[Reflections on Our Independence](#)

The CE Conference series is organized annually by the International Society for Productivity Enhancement (ISPE) and constitutes an important forum for international scientific exchange on concurrent and collaborative enterprise engineering. These international conferences attract a significant number of researchers, industrialists and students, as well as government representatives, who are interested in the recent advances in concurrent engineering research and applications. Concurrent Engineering Approaches for Sustainable Product Development in a Multi-Disciplinary Environment: Proceedings of the 19th ISPE International Conference on Concurrent Engineering contains papers accepted, peer reviewed and presented at the annual conference held at the University of Applied Sciences in Trier, Germany, from 3rd-7th of September 2012. This covers a wide range of cutting-edge topics including: Systems Engineering and Innovation Design for Sustainability Knowledge Engineering and Management Managing product variety Product Life-Cycle Management and Service Engineering Value Engineering

[The Philosopher's Stone for Sustainability](#)

Joyce leaned her black Triumph bicycle against a wall, and shivered in the foggy, early dawn light. Glancing up at the enormous wooden, carved gate, she hesitated. This was a secret world she was about to enter For 16 year old Joyce, who lived in one of the poorest streets in Cambridge, the college building where she was about to enter represented privilege, wealth, a life she'd never live. As a bedder, Joyce would be working up and down one of the stone staircases, making the beds of the male students, sweeping floors, dusting desks. She never expected to also find herself mothering, chastising and sometimes even covering up for 'her boys'. The Staircase Girls takes us into the lives of Joyce and other bedders, like Nance, Maud, Rose and Audrey. They endured the Second World War and then had to contend with poverty, ill health and bereavement. They loved, lost and loved again. But their friendships gave them strength, and their work gave them happiness - and even a lasting connection with their charges, some of whom would go on to run the country. Revealing their untold stories for the first time, this is a vivid, poignant account of these remarkable women's lives.

[Be Silent or Be Killed](#)

As the single market develops, this book - full of insight and rigour, yet lively in style - is probably the most important European contribution to strategic thinking for many years.

[Good Industrial Relations](#)

British Summer Time Begins is about summer holidays of the mid-twentieth century and how they were spent, as recounted to Ysenda Maxtone-Graham in vividly remembered detail by people who were there. Through this prism, it paints a revealing portrait of twentieth-century Britain in summertime: how we were, how families functioned, what houses and gardens and streets were like, what journeys were like, and what people did all day in their free time. It explores their expectations, hopes, fears and habits, the rules or lack of rules under which they lived, their happiness and sadness, their sense of being treasured or neglected - all within living memory, from pre-war summers to the late 1970s. Ysenda takes us back to the long stretch of time from the last days of June till the early days of September - those months when the term-time self was cast off and you could become the person you really were, and you had (if you were lucky) enough hours in the endless succession of days to become good at the things that would later define your adulthood. The 'showpiece' part of the summer holidays was 'the summer holiday', when families took off to the seaside, or to grandparents' houses teeming with cousins, or on early package holidays to France or Spain, siblings wedged into the back of small cars, roof-racks clattering, mothers preparing picnics. British Summer Time Begins is as much about the long weeks either side of that holiday as the trip itself: the weeks when nothing much officially happened, boredom often lurked nearby, and you vanished for hours on end, nobody much knowing or even caring where you were. Could it be that those unscheduled days were actually the most important and formative of your life? From the author of the beloved Terms & Conditions, British Summer Time Begins is a delightful, nostalgic and joyous celebration of summers.

Elizabeth Martin explores the impact of globalization on the language of French advertising, showing that English and global imagery play an important role in tailoring global campaigns to the French market, with media companies undeterred by the attempts through legislation to curb language mixing in the media.

