The Fourth Industrial Revolution

Designed for students preparing for the Cambridge exams, each book in this series offers both students and teachers comprehensive support, including revision sections, mini dictionaries and appendices in the students' books, and model answers, photocopiable tests and marking schemes in the teacher's books. The books can be used either as free-standing supplementary material, or as a complete exam preparation series. They are designed to develop the essential language skills and sub-skills students need for each exam paper; they also offer specific training and guidance for each part of the exams, with an abundance of practice based on realistic test tasks.

First Certificate Language Practice

ABOUT THE BOOK This book is dedicated to one verb only, which is one of the most common and complex verbs in the English language. The verb 'GET' with its countless meanings, leaves ESL students completely baffled. This booklet has been written to clarify how to use this complex tiny word. The author has taken considerable care to include everything you could possibly wish to know such as idiomatic expressions and phrasal verbs as well as all its various other meanings. The booklet is solely dedicated to the use of GET.

C1 Speaking Skills

First published in 1976, Raymond Williams' highly acclaimed *Keywords: A Vocabulary of Culture and Society* is a collection of lively essays on words that are critical to understanding the modern world. In these essays, Williams, a renowned cultural critic, demonstrates how these key words take on new meanings and how these changes reflect the political bent and values of our past and current society. He chose words both essential and intangible--words like nature, underprivileged, industry, liberal, violence, to name a few--and, by tracing their etymology and evolution, grounds them in a wider political and cultural framework. The result is an illuminating account of the central vocabulary of ideological debate in English in the modern period. This edition features a new original foreword by Colin MacCabe, Distinguished Professor of English and Literature, University of Pittsburgh, that reflects on the significance of Williams' life and work. *Keywords* remains as relevant today as it was over thirty years ago, offering a provocative study of our language and an insightful look at the society in which we live.

Cambridge English: C2 Proficiency (CPE) 101 Key Word Transformation quizzes - Volume 4: with answers

This e-book is Volume 3 of the 101 C2-Proficiency Key Word Transformation quizzes series written to help you improve paraphrasing skills. It contains 101 sentence transformations in total, many of which are based closely on some of the most common test items in past exam papers. For those preparing for the C2 Cambridge English Proficiency examination (previously known as the CPE), the book provides you with further practice for Part 4 of the Reading & Use of English paper. Prior to using this book, you should acquaint yourself with basic knowledge of some sophisticated grammar forms in English, which appear to be commonly tested in this part of the paper. These include inversion or inverted sentences, cleft sentences, emphatic structures, conditionals, comparatives and superlatives, relative clauses, nominal clauses, phrasal verbs and phrasal nouns, prepositional combinations, etc. A firm grasp of collocations and idiomatic expressions is also essential in helping you make full use of this book. Before checking out the other volumes of the series, it would be advisable for you to attempt Volume 1 and Volume 2 as they are aimed at helping you revise the key language features mentioned above as well as lay the foundation for more complex quizzes in the later volumes.

Intermediate Language Practice

Includes 29 poems revolving around the title, selections written for oral readings with jazz accompaniment, and 13 previously published poems

English Grammar Practice-First Certificate in English

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future--one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Keywords

From news and speeches to informal chatter on social media, natural language is one of the richest and most underutilized sources of data. Not only does it come in a constant stream, always changing and adapting in context; it also contains information that is not conveyed by traditional data sources. The key to unlocking natural language is through the creative application of text analytics. This practical book presents a data scientist's approach to building language-aware products with applied machine learning. You'll learn robust, repeatable, and scalable techniques for text analysis with Python, including contextual and linguistic feature engineering, vectorization, classification, topic modeling, entity resolution, graph analysis, and visual steering. By the end of the book, you'll be equipped with practical methods to solve any number of complex real-world problems. Preprocess and vectorize text into high-dimensional feature representations Perform document classification and topic modeling Steer the model selection process with visual diagnostics Extract key phrases, named entities, and graph structures to reason about data in text Build a dialog framework to enable chatbots and language-driven interaction Use Spark to scale processing power and neural networks to scale model complexity

