*Open Innovation in the Food and Beverage Industry* The second edition of *Case Studies in Child and Adolescent Psychopathology* expands on the case study approach utilized in the first edition, providing engaging narratives of clients with rich backgrounds and complex family situations. Because the answers to important real-world questions are often nuanced, contextual, and tentative—unlike the idealistic scenarios presented in most textbooks—these case studies contain ethical lapses, clinical mistakes, confusing diagnostic presentations, unevenly applied approaches, and sometimes unhappy endings. These real-life portrayals of clients help students learn the skills they will need to be successful in the mental health field. Critical thinking questions designed to develop objective analysis and evaluation skills are embedded throughout the cases, which can be used in individual, group, or online formats. This problem-based learning approach challenges readers to create accurate case conceptualizations and evidence-based treatment plans. The cases utilize the *International Statistical Classification of Diseases and Related Health Problems* and the *Diagnostic and Statistical Manual of Mental Disorders*. The current research applied in the case studies serves to deepen the understanding of the etiology and treatment of these disorders. The latest edition emphasizes culture, race, and ethnicity in psychotherapy, featuring both children and mental health providers who represent a wide variety of cultural backgrounds.

*Risk Assessment* The field of e-learning continues to experience dramatic and turbulent growth. Over time, as technology has improved and the method's real capabilities have emerged, e-learning has gained widespread acceptance and is now the fastest growing sector of corporate learning. As in years past, *Michael Allen's Annual* offers a diverse and important collection that contains some of the most current insights and best practices that will help both educators and workplace learning leaders address issues of design and implementation, as well as strategy

*and culture. In addition, this new volume offers a diverse mix of content that spans the full spectrum of technology-based learning. Year after year, the Annual discusses emerging trends in social media; showcases e-learning innovation; presents contemporary- and best-practices; tackles big-picture, strategic issues; and provides a host of useful tips and techniques. Additional content is also available online. Praise for Michael Allen's 2012 e-Learning Annual "Michael Allen's Annual really is annual. I found new examples and provocative ideas—just what I was looking for." —Allison Rossett, professor of educational technology, San Diego State University "Just another academic anthology? Hardly! Michael Allen has convinced e-learning's super-heroes to join forces to crush complacency, demolish dogma, rewrite rules, streamline strategies, and light a brighter future for e-learning. Warning: The accumulated wisdom and original thinking of this elite team of designers, practitioners, consultants, and researchers will leave you dissatisfied with your current e-learning efforts and aching to put their ideas into play." —William Horton, author, e-Learning by Design and consultant, William Horton Consulting "The real learning at conferences takes place in the hallways. *Moonshiners and Prohibitionists Securing sponsorship and other sources of funding for events is becoming increasingly competitive, making differentiation and delivery vital. Event Sponsorship and Fundraising explores this complex area of event management, drawing on both experiential marketing and consumer behaviour theories, and developing critical insights on the dynamics of successful event sponsorship. Its coverage includes professional guidance on prospecting for sponsors, brand activation and evaluation, as well as advice on relationship management, proposal writing and pitching to potential sponsors. Event Sponsorship and Fundraising places each of these concepts at the heart of the Integrated Marketing Communications Mix, alongside cutting edge literature on the topic. Written by two highly experienced industry practitioners, both of which now teach on two of the UK's leading event management degree courses, and supported by a comprehensive set of online resources, this book is an invaluable go-to resource for event management students, tutors and professionals alike.*

*Event Planning and Management Natural Resources and the Environment: Economics, Law, Politics, and Institutions provides a new approach to the study of environmental and natural resource economics. It augments current contributions from the fields of public choice, law, and economics, and the burgeoning field of what used to be called the "New Institutional Economics," to describe, explain, and interpret how these new developments have been applied to better understand the economics of natural resources and the environment. This textbook takes a multi-disciplinary approach, which is essential for understanding complex environmental problems, and examines the issue from not only an economic perspective, but also taking into account law, politics, and institutions. In doing so, it provides students with a realistic understanding of how environmental policy is created and presents a comprehensive examination of real-world environmental policy. The book provides a comprehensive coverage of key issues, including renewable energy, climate change, agriculture, water resources, land conservation, and fisheries, with each chapter accompanied by learning resources, such as recommended further reading, discussion*

