A Mexican State of Mind: New York City and the New Borderlands of Culture explores the cultural and creative lives of the largely young undocumented Mexican population in New York City since September 11, 2001. Inspired by a dialogue between the landmark works of Paul Gilroy and Gloria Anzaldúa, it develops a new analytic framework, the Atlantic Borderlands, which bridges Mexican diasporic experiences in New York City and the black diaspora, not as a comparison but in recognition that colonialism, interracial and interethnic contact through trade, migration, and slavery are connected via capitalist

economies and technological developments. This book is based on ten years of fieldwork in New York City, with members of a vibrant community of young Mexican migrants who coexist and interact with people from all over the world. It focuses on youth culture including hip hop, graffiti, muralism, labor activism, arts entrepreneurship and collective making.

Provides advice on looking for jobs in the field of restaurant, food service, and hotel management, and provides hundreds of sample cover letters and resumes.

New York City boasts a higher rate of unionization than any other major U.S. city—roughly double the national average—but the city’s unions have suffered steady and relentless decline, especially in the private sector. With higher levels of income inequality than any other large city in the nation, New York today is home to a large and growing precariat—workers with little or no employment security who are often excluded from the basic legal protections that unions struggled for and won in the twentieth century. Community-based organizations and worker centers have developed the most promising approach to organizing the new precariat and to addressing the crisis facing the labor movement. Home to some of the nation’s very first worker centers, New York City today has the single largest concentration of these organizations in the United States, yet until now no one has documented their efforts. New Labor in New York includes thirteen fine-grained case studies of recent campaigns by worker centers and unions, each of which is based on original research and participant observation. Some of the campaigns documented here involve taxi drivers, street vendors, and domestic workers, as well as middle-strata freelancers—all of whom are excluded from basic employment laws. Other cases focus on supermarket, retail, and restaurant workers, who are nominally covered by such laws but who often experience wage theft and other legal violations; still other campaigns are not restricted to a single occupation or industry. This book offers a richly detailed portrait of the new labor movement in New York City, as well as several recent efforts to expand that movement from the local to the national scale.

Everyday, we are bombarded with advertising images of the smiling service worker. The book is written with the aim of focusing beneath the surface of these fairy tale images, to seek out and understand the reality of service workers’ experience. Within the sociology of work and related literatures, there are an increasing number of empirical studies of different types of service work, but there has been little progress in attempts to theorize the nature of service work, per se. This book fills this gap by bringing together major scholars from the US and UK who use a range of critical perspectives to explore key elements in the organization and experience of contemporary service work. It will make an invaluable secondary text for advanced undergraduates and graduates studying courses/modules such as sociology of
