Da dove proviene quel profumo meraviglioso e familiare di molti funghi, che ci fa pensare al sottobosco? Dall'1-otten-3-olo, un composto dal nome bizzarro. Perché non utilizzarlo in cucina, come una spezia? E perché non servirci anche del sotolone, con il suo profumo di curry, fieno greco e vin jaune? Hervé This ci conduce alle frontiere di una nuova rivoluzione culinaria. Nelle nostre dispense nuove spezie si aggiungeranno a quelle tradizionali; i cuochi del XXI secolo impareranno ad affiancare composti chimici puri, a legarli come fa un compositore con le note musicali, per creare ricette dai sapori inediti. Non si tratta solo di una curiosità scientifica: in un mondo sempre più affollato, la cucina nota a nota potrà contribuire a limitare gli sprechi alimentari creando piatti nuovi, economici e sicuri. Quindi frutta, verdura, carne e pesce cederanno il passo a una cucina «chimica», a pietanze in pillole? Il dibattito è aperto, ma Hervé This ci rassicura: «Nell'arte non esiste la sostituzione, ma solo l'aggiunta e l'ampliamento delle scelte». Come l'uso del sintetizzatore in musica non ha reso obsoleto il violino, così la cucina nota a nota sarà una «forma artistica in più», una «grande avventura» che permetterà di costruire un «nuovo modo di cucinare e di mangiare».

The blending of people and living machines is a central element in the futurist "reconstruction of the universe." However, prior to the futurist break, a group of early-twentieth-century poets, later dubbed crepuscolari (crepusculars), had already begun an attack against the dominant cultural system, using their poetry as the locus in which useless little objects clashed with the traditional poetry of human greatness and stylistic perfection. The Quiet Avant-garde draws from a number of twenty-first-century theories of vital materialism, object-oriented ontology, and environmental humanities as well as Bruno Latour's criticism of modernity to illustrate how the crepuscular movement sabotaged the modern mindset and launched the counter-discourse of the Italian avant-garde by blurring the line dividing people from "things." This liminal poetics, at the crossroad of tradition, modernism, and the avant-garde, acted as the initiator of the ethical and environmental transition from a universe subjected to humans to human-thing co-agency. This book proposes a contemporary reading of Italian twentieth-century movements and offers a foothold for scholars outside Italian studies to access authors who are still unexplored in North American literature.

This book analyzes and discusses in detail art therapy, a specific tool used to sustain health in affective developments, rehabilitation, motor skills and cognitive functions. Art therapy is based on the assumption that the process of making art (music, dance, painting) sparks emotions and enhances brain activity. Art therapy is used to encourage personal growth, facilitate particular brain areas or activity patterns, and improve neural connectivity. Treating neurological diseases using artistic strategies offers us a unique option for engaging brain structural networks that enhance the brain's ability to form new connections. Based on brain plasticity, art therapy has the potential to increase our repertoire for treating neurological diseases. Neural substrates are the basis of complex emotions relative to art experiences, and involve a widespread activation of cognitive and motor systems. Accordingly, art therapy has the capacity to modulate behavior, cognition, attention and movement. In this context, art therapy can offer effective tools for improving general well-being, quality of life and motivation in connection with neurological diseases. The book discusses art therapy as a potential group of techniques for the treatment of neurological disturbances and approaches the relationship between humanistic disciplines and neurology from a holistic perspective, reflecting the

A major reassessment of Philip V's leadership and what it meant for the modern Spanish state Often dismissed as ineffective, indolent, and dominated by his second wife, Philip V of Spain (1700-1746), the first Bourbon king, was in fact the greatest threat to peace in Europe during his reign. Under his rule, Spain was a dynamic force and expansionist power, especially in the Mediterranean world. Campaigns in Italy and North Africa revitalized Spanish control in the Mediterranean region, and the arrival of the Bourbon dynasty signaled a sharp break from Habsburg attitudes and practices. Challenging long-held understandings of early eighteenth-century Europe and the Atlantic world, Christopher Storrs draws on a rich array of primary documents to trace the political, military, and financial innovations that laid the framework for the modern Spanish state and the coalescence of a national identity. Storrs illuminates the remarkable revival of Spanish power after 1713 and sheds new light on the often underrated king who made Spain's resurgence possible.

