Home to immigrants from more than 140 countries speaking over 180 languages, Los Angeles is a microcosm of the world. While Los Angeles' ethnic enclaves have been the subject of study by researchers from a wide range of fields, these enclaves remain under-researched from a linguistic standpoint. Multilingual La La Land addresses the sociolinguistic landscape of the Greater Los Angeles (GLA) area, providing in-depth accounts of the sixteen most spoken languages other than English in the region. Each chapter introduces the history of the language in the L.A. region, uses census figures and residential densities to examine location-based and network-based speech communities, and discusses the patterns of usage that characterize the language, including motivations to maintain the language. How these patterns and trends bear on the vitality of each language is a central consideration of this book.

How our colleges and universities can respond to the changing hopes and needs of society
In recent decades, cognitive psychologists have cast new light on human development and given colleges new possibilities for helping students acquire skills and qualities that will enhance their lives and increase their contributions to society. In this landmark book, Derek Bok explores how colleges can reap the benefits of these discoveries and create a more robust undergraduate curriculum for the twenty-first century. Prior to this century, most psychologists thought that creativity, empathy, resilience, conscientiousness, and most personality traits were largely fixed by early childhood. What researchers have now discovered is that virtually all of these qualities continue to change through early adulthood and often well beyond. Such findings suggest that educators may be able to do much more than was previously thought possible to teach students to develop these important characteristics and thereby enable them to flourish in later life. How prepared are educators to cultivate these qualities of mind and behavior? What do they need to learn to capitalize on the possibilities? Will college faculties embrace these opportunities and make the necessary changes in their curricula and teaching methods? What can be done to hasten the process of innovation and application? In providing answers to these questions, Bok identifies the hurdles to institutional change, proposes sensible reforms, and demonstrates how our colleges can help students lead more successful, productive, and meaningful lives.

Teen Spirit offers a novel and provocative perspective on how we came to be living in an age of political immaturity and social turmoil. Award-winning author Paul Howe argues it's because a teenage mentality has slowly gripped the adult world. Howe contends that many features of how we live today—some regrettable, others beneficial—can be traced to the emergence of a more defined adolescent stage of life in the early twentieth century, when young people started spending their formative, developmental years with peers, particularly in formal school settings. He shows how adolescent qualities have slowly seeped upward, where they have gradually reshaped the norms and habits of adulthood. The effects over the long

haul, Howe contends, have been profound, in both the private realm and in the public arena of political, economic, and social interaction. Our teenage traits remain part of us as we move into adulthood, so much so that some now need instruction manuals for adulting. Teen Spirit challenges our assumptions about the boundaries between adolescence and adulthood. Yet despite a cultural system that seems to be built on the ethos of Generation Me, it's not all bad. In fact, there has been an equally impressive rise in creativity, diversity, and tolerance within society: all traits stemming from core components of the adolescent character. Howe's bold and suggestive approach to analyzing the teen in all of us helps make sense of the impulsivity driving society and encourages us to think anew about civic reengagement.

Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? Between the World and Me is Ta-Nehisi Coates's attempt to answer these

questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bracingly confronts our present, and offers a transcendent vision for a way forward.

Peterson's Two-Year Colleges 2013 includes information on more than 1,800 accredited two-year undergraduate institutions in the United States and Canada, as well as some international schools. It also includes detailed two-page descriptions written by admissions personnel. College-bound students and their parents can research two-year colleges, including community colleges, for information on campus setting, enrollment, majors, expenses, student-faculty ratio, application deadline, and contact information. In addition, *Two-Year Colleges* offers articles that cover tips on transferring, advice for adults returning to school, "green" programs at community colleges, the basics of financial aid, and much more. Up-to-date, informative data profiles for more than 1,800 institutions, listed alphabetically by state (and followed by other countries) with facts and figures on majors, academic programs, student life, standardized tests, financial aid, and applying and contact information. Helpful articles on what you need to know about two-year colleges: advice on transferring and returning to school for adult students; how to survive standardized tests; what international students need to know about admission to U.S. colleges; and how to manage paying for college. The latest on exciting, innovative "green" programs at community colleges throughout the United States. State-by-state summary table allows comparison of institutions by a variety of characteristics, including enrollment, application requirements, types of financial aid available, and numbers of sports and majors offered.

These days, it's a rare person who hasn't heard of the Internet, the global network based on the TCP/IP networking protocols. The Internet offers worldwide services such as electronic mail, Usenet news, file transfer via FTP, remote login to thousands of databases and collections of data, and innovative search services like WAIS, Gopher, and the World Wide Web. Unlike other networks, though, the Internet is not managed by a single organization, with a single access point and a single set of rules. It is truly a "network of networks" made up of hundreds of cooperating organizations. This is the only up-to-date directory that charts the networks that make up the Internet, provides contact names and addresses, and describes the services each network provides. It includes all of the major Internet-based networks, as well as various commercial networks such as CompuServe, Delphi, and America Online that are "gatewayed" to the Internet for transfer of electronic mail and other services. If you want to connect to the Internet or are already connected but want concise, up-to-date information on many of the world's networks, check out this book. Topics covered include: An introduction to email for beginners. For over 190 major networks: a description of the network, the services it provides, and the format of the email addresses needed to reach users on that network. Index to networks by network name, country or area name, and country code. Index to second and third level domains and many sites within each network. This is the fourth edition of this directory, now in a simplified format designed to allow more frequent updates.