*Cambridge IGCSE Business Studies 4th edition The survival and of many products and companies depend upon the marketing strategies adopted by them. In the rapidly changing scenario of markets, when even propaganda and advertisements are unable to do the magic, it is the dedicated marketing professionals who compel the customer to purchase their goods and services. In today's business strategies, production of goods and services are not the end and means of everything. Neither financial or personnel management, nor inventory or time management are important today. It is Sales Management which has the last laugh over every other aspect of the business. Many a time it has been seen that a better quality product or service has given place to an inferior quality product or service only due to superb marketing management. This book is a path-breaking effort and opens up a new dimension in the field of sales management, which is suitable to the present day needs and requirements. It takes into consideration the different academic aspects of Marketing and Sales Management for undergraduate and postgraduate students. This book would be of great help to managerial practitioners at any organizational level who are responsible for a function, department or a set of responsibilities.*

*Groundswell A clear, practical guide to implementing Open Innovation for new product development Open Innovation: New Product Development Essentials from the PDMA is a comprehensive guide to the theory and practice of the Open Innovation method. Written by experts from the Product Development and Management Association, the book packages a collection of Open Innovation tools in a digestible and actionable format. Real-world case studies drawn from the authors' own successes and failures illustrate the concepts presented, providing accurate representation of the opportunities and challenges of Open Innovation implementation. Key tools are presented with a focus on immediate applications for business, allowing NPD professionals to easily discern where this cutting edge development method can push innovation forward. Open Innovation assumes that companies can and should use both internal and external ideas and paths to market,*

*permeating the boundaries between firm and environment. Innovations transfer outward and inward through purchase, licensing, joint ventures, and spin-offs, allowing companies to expand beyond their own research and dramatically improve productivity through collaboration. PDMA Essentials provides practical guidance on exploiting the Open Innovation model to these ends, with clear guidance on all aspects of the new product development process. Topics include: Product platforming and idea competitions Customer immersion and interaction Collaborative product design and development Innovation networks, rewards, and incentives Many practitioners charged with innovation have only a vague understanding of the specific tools available for Open Innovation, and how they might be applied. As the marketplace shifts dramatically to keep pace with changing consumer behaviors, remaining relevant increasingly means ramping up innovation processes. PDMA Essentials provides the tools NPD practitioners need to implement a leading innovation method, and drive continued growth.*

*Inside Consumption This timely and important work looks at the collaborative health care model for the delivery of mental health care in a primary care setting. This has become the ideal model for the treatment of comorbid medical and psychiatric or psychological disorders. There is also an increased awareness that pharmacological intervention, the most frequently delivered intervention for psychological disorders, is often of limited effectiveness without concurrent specific psychological intervention. The book includes more than two dozen case studies, co-written by clinical psychologists and primary care physicians. It is essential reading for any psychology practitioner in a clinical setting, as well as for health care administrators.*

*Event Sponsorship and Fundraising Event Planning and Management, second edition, is an ideal resource for those seeking a step by step formula to plan and deliver a successful event. With the vital balance of professional experience behind them, the authors teach the next generation of event planners with unrivalled knowledge, ensuring an effective event process from start to finish. This book delivers practical understanding of the theory and practice needed to activate each stage of planning, from initial venue selection, budgeting and programme content, to managing stakeholders and sponsors, promotion, risk assessment, safety and post-event evaluation. Fully revised, the second edition of Event Planning and Management expands on managing events on the day, and explores the PR and experiential marketing boom for live brand experiences. Including updated real-world case studies from around the globe, it also features an invaluable toolkit of templates, planning checklists and budget sheets. Accompanied by a host of downloadable resources, this book is the ideal end to end resource for both event planning modules and certifications, plus busy marketing and PR professionals facing the new wave of live brand and customer experiences.*

