New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture. First published in 1996, this comprehensive guide to the history of Britain and its peoples will be indispensable reading for the general enthusiast, as well as students. It is packed full of fascinating detail on everything from Hadrian's Wall to the Black Death to Tony Blair. The book was assembled over more than thirty years and has seen updates in three editions. "He has done for historical encyclopaedias what Samuel Johnson did for dictionaries." Andrew Roberts, The Daily Telegraph "An astonishing synthesis of information." Roger Scruton, The Times "An astonishing achievement, a compelling book for dipping into, a splendid work." Simon Hoggart, The Guardian "This marvellous book, which contains tens of thousands of historical facts will enlighten, amuse, and inform. Every home should have one." Simon Heffer, The Daily Mail "If you were marooned on that mythical desert island with only one history book, this would be the one to take. Buy three copies - one for the children, one for the grandchildren- and one for yourself." John Charmley, The Daily Telegraph In the early 1950s Sir Winston Churchill met the Irish politician Sean Lemass, who was later to become Taoiseach. The great statesman remarked upon the economic circumstances of Britain at the time. 'The situation in Great Britain,' quoth Churchill in his most grandiloquent tones, 'is serious but not hopeless.' Lemass responded instantly, 'Sure,' he said, 'it's exactly the opposite in Ireland.' Thus the title for Jack McLean's autobiography. It is a book about being born into the new world after the Second World War. McLean's varied experiences during a time which shifted from the residue of pre-war attitudes to a change in global culture are chronicled, as are his relationships with a large number of the students who are now household names. McLean is suitably scathing about most of them. Equally so is his account of the next step in his career - the turbulent area of education. He entered this a skilled politico and left a skilled sceptic. His final retirement from both education and politics was welcomed by all, not least himself. In this book we learn about what there was in his life and background to make him into one of the most polemical journalists to emerge in the post-war years 'No great task considering what there is really' said McLean when confronted with that observation. 'I only write what I've done, or didn't do at that.' Friend or foe notwithstanding, this book is about the times in which McLean has so far lived, along with lots of you out there. He says it's fairly true as well. Or at least honest. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing many of these classic works in affordable, high quality, modern editions, using the original text and artwork. This book analyses the development of Catholic schooling in Scotland over the course of the nineteenth and twentieth centuries. Scholarship of this period tends to be dominated by discussions of the 1872 and 1918 Education (Scotland) Acts: while these crucial acts are certainly not neglected in this volume, the editors and contributors also examine the key figures and events that shaped Catholic education and Catholic schools in Scotland. Focusing on such diverse themes as lay female teachers and non-formal

learning, this volume illuminates many under-researched and neglected aspects of Catholic schooling in Scotland. This wide-ranging edited collection will illuminate fresh historical insights that do not focus exclusively on Catholic schooling, but are also relevant to the wider Scottish educational community. It will appeal to students and scholars of Catholic schooling, schooling in Scotland, as well as Christian schooling more generally.
