The Nature and Structure of Content

Graphic Violence provides an innovative introduction to the relationship between violence and visual media, discussing how media consumers and producers can think critically about and interact with violent visual content. It comprehensively surveys predominant theories of media violence and the research supporting and challenging them, addressing issues ranging from social learning, to representations of war and terrorism, to gender and hyper-masculinity. Each chapter features original artwork presenting a story in the style of a graphic novel to demonstrate the concepts at hand. Truly unique in its approach to the subject and medium, this volume is an excellent resource for undergraduate students of communication and media theory as well as anyone interested in understanding the causes and effects of violence in media.

The inspiration for the film *The Dark Divide* starring David Cross and Debra Messing, one of America's most esteemed natural history writers takes to the hills in search of Bigfoot—and finds the wildness within ourselves. Awarded a Guggenheim Fellowship to investigate the legends of Sasquatch, Yale-trained ecologist Dr. Robert Pyle treks into the unprotected wilderness of the Dark Divide near Mount St. Helens, where he discovers both a giant fossil footprint and recent tracks. On the trail of what he thought was legend, he searches out Indians who tell him of an outcast tribe, the Seeahtiks, who had not fully evolved into humans. A handful of open-minded biologists and anthropologists counter the tabloids Pyle studies, while rogue Forest Service employees and loggers swear of a vast conspiracy to deep-six true stories of unknown,

upright hominoid apes among us. He attends Sasquatch Daze, where he meets scientists, hunters, and others who have devoted their lives to the search, only to realize that “these guys don't want to find Bigfoot?they want to be Bigfoot!” Since its original publication, the author's fresh experiences and finds have been added to his original work through an updated chapter. With an evaluation of recent DNA evidence from Bigfoot hair and scat, the study of speech phonemes in the “Sierra Sounds” purported Bigfoot recordings, an examination of the impact of the wildly popular Animal Planet series Bigfoot Hunters, the reemergence of the famous Bob Gimlin into the Bigfoot community, and more, *Walking With Bigfoot* keeps every Bigfoot enthusiast's mind wide open to one of the biggest questions in the land and brings Pyle's work on the “legend” of Bigfoot into the new century.

An eminent economist warns that Western nations' economic expectations for the future are way out of sync with the realities of economic stagnation and stringent steps will be required to avoid massive political and economic upheaval. "It is alarmingly difficult to disagree with Stephen King. All one can say, perhaps, is that one of the great errors of human nature—strongly displayed before the credit crunch—is the belief that a prevailing trend will continue indefinitely. The crunch is surely a reminder that what goes up must come down."—Charles Moore, Daily Telegraph "[King] is dabbling in the financial equivalent of the horror genre. Perhaps even scarier, his is the stuff of nonfiction."—Michael J. Casey, Wall Street Journal

When the Money Runs Out

A new and incisive analysis of the political viability of human rights, with an in-depth investigation of its largest violation: world hunger. Gonzalez-Pelaez develops John Vincent's theory of basic human rights within the context of the international political economy and demonstrates how the right to food has become an international norm enshrined within international law. She then assesses the international normative and practical dimensions of hunger in connection with international trade and poverty. Using the society of states as the framework of analysis, she explores the potential that the current system has to correct its own anomalies, and examines the measures that can move the hunger agenda forward in order to break through its current stagnation.

India's history and culture is ancient and dynamic, spanning back to the beginning of human civilization. Beginning with a mysterious culture along the Indus River and in farming communities in the southern lands of India, the history of India is punctuated by constant integration with migrating peoples and with the diverse cultures that surround the country. Placed in the center of Asia, history in India is a crossroads of cultures from China to Europe, as well as the most significant Asian connection with the cultures of Africa. The Historical Dictionary of Ancient India provides information ranging from the earliest Paleolithic cultures in the Indian subcontinent to 1000 CE. The ancient history of this country is related in this book through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on rulers, bureaucrats, ancient societies, religion, gods, and philosophical ideas.

