Activiti runs on a JDK higher than or equal to version 7. Go to Oracle Java SE downloads and click on button "Download JDK". There are installation instructions on that page as well. To verify that your installation was successful, run java -version on the command line. ...

As briefly mentioned in Section 1.17, "Alternative Front-Ends", VBoxManage is the command-line interface to Oracle VM VirtualBox. With it, you can completely control Oracle VM VirtualBox from the command line of your host operating system. VBoxManage supports all the features that the graphical user interface gives you access to, but it supports a lot more than that.

The Scope identifies the application security area that is violated, while the Impact describes the negative technical impact that arises if an adversary succeeds in exploiting this weakness. The Likelihood provides information about how likely the specific consequence is expected to be seen relative to the other consequences in the list.