Adopting a multi-disciplinary approach, the book provides a thorough grounding in metaphor and word meaning, theories on the processing and understanding of metaphorical language, and metaphor in other languages and translation. Rosamund Moon and Murray Knowles, draw on a wide selection of material to explore metaphor in relation to text, discourse and society. Linguistic metaphor and literary metaphor are examined across a range of contexts, such as politics, sport and advertising, whilst literary metaphor is demonstrated through authentic extracts from fiction and poetry. A final section covering non-verbal metaphor looks at metaphor in art, cinema and music.

This book constitutes the refereed post-proceedings of the 9th IFIP WG 5.1 International Conference on Product Lifecycle Management, PLM 2012, held in Montreal, Canada, in July 2012. The 58 full papers presented were carefully reviewed and selected from numerous submissions. They cover a large range of topics such as collaboration in PLM, tools and methodologies for PLM, modeling for PLM, and PLM implementation issues.

[Official Journal of the European Communities](#)

Eco-labelling is one of the key tools used by policy-makers in many parts of the world to encourage more sustainable production and consumption. By providing environmental information on products and services, eco-labels address both business users and consumers and range from mandatory approaches, such as required product declarations, to voluntary approaches, such as national eco-labels. Eco-labels can play an important role in environmental policy. They reward and promote environmentally superior goods and services and offer information on quality and performance with respect to issues such as health and energy consumption. Eco-labels fit well into a multi-stakeholder policy framework - as promulgated recently by the EU's integrated product policy (IPP) - since the development of criteria for labels and the acceptance in the market requires the involvement of a wide range of different parties, from government and business, to consumers and environmental organisations. However, many eco-labelling schemes have had troubled histories, and questions have been raised about their effectiveness. So, are eco-labels an effective tool to foster the development, production, sale and use of products and to provide consumers with good information about the environmental impacts of those products? Is eco-labelling useful to business as a marketing tool? What factors contribute to the development of successful schemes? More than ten years after its establishment, can the EU Flower be considered a success? Are national eco-labels such as the German Blue Angel and the Norwegian White Swan more effective? Should eco-labels be harmonised? Are eco-labels achieving their original aim of fostering sustainable production and consumption? For which product groups are ISO type I eco-labels appropriate and inappropriate? Are other labels, such as mandatory, ISO type II and ISO type III labels more effective in some cases? Are eco-labels focusing on the main environmental policy targets or just on "low-hanging fruit"? Are eco-labels really linked to other tools of IPP? The Future of Eco-labelling provides answers to all of these questions. Based on a major EU research exercise, the book plots a course for policy-makers to address some of the historic problems with eco-labelling, to learn what works and what doesn't and to move forward with schemes that can make a real difference to sustainable production and consumption. The book analyses the conditions under which eco-labelling schemes-both mandatory and voluntary-are or can become an efficient and effective tool to achieve given objectives; assesses previous experiences with eco-labels in different European countries and the relationship of these schemes with business strategies, IPP and market conditions; defines strategies aimed at linking eco-labels with other IPP measures; explores how eco-labels can be used to encourage sustainable consumption patterns, create green markets, foster innovation and development of green products and services, and implement multi-stakeholder initiatives; and sets out detailed recommendations for the future of eco-labelling. The book will be required reading for policy-makers, businesses involved with eco-labelling schemes and researchers interested in the development of sustainable production and consumption and IPP worldwide.

On 26 November 2008, India came under a series of horrific terrorist attacks which killed more than 150 people, and injured hundreds more. Scottish banker Roger Hunt was staying at the Oberoi Trident Hotel in Mumbai and found himself caught up in the siege. Trapped in his hotel room, defenceless against the suicidal terrorists killing people in cold blood, Roger was forced to rely on his instinct. This account of a terrifying ordeal is at once poignant, gripping and captivating in its raw, honest narration of an ordinary man thrown into the path of danger and pushed to the limit in his struggle for survival. Review: Roger Hunt had just finished dinner in Mumbai's five-star Oberoi Hotel when a waitress tried tempting him with the desserts on offer. But he decided against another course. It was the first of a series of decisions that would save his life, as the restaurant was strafed with machine gun fire just a few minutes later. DAILY RECORD

