Law: Made Simple, 8TH Edition focuses on the history, elements, and interpretation of English law. The publication first elaborates on the historical and legal sources of English law and courts. Discussions cover juries, arbitration, civil, criminal, and other courts, administrative tribunals, legislation, textbooks, local custom, equity, and canon law. The book then takes a look at the judiciary, law officers, and the legal profession, outline of the law of persons, and law of contract. Topics include discharge of contract, remedies for a breach of contract, interpretation of a contract, classification of contracts, essentials of a valid contract, marriage, divorce, corporations, adoption, legitimation, guardianship, solicitors, and barristers. The manuscript examines criminal law, law of succession, law of property, and trusts. Concerns include differences between private and charitable trusts, appointment of trustees, duties and powers of trustees, settlements and trusts for sale, personal representatives, and criminal liability. The text is a valuable source of information for legal experts and researchers interested in English law.

Modern Mathematics: Made Simple presents topics in modern mathematics, from elementary mathematical logic and switching circuits to multibase arithmetic and finite systems. Sets and relations, vectors and matrices, tessellations, and linear programming are also discussed. Comprised of 12 chapters, this book begins with an introduction to sets and basic operations on sets, as well as solving problems with Venn diagrams. The discussion then turns to elementary mathematical logic, with emphasis on inductive and deductive reasoning; conjunctions and disjunctions; compound statements and conditional statements; and biconditional sentences. Subsequent chapters focus on switching circuits; multibase arithmetic; finite systems; relations, vectors, and matrices; tessellations; and linear programming. The book concludes with an analysis of motion geometry and rubber sheet geometry, paying particular attention to radial enlargement and composite reflections as well as topological equivalence, networks for maps, and incidence matrices. This monograph is intended for students, parents, and teachers who are interested in modern mathematics.