C1 Advanced Key Word Transformation Made Easy

Whether you're a first-time ESL/EFL/TEFL teacher, an experienced but overwhelmed instructor, or an instructor without a textbook, you need more activities for your conversion or speaking classes. If you're tired of wading through the junk on the Internet, then Jackie is here to help. During her decade of experience as a CELTA/DELTA certified teacher, author Jackie Bolen has developed countless games and activities for her students. She's sharing her low-prep/no-prep ideas with ESL teachers throughout the world. In *39 No-Prep/Low-Prep ESL Speaking Activities*, you'll get over three-dozen ideas to use in your own classroom. The highly-detailed descriptions will show you exactly how to use the activities during your lessons. Jackie's clearly and concisely explained activities will help you add instructional variety and put the focus back on your students. If you're extremely busy or you're simply out of new ideas, Jackie's book makes it easy to try out new and exciting activities your students will love! Buy the book to get new lesson plans ready to go in minutes! You can find more of her activities and games at the website: www.eslspeaking.org.

The Structural Transformation of the Public Sphere

This edition of practice tests has been written to closely replicate the Cambridge exam experience, although it is also suitable for any English language student working at CEFR B2 level. Each of its 200 exam-styled, single-sentence Key Word Transformation (Part 4) assessments carries a lexico-grammatical focus, testing lexis, grammar and vocabulary. The content in this volume is also available in the English Master B2 mobile app, part of a suite of critically acclaimed, test-practice learning tools geared towards the Cambridge B2 First and C1 Advanced Use of English and Listening exams. Laura Broadbent is an educational materials writer currently based in the UK. She previously taught Cambridge exam courses in Spain and has published learning and assessment resources with Oxford University Press, Cambridge University Press, Pearson Education and National Geographic.

Cambridge English: C2 Proficiency (CPE) 101 Key Word Transformation quizzes - Volume 3: with answers

While much has been written on asymmetric aspects of sentence structure, symmetric aspects have been largely ignored, or claimed to be non-existent. Does symmetry in syntax exist, and if it does, how do we account for it? In this book, Barbara Citko sets out to tackle these questions and offers a unified approach to a number of phenomena that have so far been studied only in isolation. Focusing on three core minimalist mechanisms: merge, move and labeling, she advances a new theory of these mechanisms, by showing that under certain well-defined circumstances merge can create symmetric structures, move can target either of two potentially moveable objects, and labels can be constructed symmetrically from the features of two objects. This book is aimed at researchers and graduate students interested in minimalist syntax, the structure of questions, relative clauses, coordination, double object constructions and copular sentences.

Symmetry in Syntax

B2 First - Key Word Transformation Made Easy

Gain the confidence you need to excel in English speaking exams and other formal speaking situations! In five short units, experienced EFL teacher Albert Bowkett presents innovative and effective techniques and exercises related to core speaking elements such as pronunciation, picture-related exam tasks, collaborative exam tasks, improvised conversation, presentations, and interviews. What makes this book special is its application of logic and critical thinking skills, as well as organisational and performance techniques. This goes beyond simply 'learning phrases' (intermediate level) and provides the advanced level EFL speaker with proven tools and strategies for passing speaking exams and producing confident, original and dynamic answers in all formal situations. Includes FREE bonus chapter: Unit 1 from "C1 Vocabulary: 100 Exam Keywords for Advanced English"

Business English Vocabulary Builder

C2 Proficiency - Key Word Transformation Made Easy

Certificate in Advanced English

Offers advice on how to lead an organization into change, including establishing a sense of urgency, developing a vision and strategy, and generating short-term wins.

R for Data Science

This major work retraces the emergence and development of the Bourgeois public sphere - that is, a sphere which was distinct from the state and in which citizens could discuss issues of general interest. In analysing the historical transformations of this sphere, Habermas recovers a concept which is of crucial significance for current debates in social and political theory. Habermas focuses on the liberal notion of the bourgeois public sphere as it emerged in Europe in the early modern period. He examines both the writings of political theorists, including Marx, Mill and de Tocqueville, and the specific institutions and social forms in which the public sphere was realized. This brilliant and influential work has been widely recognized for many years as a classic of contemporary social and political thought, of interest to students and scholars throughout the social sciences and humanities.

An Introduction to Genetic Engineering

Exploring the how and why we use the Internet to shop, sell and search, a Wharton professor and consumer shopping behavior expert helps entrepreneurs, business and economics students and professional investors understand Internet trends and innovations. 7,500 first printing.