Samantha Lytton is either going to end up in jail or famous. Maybe both. Samantha, a semi-enthusiastic secretary, is getting along just fine. So what if her big Los Angeles acting career peaked at a pickle commercial, her love life is a grislier remake of Titanic, and dinner every night features Pizza Rolls. Life is great and fabulous and not terrible at all, okay? Things start to look up when a hot accountant with the cutest dimple in the world maneuvers her into her boss's office for a little hanky-panky. Except his version of hanky-panky is stealing a priceless Picasso and some light kidnapping. Samantha gets away, kidnaps him back—thank you very much—and finally figures out this guy isn't an accountant, or an F.B.I. agent like he said. His name is Nick—or Sam, maybe—and he's a freaking international art thief. And she's one dead wannabe-actress if they can't get the bad guys to stop shooting at them. Samantha should hate Nick/Sam, but he's sexy, funny, and can square dance better than anyone ought to in such tight pants. How can any self-respecting woman fall for a man whose name she doesn't know? Easy. He opens his not-so-wicked heart and ruins her life in the best way possible. Between dodging criminals, Samantha learns that finding happily ever after with yourself is the first step to real contentment. A cute dimple is just the second.

Presenting the gradual evolution of the concept of Concurrent Engineering (CE), and the technical, social methods and tools that have been developed, including the many theoretical and practical challenges that still exist, this book serves to summarize the achievements and current challenges of CE and will give readers a comprehensive picture of CE as researched and practiced in different regions of the world. Featuring in-depth analysis of complex real-life applications and experiences, this book demonstrates that Concurrent Engineering is used widely in many industries and that the same basic engineering principles can also be applied to new, emerging fields like sustainable mobility. Designed to serve as a valuable reference to industry experts, managers, students, researchers, and software developers, this book is intended to serve as both an introduction to development and as an analysis of the novel approaches and techniques of CE, as well as being a compact reference for more experienced readers.

Outside of a dog, a book is man's best friend. Inside of a dog, it's too dark to read. Groucho Marx Outside of a Dog is the captivating account of twenty-five books drawn from the fields of literature, psychology and philosophy, and a memoir of a reading self. Tracing the formative role books have played in his life, Rick Gekoski trains the same ironic and analytic eye on these books and their authors as he does on himself. The result is unique: a sustained, witty book dedicated to the proposition that we are what we read. Outside of A Dog might be described as an intellectual bibliomemoir, except that the author regards the noun 'intellectual' as a term of abuse. Gekoski's twenty-five include: Dr. Seuss, Horton Hatches the Egg; Magnus Hirschfeld Sexual Anomalies and Perversions; Allen Ginsberg, Howl; J.D. Salinger, The Catcher in the Rye; T.S. Eliot, The Waste Land; Descartes, Meditations; David Hume, An Inquiry Concerning Human Understanding; W.B. Yeats, The Collected Poems; F.R. Leavis, The Common Pursuit; Matthew Arnold, Culture and Anarchy; Tom Wolfe, The Electric Kool-Aid Acid Test; Ludwig Wittgenstein, Philosophical Investigations; R.D. Laing, The Divided Self; Germaine Greer, The Female Eunuch; D.H. Lawrence, Women in Love; A.S. Neill, Summerhill; Roald Dahl, Matilda; Alice Miller, Pictures of a Childhood; A.J. Ayer, Language, Truth, and Logic; Sigmund Freud, The Interpretation of Dreams; Carl Hiaasen, Double Whammy; Peter Wright, Spycatcher; and Rick Gekoski, Staying Up.