The World We Want compares the future world that Enlightenment intellectuals had hoped for with our own world at present. In what respects do the two worlds differ, and why are they so different? To what extent is and isn't our world the world they wanted, and to what extent do we today still want their world? Unlike previous philosophical critiques and defenses of the Enlightenment, the present study focuses extensively on the relevant historical and empirical record first, by examining carefully what kind of future Enlightenment intellectuals actually hoped for; second, by tracking the different legacies of their central ideals over the past two

centuries. But in addition to documenting the significant gap that still exists between Enlightenment ideals and current realities, the author also attempts to show why the ideals of the Enlightenment still elude us. What does our own experience tell us about the appropriateness of these ideals? Which Enlightenment ideals do not fit with human nature? Why is meaningful support for these ideals, particularly within the US, so weak at present? Which of the means that Enlightenment intellectuals advocated for realizing their ideals are inefficacious? Which of their ideals have devolved into distorted versions of themselves when attempts have been made to realize them? How and why, after more than two centuries, have we still failed to realize the most significant Enlightenment ideals? In short, what is dead and what is living in these ideals?

He was blazingly handsome-big blue eyes in a boyish face, shaved head, a thick moustache and beard of dirty blond hair biceps that were cut, stretching against the thin white cotton of the short-sleeved shirt underneath his vest. From what I can tell, Ghost is one of the most ruthless members of the Black Dogs MC. He seems to take a certain pleasure in violence and mayhem, and he has a wit that is just as sharp as any of the blades he carries. He's also about as arrogant and infuriating as any man I've ever met, and has women fawning all over him wherever he goes. But for some reason, he seems to think that I'm his soulmate. He calls me his Valkyrie, and he shows up, unbidden, at the most inopportune times. Like when I'm trying to teach my class full of private school kids. I told myself I'd never fall for someone like him again, but there's just something that I find hard to resist and it's not just all the muscles, tattoos, and how everything that comes out of his mouth seems designed to amuse someone, even if it's just himself. Getting mixed up with him is crazy, and I should know better. Especially once trouble starts brewing all around us. The thing is, even though Ghost is the most dangerous man I've ever met, I've never felt safer than when I'm in his arms

archaeologists . . . Spelling bee prodigies . . . For more than fifteen years, best-selling author and historian Hampton Sides has traveled widely across the continent exploring the America that lurks just behind the scrim of our mainstream culture. Reporting for *Outside*, *The New Yorker*, and NPR, among other national media, the award-winning journalist has established a reputation not only as a wry observer of the contemporary American scene but also as one of our more inventive and versatile practitioners of narrative non-fiction. In these two dozen pieces, collected here for the first time, Sides gives us a fresh, alluring, and at times startling America brimming with fascinating subcultures and bizarre characters who could live nowhere else. Following Sides, we crash the redwood retreat of an apparent cabal of fabulously powerful military-industrialists, drop in on the Indy 500 of bass fishing, and join a giant techno-rave at the lip of the Grand Canyon. We meet a diverse gallery of American visionaries— from the impossibly perky founder of Tupperware to Indian radical Russell Means to skateboarding legend Tony Hawk. We retrace the route of the historic Bataan Death March with veterans from Sides' acclaimed WWII epic, *Ghost Soldiers*. Sides also examines the nation that has emerged from the ashes of September 11, recounting the harrowing journeys of three World Trade Center survivors and deciding at the last possible minute not to "embed" on the Iraqi front-lines with the U.S. Marines. *Americana* gives us a sparkling mosaic of our country, in all its wild and poignant charm.

Feridun Zaimoglu made a spectacular entrance onto the German cultural scene in 1995 with *Kanak Sprak* a volume of incendiary texts based on interviews with disaffected Turkish German youths, using an invented, stylized literary language, a hybrid of multiple varieties of German with a hip hop beat. A prolific and acclaimed novelist, dramatist, newspaper columnist, visual artist and live performer, Zaimoglu has remained in the public eye through controversy and reinvention. His more recent work appropriates German literary traditions in radically new ways, adapting Romantic styles, narrative forms and motifs to postmodern conditions. This volume features the suppressed original first chapter of *Leyla*, Zaimoglu's critically and commercially most successful novel, first published in 2006, as well as an extensive interview with the author. Critical essays on his writing by major scholars in the field cover issues of gender, language and power, the politics of ethnicity, religion, Romanticism and anti-modernism, and the challenges of translating his work. This is the

first volume of criticism in any language dedicated to Zaimoglu's literary work.
