for Nurses: A Pathophysiologic Approach

Previous edition has subtitle: "a nursing process approach."

Get the perfect blend of pharmacology, prioritization, and nursing process information. As one of the best-selling nursing pharmacology books on the market, Pharmacology and the Nursing Process focuses on the key information you need to safely and effectively administer medications. The 9th Edition features clearly written updated drug content reflecting the latest FDA drug approvals, withdrawals, and therapeutic uses. Hundreds of full-color illustrations detail how drugs work in the body and depict key steps in administration. As in previous editions, the text includes thoughtful learning strategies, simple language, a wealth of student-friendly features and innovative learning aids, and QSEN callouts. Along with its integrated NCLEX® preparation and instructor resources, you won't find a more complete pharmacology text on the market! Focus on need-to-know content uses a "key drug" approach to help you focus on the most important information. Focus on the nursing process helps you learn to prioritize nursing care to focus on the most essential assessments, nursing diagnoses, interventions, and evaluation/outcome criteria. Focus on prioritization includes prioritized nursing diagnoses along with corresponding prioritization of goals and outcomes, to help you learn to connect nursing diagnoses to goals and outcomes. Additional QSEN coverage incorporates more QSEN information throughout the text. Applicable QSEN competencies added to text case study titles Collaboration and teamwork content added to selected case studies Addition of new Safety: What Went Wrong? case studies Explanation of QSEN initiatives as it relates to safety and quality of patient care is included in the Medication Errors chapter Improved readability is aided by more friendly, direct-address language; shorter sentences; simplified language (where appropriate); and much more. An extensive Photo Atlas of Drug Administration features more than 100 step-by-step illustrations depicting key steps in drug administration for various routes of drug administration. UNIQUE! QSEN focus highlights those aspects of the book - such as boxes, tips, case studies, and other content - that correlate with the QSEN competencies. Popular key drug approach focuses on the need-to-know content for safe clinical practice and uses a streamlined approach to drug indications, emphasizing only the most common or serious adverse effects. Integrated NCLEX® Examination preparation includes seven NCLEX Examination review questions in every chapter, with at least one alternate-format item per chapter. Thorough application of the nursing process is addressed in each chapter to help you learn how to prioritize nursing care to focus on the most essential assessments, nursing diagnoses, interventions, and evaluation/outcome criteria. Colorful and consistent learner-friendly format utilizes a variety of tables and practical body systems organization to help you integrate pharmacology content with what you are learning in medical-surgical and adult health nursing courses. Large collection of student-friendly learning aids includes approachable text elements such as: Cartoon-illustrated learning strategies covering study,

The fully revised and updated edition of this essential pharmacology textbook presents pharmacologic principles in an accessible, full-color format. Featuring Prototype Drug Charts, Nursing Process Charts, and an extensive math/dosage calculations section, this fourth edition includes updated content throughout, including 75 new full-color drug labels. It also includes six new chapters, new Herb Alert boxes, and an expanded ancillary package. Nursing Process Charts relate nursing care to drug therapy. For each step of the nursing process, concise bulleted points outline the plan of care in relation to treatment for selected drug prototypes. A drug calculations chapter, with an 85-page review of dosage calculations, covers a basic math review, all four methods of calculating dosages, and dosage calculations in various settings and for different routes of administration. A comprehensive guide to medication administration addresses all routes of administration in various settings. Unit openers for drug therapy chapters include illustrated anatomy and physiology overviews and provide a foundation for understanding how each drug works in that body system. Nearly 100 Prototype Drug Charts are included for selected prototype drugs. Each chart lists Drug Class, Dosage, Contraindications, Drug-Lab-Food Interactions, Pharmacokinetics, Pharmacodynamics, Therapeutic Effects/Uses, and Adverse Reactions. Client Teaching sections in each Nursing Process Chart provide client-oriented instructions. Cultural Considerations are covered in a separate chapter and, where appropriate, culturally sensitive client teaching is included in the Nursing Process Charts. Critical Thinking in Action boxes present a clinical scenario and questions for analysis and critical thinking. Study questions appear at the end of every chapter. Includes 75 new full-color drug labels to familiarize students with new medications used in practice. Features an expanded emphasis on herbal therapies, including new Herb Alert boxes and herbal interaction icons throughout the drug families chapters. Coverage of dimensional analysis has been added to the chapter on Medication and Calculations. Features six new chapters: Pediatric Pharmacology, Geriatric Pharmacology, Antipsychotics and Anxiolytics, Antidepressants and Mood Stabilizers, Drugs for the Female Reproductive Cycle I: Pregnancy and Preterm Labor, and Drugs for the Female Reproductive Cycle II: Labor and Delivery. Each method of dosage calculation is consistently highlighted with a distinctive color for easy reference and identification. Full-color Prototype Drug Charts and Nursing Process Charts have been redesigned for easy use.