[Marketing in Europe](#)

This book showcases new and innovative approaches to biometric data capture and analysis, focusing especially on those that are characterized by non-intrusiveness, reliable prediction algorithms, and high user acceptance. It comprises the peer-reviewed papers from the international workshop on the subject that was held in Ancona, Italy, in October 2014 and featured sessions on ICT for health care, biometric data in automotive and home applications, embedded systems for biometric data analysis, biometric data analysis: EMG and ECG, and ICT for gait analysis. The background to the book is the challenge posed by the prevention and treatment of common, widespread chronic diseases in modern, aging societies. Capture of biometric data is a cornerstone for any analysis and treatment strategy. The latest advances in sensor technology allow accurate data measurement in a non-intrusive way, and in many cases it is necessary to provide online monitoring and real-time data capturing to support a patient's prevention plans or to allow medical professionals to access the patient's current status. This book will be of value to all with an interest in this expanding field.

Dive into Mrs Brown's A to Y of Everything by writer and star of NTA winning show Mrs Browns Boys, Brendan O'Carroll. The hilarious follow-up to the bestselling Mrs Brown's Family Handbook. If there's one Mammy in the world who knows what's what, it's Mrs Brown. Star of the incredibly popular TV show Mrs Brown's Boys, and the hit movie, here Agnes Brown follows up her bestselling Mrs Brown's Family Handbook with an A to Y (who really needs fecking 'Z's anyway?) of modern life. In this comical encyclopaedia, Agnes explores everything from pandas to piles, from biscuits to The Big Bang and from happiness to hairdryers. Peppered with her inimitable humour and full of hilarious photos, Mrs Brown's A to Y of Everything is your definitive guide to all things Mrs Brown. Brendan O'Carroll is an Irish writer, producer, comedian, actor, director and author. He is best known for playing Agnes Brown in Mrs Brown's Boys, which won the best sitcom BAFTA in 2012 and best comedy at the National Television Awards in 2020. He has written four films and nine comedy shows, including The Course (1995) and The Last Wedding (1999). He has also published seven novels, including The Mammy, The Scrapper and The Young Wan - a number of which have been translated into 12 languages.

Microprocessors presents an overview of the state of the art in the field of microprocessors and illustrates, with the aid of patents, its utilization and application. Organized into six parts, the book begins with an introduction to the microprocessor, microcomputer, and software. Parts I-III focus on program control, digital control, and electrical motor control. Subsequent parts show the medical applications, measuring instruments, and treatment of data in microprocessors.

[The Electrical Review](#)

All Dave Roberts ever wanted to do (apart from collect football programmes) was to work in advertising. More specifically, to work for the world's best advertising agency, Saatchi and Saatchi. There was just one problem. Even when he managed to persuade someone to employ him, Dave's copywriting assignments were mainly for second hand car dealers and double glazing companies. And Leeds, Manchester and, bizarrely, New Zealand were a long way from Charlotte Street and Madison Avenue. This was the world of the Sad Men. In his sparkling new memoir, Dave tells the story of a life shaped by his love of adverts, from seeing the PG Tips chimps at the age of three to writing infamous ads such as the Westpac Rap and having David Jason plug a family restaurant. Bursting with brilliant ideas - and some pretty daft ones - it is the cautionary tale of a quest for advertising glory and not quite ever getting there.

Industrial Product-Service Systems (IPS2), which is defined as "an integrated industrial product and service offering that delivers value in use," has expanded rapidly over the last decade. IPS2 has allowed us to achieve both high added value and high productivity and has enriched our QOL by improving the performance of products and services. We are now struggling with many awkward issues related to sustainability, but IPS2 is expected to be the "philosopher's stone" for solving these issues. Following the pattern of conferences held in Cranfield in 2009, Linköping in 2010, and Braunschweig in 2011, the fourth International CIRP Conference on Industrial Product-Service Systems, held on November 8-9, 2012, in Tokyo, will cover various aspects of IPS2. Topics planned for this year's conference reflect the latest IPS2 information in both the natural sciences and humanities and include case studies from various industries. IPS2 is still a relatively new field, so it is important to keep track of the entire context in order to promote more cross-sectional cooperation between multimodal fields and disciplines. The fourth International CIRP Conference on Industrial Product-Service Systems will serve as a vital platform for such collaborations and the discussion of new scientific ideas.