Part one provides a comprehensive overview of the changing nature of*

*innovation in the food and drink industry, acknowledging trends and considering the implications and impact of open innovation. Part two then reviews the role of partners and networks in open innovation, with collaboration, co-creation of value with consumers, the effectiveness of cluster organizations and the importance of network knowledge all discussed, before part three goes on to explore the establishment and varied management aspects of open innovation partnerships and networks. Finally, open-innovation tools, processes and managerial frameworks are the focus of part four, with discussion of the development, application and psychology of a range of initiatives. With its distinguished editor and international team of expert contributors, Open innovation in the food and beverage industry is a unique guide to the implementation and management of open innovation for all food industry professionals involved in management, research and product development, as well as academics with an interest in open innovation across all industries. Investigates the challenges and opportunities afforded by the incorporation of open innovation into the food industry Provides a comprehensive overview of the changing nature of innovation in the food and drink industry and reviews the role of partners and networks in open innovation Explores the establishment and varied management aspects of open innovation partnerships and networks and discusses the development, application and psychology of a range of initiatives*

*Advanced Theory and Practice in Sport Marketing "Iconic brands" (ie: Coca-Cola, Volkswagon, Corona) have social lives and cultural significance that go well beyond product benefits and features This book distills the strategies used to create the world's most enduring brands into a new approach called "cultural branding". Brand identity is more critical than ever today, as more and more products compete for attention across an ever-increasing array of channels. This book offers marketers and managers an alternative to conventional branding strategies, which often backfire when companies attempt to create identity brands.*

*Facilities Management and Development for Tourism, Hospitality and Events Much of your company's success in global trade will be determined by how well you manage contracts and agreements for sale or purchase. Mastering the Business of Global Trade: Negotiating Competitive Advantage Contractual Best Practices, Incoterms, and Leveraging Supply Chain Options explains the key elements any international business person must know, but more importantly, it also describes how to use negotiation skills, leveraged options, and Incoterms to extract the maximum benefits from your supply chain. At the end of the day, landed costs determine pricing and profits. As such, the book clearly explains how landed cost modeling works and how you can use these business models to leverage supply chain options. Illustrating how Inco terms impact compliance and risk, it details options to help you reduce your exposure to risk as well as best practices to help you steer clear of compliance issues that can cause costly delays. Managing global supply chains is about constantly striving for efficiency, driving down costs, and increasing profits. With this book, you will not only learn how to negotiate better contracts, but you will also learn how to manage relationships with freight forwarders and customhouse brokers in a manner that will help you get the most value from your service agreements. The book establishes a very simple, yet comprehensive, roadmap that both the neophyte and the more experienced global supply chain executive can easily follow and master. By following the time-proven advice and roadmap detailed in these pages, you will learn that it is possible to engage in more deals and increase your returns, while reducing your overall risk exposure. This book is part of The Global Warrior series.*

*Defining Sport In 2002 much of the Front Range of the Rocky Mountains in Colorado was rich in dry vegetation as a result of fire exclusion and the droughty conditions that prevailed in recent years. These dry and heavy fuel loadings were continuous along the South Platte River corridor located between Denver and Colorado Springs on the Front Range. These topographic and fuel conditions combined with a dry and windy weather system centered over eastern Washington to produce ideal burning conditions. The start of the Hayman Fire was timed and located perfectly to take advantage of these conditions resulting in a wildfire run in 1 day of over 60,000 acres and finally impacting over 138,000 acres. The Hayman Fire Case Study, involving more than 60 scientists and professionals from throughout the United States, examined how the fire behaved, the effects of fuel treatments on burn severity, the emissions produced, the ecological (for example, soil, vegetation, animals) effects, the home destruction, postfire rehabilitation activities, and the social and economic issues surrounding the Hayman Fire. The Hayman Fire Case Study revealed much about wildfires and their interactions with both the social and natural environments. As the largest fire in Colorado history it had a profound impact both locally and nationally. The findings of this study will inform both private and public decisions on the management of natural resources and how individuals, communities, and organizations can prepare for wildfire events.*