Benjamin G. Kohl (1938-2010) taught at Vassar College from 1966 till his retirement as Andrew W. Mellon Professor of the Humanities in 2001. His doctoral research at The Johns Hopkins University was directed by Frederic C. Lane, and his principal historical interests focused on northern Italy during the Renaissance, especially on Padua and Venice. His scholarly production includes the volumes *Padua under the Carrara, 1318-1405* (1998), and *Culture and Politics in Early Renaissance Padua* (2001), and the online database *The Rulers of Venice, 1332-1524* (2009). The database is eloquent testimony of his priority attention to historical sources and to their accessibility, and also of his enthusiasm for collaboration and sharing among scholars.

This letter is your death sentence. To avenge what you have done you will die. But what has Manno the pharmacist done? Nothing that he can think of. The next day he and his hunting companion are both dead. The police investigation is inconclusive. However, a modest high school teacher with a literary bent has noticed a clue that, he believes, will allow him to trace the killer. Patiently, methodically, he begins to untangle a web of erotic intrigue and political calculation. But the results of his amateur sleuthing are unexpected--and tragic. *To Each His Own* is one of the masterworks of the great Sicilian novelist Leonardo Sciascia--a gripping and unconventional detective story that is also an anatomy of a society founded on secrets, lies, collusion, and violence.

This book presents a semiotic study of the re-elaboration of Christian narratives and values in a corpus of Italian novels published after the Second Vatican Council (1960s). It tackles the complex set of ideas expressed by Italian writers about the biblical narration of human origins and traditional religious language and ritual, the perceived clash between the immanent and transcendent nature and role of the Church, and the problematic notion of sanctity emerging from contemporary narrative.

The Years of Alienation in Italy offers an interdisciplinary overview of the socio-political, psychological, philosophical, and cultural meanings that the notion of alienation took on in Italy between the 1960s and the 1970s. It addresses alienation as a social condition of estrangement caused by the capitalist system, a pathological state of the mind and an ontological condition of subjectivity. Contributors to the edited volume explore the pervasive influence this multifarious concept had on literature, cinema, architecture, and photography in Italy. The collection also theoretically reassesses the notion of alienation from a novel perspective, employing Italy as a paradigmatic case study in its pioneering role in the revolution of mental health care and factory work during these two decades.

["Il" Diavoletto](#)

[Il Cervello](#)

Since 1947, the mysterious crash of an unidentified aircraft at Roswell, New Mexico, has fueled a firestorm of speculation and controversy with no conclusive evidence of its extraterrestrial origin -- until now. Colonel Philip J. Corso (Ret.), a member of President Eisenhower's National Security Council and former head of the Foreign Technology Desk at the U.S. Army's Research & Development department, has come forward to tell the whole explosive story. Backed by documents newly declassified through the Freedom of Information Act, Colonel Corso reveals for the first time his personal stewardship of alien artifacts from the crash, and discloses the U.S. government's astonishing role in the Roswell incident: what was found, the cover-up, and how these alien artifacts changed the course of 20th century history.

Grazia Deledda's Dance of Modernity is a highly original and innovative interpretation of Deledda's narrative in philosophical perspective, which also includes the study of textual variations and considers cultural history in Italy during the early twentieth century.

[Il dossier "Bilderberg"](#)

[Brain and Art](#)

Che cos'è il "Bilderberg"? Un gruppo, un club, un potere occulto, il governo segreto del mondo? Quando è stato fondato, da chi e per quali obiettivi? Per rispondere a queste domande l'autore ha scelto di cercare la verità seguendo tutte le piste. C'è chi ritiene che il "Bilderberg" sia l'espressione degli Illuminati, chi vi vede la longa manus della finanza ebraica, mentre altri lo denunciano come strumento della Sinarchia internazionale. Non manca chi lo considera l'organizzazione politica della classe dominante transnazionale ed infine chi pensa sia solo una riunione noiosa nella quale non succede nulla di interessante. Richiamandosi al consiglio di Sherlock Holmes, secondo il quale prima di elaborare una teoria occorre cercare di conoscere i fatti, l'autore ha ricostruito i diversi punti di vista sul ruolo di questo "gruppo" misterioso e criticato. Ha cercato di distinguere le fantasie dalla realtà e di arrivare ad una prima, provvisoria, conclusione. Spetterà al lettore decidere se condividerla o contestarla.

[Corriere illustrato delle famiglie](#)

A collection of essays by the art historian Aby Warburg, these essays look beyond iconography to more psychological aspects of artistic creation: the conditions under which art was practised; its social and cultural contexts; and its conceivable historical meaning.
