generation of economic thinkers.