*Crisis Counsel ""Selfish scientists won't share new findings," ran one headline in The Onion. *Social Media Playbook for Business: Reaching Your Online Community with Twitter, Facebook, LinkedIn, and More This book rocks with practical and perceptive candor, and down-to-earth advice. Any company can improve its new product marketing and financial success batting average by adopting Cal's principles.-PETER KLEIN, Senior Vice President for Strategy and Development, Gillette Company To the point with real examples of how shareholder value can be severely hampered by an undisciplined new product process. A must-read for insiders and outsiders.-RICHARD P. KUNDRAT, Founder, Pepsi-Lipton Partnership Innovation is the lifeblood of American business. Without the creativity to find the next must-have product or service, companies quickly lose their competitive edge. Knowing this, corporate leaders invest heavily in research and development. Notwithstanding the dollars spent on R & D, the fact remains that better than 90 percent of innovation initiatives fail to achieve their return-on-investment targets. Poor management decisions and lack of marketplace savvy often undermine even huge research efforts. Can America continue to be a formidable global competitor with this kind of failure rate? Taking a case history approach, Calvin Hodock examines eight typical innovation blunders that continually doom new product development. From misjudging the market and dead-on-arrival products to fatal frugality and timetable tyranny, he discusses not only why such mistakes occur but also the dire consequences to both investors and employees. When Polaroid declared bankruptcy, because it missed the digital imaging trend, the company's employees lost their retirement and pension benefits. Now the failure of the American automobile industry to create gotta have cars threatens to wreak long-term havoc in a large segment of American workers. Among the problems Hodock points to are breakdowns in the marketing research process, marketing dishonesty, lack of real-world preparation among newly graduated MBAs, CEOs under pressure to deliver unrealistic earning targets, clueless boards of directors, and the general absence of accountability. After analyzing*

each problem, Hodock emphasizes the lesson learned and concludes with a list of best practices for successful innovation. He shows how even modest improvements in the innovation process can double the bottom line for any company while making their shareholders more prosperous and happier. Custom Nation Rates of childhood obesity are alarmingly high and increasing each year. Studies have shown that obese children are more likely to become obese adults and are likely to suffer with numerous health consequences like coronary heart disease, high blood pressure, and Type II diabetes, among others. Studies also indicate that television viewing and exposure to advertising for food products influences children's attitudes toward, food preferences and food purchase requests for foods with low nutritional value. It is important to better understand the role of media in childhood obesity and to learn how media may be used to address this issue in a positive way. This book focuses on communication and media research that can have an impact on reducing childhood obesity. Emphasis is placed on topics related to how the media communicate health-related messages about food, nutrition and diet that influence childhood obesity. Particular emphasis is on the new media, given the fact that media now have more central roles in socializing today's children and youth than ever before. Advertising and marketing messages reach young consumers through a variety of vehicles – broadcast and cable television, radio, magazines, computers through the Internet, music, cell phones – and in many different venues – homes, schools, child-care settings, grocery stores, shopping malls, theaters, sporting events, and even airports. In addition, given the disparity in obesity rates between children of color and the general population, special attention is given to research on media targeting these populations.

*Epidemiology, Biostatistics, and Preventive Medicine Since the first edition of the book was published there have been several changes in the types of risk individuals, businesses, and governments are being exposed to. Cyber-attacks are more frequent and costly and lone-wolf style terrorist attacks are more common; events not addressed in the first edition. The book continues to provide a resource that leads the reader through a risk assessment and shows them the proper tools to be used at the various steps in the process. This book also provides students studying safety and risk assessment a resource that assists them in understanding the various risk assessment tools and presents readers with a toolbox of techniques that can be used to aid them in analyzing conceptual designs, completed designs, procedures and operational risk. On top of the ten new chapters the new edition also includes expanded case studies and real-life examples; coverage on risk assessment software like SAPPHIRE and RAVEN; and end-of-chapter questions for students with a solutions manual for academic adopters. The approach to the book remains the same and is analogous to a toolkit. The user locates the tool that best fits the risk assessment task they are performing. The chapters of the book progress from the concept of risk, through the simple risk assessment techniques, and into the more complex techniques. In addition to discussing the techniques, this book presents them in a form that the readers can readily adapt to their particular situation. Each chapter, where applicable, presents the technique discussed in that chapter and demonstrates how it is used.*

