Introduction to Prakrit

Sociology of Literature In April of 1846, Sarah Graves was twenty-one and in love with a young man who played the violin. But she was torn. Her mother, father, and eight siblings were about to disappear over the western horizon forever, bound for California. Sarah could not bear to see them go out of her life, and so days before the planned departure she married the young man with the violin, and the two of them threw their lot in with the rest of Sarah's family. On April 12, they rolled out of the yard of their homestead in three ox-drawn wagons. Seven months later, after joining a party of emigrants led by George Donner, Sarah and her family arrived at Truckee Lake in the Sierra Nevada Mountains just as the first heavy snows of the season closed the pass ahead of them. After a series of desperate attempts to cross the mountains, the party improvised cabins and slaughtered what remained of their emaciated livestock. By early December they were beginning to starve. Sarah's father, a Vermonter, was the only member of the party familiar with snowshoes. Under his instruction, fifteen sets of snowshoes were hastily constructed from oxbows and rawhide, and on December 15, Sarah and fourteen other relatively young, healthy people set out for California on foot, hoping to get relief for the others. Over the next thirty-two days they endured almost unfathomable hardships and horrors. In this gripping narrative, Daniel James Brown takes the reader along on every painful footstep of Sarah's journey. Along the way, he weaves into the story revealing insights garnered from a variety of modern scientific perspectives—psychology, physiology, forensics, and archaeology—producing a tale that is not only spell-binding but richly informative.

The Moment of Truth Prakrit has a vast literature but it had no systematic comprehensive grammar. Scholars

like Vararuci, Hemaçandra, Trivikrama, Markandeya, Laksmidhara, Krsna Pandit, Ramasarana Tarkavagisa had indeed their own grammars but they differed immensely in respect of their contents. Lassen was the first who tried to systematize Prakrit grammar but he wrote in Latin. Then came Pischel who analysed not only the extant grammars but studied minutely the whole of extant Prakrit literature and collected first hand information about this important language.

**The Magic Hour Description:** The literature on Prajnaparamita, vast, deep and vital to an understanding of the Mahayana. It has so far been neglected by the European scholars. With the aim of facilitating the study, the author has set out a certain amount of information about it. Thus this handbook records for the use of scholars the very limited knowledge acquired during the last century.

**Maññdalas and Yantras in the Hindu Traditions** The grammar presents a full description of Pali, the language used in the Theravada Buddhist canon, which is still alive in Ceylon and South-East Asia. The development of its phonological and morphological systems is traced in detail from Old Indic. Comprehensive references to comparable features and phenomena from other Middle Indic languages mean that this grammar can also be used to study the literature of Jainism.

**Jakarta Undercover INSTANT NEW YORK TIMES BESTSELLER** "One of the most important books I've ever read-an indispensable guide to thinking clearly about the world." - Bill Gates "Hans Rosling tells the story of 'the secret silent miracle of human progress' as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly." -Melinda Gates "Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President Barack Obama **Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts.** When asked simple questions about global trends-what percentage of the world's population live in poverty; why the world's population is increasing; how many girls finish school-we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective-from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don't know what we don't know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn't mean there aren't real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- "This book is my last battle in my life-long mission to fight devastating ignorance. Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I hope this book will be." Hans Rosling, February 2017.

**Pali Learning Through Life** is the definitive report into the future for lifelong learning in the UK. Essential reading for everyone with a personal or professional interest in the social and economic trends shaping tomorrow's world, it provides a comprehensive vision for the future of lifelong learning. For government, employers, civil society, the lifelong learning sector, broadcasters, researchers and the international community the report provides unique insights and recommendations guaranteed to generate debate across all areas of social policy. Sponsored by NIACE (the National Institute of Adult Continuing Education) this is the main report from the independent INQUIRY into the Future for Lifelong Learning and presents: the first authoritative and coherent strategic framework for lifelong learning in the UK for the next 10-15 years; an overview of the current state of learning in the UK; and radical recommendations for long-term change. **Support for Learning Through Life:** "Learning Through Life is a wonderful contribution to the scholarly and policy literature on life-long learning. Not only does it bring together cutting edge thinking about life-long learning from a sociological and human development perspective but also it offers creative policies and programs to make life-long learning a reality. Although it's written for a UK audience, it's applicable to an American audience as well, and I recommend it highly to scholars and policymakers in both the UK and U.S. who care about the future of the capacities of citizens" (Dr Fay Lomax Cook, Director,

Institute for Policy Research, Professor of Human Development & Social Policy, Northwestern University, Illinois). "The strength of this report is the fact that it recognises all of the strands that make up lifelong learning: in the community, in educational institutions, and of course through the workplace. Crucially, it identifies the major changes taking place in our society and the challenges they bring in maintaining functioning communities, and active and effective citizens" (Rt Hon David Blunkett MP).

"Learning Through Life by Tom Schuller and David Watson is a fundamental and convincing report about the necessity to finally take the implementation of Lifelong Learning seriously. The analysis and data in the report helps the reader to understand the limits of our present learning and educational models, based on the principle of learning early on for later life, and the enormous potential in economic, social, cultural, and individual terms of learning through life. The recommendations in the report on how to move forward are based upon the UK situation but they are highly relevant for all OECD countries and many new emerging economies on the global scene. It will be very difficult for the political community during the coming decade to ignore the recommendations in this report" (Jarl Bengtsson, former head of the Centre for Educational Research and Innovation at OECD).