process. Introductory units acquaint you with the basic principles of pharmacology and medication administration, while subsequent body-system units prepare you to apply the nursing process to every major disorder. Clear guidelines cover safe drug handling, the types of drugs used for disorders or to affect body systems, injection and enteral administration, and patient education. From a respected author team, this full-color text also provides an excellent review for the pharmacology questions on the NCLEX® examination. Medication safety is underscored through Medication Safety Alerts and Clinical Pitfall boxes, as well as Do-Not-Confuse and High Alert icons. Unit on medication administration clearly and visually outlines assessment, techniques, procedures, and documentation for safe administration of percutaneous, enteral, and parenteral drugs. Application of the nursing process offers an overview of general principles of nursing care for each disorder as well as specific nursing considerations for the drug treatment. Lifespan Considerations boxes for children and for older adults draw attention to information that would be especially important when giving a specific drug to patients of those age groups. Drug tables clearly outline generic and brand names, availability, and dosage ranges for key medications for each disorder. Clinical Goldmine boxes focus on best practices in the clinical setting. Get Ready for the NCLEX® Examination! section at the end of each chapter covers key points from the chapter as well as review questions to help prepare for course assessments and the NCLEX Examination. Video clips on medication administration procedures provide a visual reference for safe medication administration. Key terms with phonetic pronunciations and text page references are listed at the beginning of each chapter. NEW! Chapter on Neurodegenerative Disorders covers drugs for dementia and Alzheimer's Disease. NEW! Updated guidelines on diabetes, heart failure, asthma, COPD, and cancer ensure readers are versed in the latest treatment protocols. NEW! Accurate and up-to-date coverage includes the most recent FDA approvals, withdrawals, therapeutic uses, and content on cultural considerations related to each drug class.

Get the solid foundation you need to pass the NCLEX-PN® exam and succeed in practice! deWit's Medical-Surgical Nursing: Concepts and Practice, 4th Edition builds on the fundamentals of nursing with complete coverage of adult medical-surgical conditions, including roles, settings, health care trends, and all body systems and their disorders. It provides special attention to care of older adults, those with chronic illnesses, and residents in long-term care settings. Written by nursing educator Holly Stromberg, deWit's Medical-Surgical Nursing makes exam prep easier with NCLEX-PN® review questions, and reflects national LPN/LVN standards with an emphasis on evidence-based practice and patient safety.

This concise, user-friendly text/study guide/CD-ROM package is designed to present students with a streamlined view of contemporary nursing pharmacology. Ideal when used as a companion to a handbook of current drug information, the text reviews previously-learned

knowledge of physiology and pathophysiology and integrates it with the fundamentals of pharmacology to help readers understand and retain need-to-know information about each group of drugs discussed. A combination of line art, graphics, and comparative tables makes complex concepts easy to visualize and understand. A Study Guide is included at the back of the text. The CD-ROM, containing more than 700 drug monographs, is a reliable source for specific drug detail, as well as hyperlinks to relevant websites.

Archaeology of Urban America: The Search for Pattern and Process is composed of three parts, namely, Strategies and Methods; Site Formation, Structure, and Pattern; and Artifact Analysis and Interpretation. The Strategies and Methods section centers on the general questions asked by urban archaeologists, as well as on the ways they design their research to elucidate those questions. The Site Formation, Structure, and Pattern section is generally comprised of chapters classified as ""test cases"" emphasizing the approaches, interpretation, and even direct extension of larger research designs. Lastly, the Artifact Analysis and Interpretation section deals with intersite and intrasite patterning of artifact assemblages, as well as with specific class of artifacts. This material will help stimulate a dialogue among archaeologists who have chosen the American city as their subject. This book will also be useful to urban sociologists, economists, cultural anthropologists, and historians.

This student study guide contains a variety of exercises specifically designed to reinforce content presented in the textbook. Chapter worksheets feature more than 1,800 study questions, 160 drug calculation and dosage problems, and case-based critical thinking exercises. Like the Kee text, the study guide features a strong nursing focus and comprehensive coverage of drug dosage calculations, including numerous sample drug labels. Over 1,800 study questions reinforce textbook concepts and prepare you for the NCLEX® examination. An extensive section of drug calculation problems helps you master important dosage calculation methods. Case-based critical thinking exercises enhance your understanding of nursing responsibilities in drug therapy. Sample drug labels familiarize you with the labels you will encounter in clinical practice. A basic math review appendix provides a helpful review of key mathematics concepts. Answers for all exercises are included to facilitate self-study. Thoroughly updated content corresponds to the Kee text, including a new chapter on medication safety. Additional NCLEX® examination-style review questions reflect an increased focus on alternate item-format questions. Approximately 100 new prioritization activities provide practice in identifying key nursing actions.