*Marketing to Gen Z Homemade liquor has played a prominent role in the Appalachian economy for nearly two centuries. The region endured profound transformations during the extreme prohibition movements of the nineteenth century, when the manufacturing and sale of alcohol -- an integral part of daily life for many Appalachians -- was banned. In Moonshiners and Prohibitionists: The Battle over Alcohol in Southern Appalachia, Bruce E. Stewart chronicles the social tensions that accompanied the region's early transition from a rural to an urban-industrial economy. Stewart analyzes the dynamic relationship of the bootleggers and opponents of liquor sales in western North Carolina, as well as conflict driven by social and economic development that manifested in political discord. Stewart also explores the life of the moonshiner and the many myths that developed around hillbilly stereotypes. A welcome addition to the New Directions in Southern History series, Moonshiners and Prohibitionists addresses major economic, social, and cultural questions that are essential to the understanding of Appalachian history.*

*Open Innovation You've only just begun to understand Millennials and know how to market most effectively to them. However, their successors are already right around the corner and promising even bigger challenges for the marketplace. But with bigger challenges come great opportunities, and Marketing to Gen Z wants to help you get ahead of the game when it comes to understanding and reaching this next generation of buyers. Having internalized the lessons of the Great Recession, Generation Z blends the pragmatism and work ethic of older generations with the high ideals and digital prowess of youth. For brands, reaching this mobile-first and socially conscious cohort requires real change, not just tweaks to the Millennial plan. Businesses will have to learn how to:*

- Get past the 8-second filter*
- Avoid blatant advertising and tap influencer marketing*
- Understand their language and off-beat humor*
- Offer the shopping experiences they expect*

*Marketing to Gen Z dives into and explains all this and much more, so that businesses may most effectively connect and converse with the emerging generation that is expected to comprise 40 percent of all consumers by 2020. The time to learn who they are and what they want is NOW.*

*Advances in Communication Research to Reduce Childhood Obesity Defining Sport: Conceptions and Borderlines is not about the variations of usage of the term "sport." It is about the concept, the range of activities in the world that we unite into one idea—sport. It is through the project of defining sport that we can come to understand these activities better, how they are similar or different, and how they relate to other human endeavors. This definitional inquiry, and the deeper appreciation and apprehension of sport that follows, is the core of this volume. Part I examines several of the standard and influential approaches to defining sport. Part II uses these approaches to examine various challenging borderline cases. These chapters examine the interplay of the borderline cases with the definition and provide a more thorough and clearer understanding of both the definition and the given cases. This work is not meant to be the definitive or exhaustive account of sport. It is meant to inspire further thought and debate on just what sport is; how it relates to other activities and human endeavors; and what we can learn about ourselves through the study of sport. This book will be of interest to scholars in philosophy of sport, history, communications, sociology, psychology, sports management, cultural studies, and physical education.*

*Natural Resources and the Environment Following on from The Why of Consumption, this book examines motivational factors in diverse consumption behaviours. In a world where consumption has become the defining phenomenon of human life and society, it addresses the effects of critical life events on consumption motives, and the sociological and intergenerational influences on consumer motives and preferences. Its cross-disciplinary approach brings together some of the leading scholars from diverse subject areas to examine the central question about consumption: 'why?'. This is a unique and invaluable contribution to the area, and an essential asset for all those involved in researching, teaching or studying consumption and consumer behaviour.*
