*Introducing Comparative Politics: The Essentials is organized thematically around the essential questions in comparative politics—Who rules? What explains political behavior? Where and why? Adapted from the authors' *Introducing Comparative Politics, Fourth Edition*, *The Essentials* version offers the same framework for understanding comparative politics in a briefer format. Instructors have greater flexibility in teaching the course because this version of Stephen Orvis and Carol Ann Drogus' best-seller does not include extended case studies. Loaded with contemporary examples and up-to-date research, this streamlined text helps students engage with the critical issues shaping global politics today. **KEY FEATURES:** Chapter-opening key questions help you focus on the key issues as you are reading. The chapters sometimes provide conclusive answers to the key questions, but more often they show you different ways the questions can be answered*

or approached. Multiple "In Context" features in every chapter illustrate basic data about the chapter topics so you can set that idea into a comparative (and sometimes provocative) context. Critical Inquiry features highlight methodological issues in comparative politics, providing a gateway for empirical study and analysis. More than a hundred full color tables, figures, and maps help you visualize comparative data and better understand concepts. End-of-chapter lists of key concepts with page references are included to help you easily study and review the concepts, and a list of works cited and list of important print and electronic references offer you resources for further research.

It's tough to keep students afloat in a sea of detail when moving from country to country in a comparative course. While it's important to give students a sense of place, lengthy textbooks can overwhelm them with far too much description. Students are left with no clear path for understanding regional context or for making meaningful cross-national comparisons, and little sense of larger concepts and themes. The Politics of Governing: A Comparative Introduction answers this dilemma in a truly brief text—only 320 pages long—that frames country case studies within regional chapters. This approach equips students to see the bigger picture and understand how the issues of governing can no longer be separated from events outside a country's borders. The authors answer the same set of questions in each chapter—What are the purposes of government (the ends of politics)? What do governments do (the functions of politics)? Who exercises political power (the processes of politics)?—giving this concise text strong analysis of particular countries within a powerful regional framework. The book incorporates the American experience as a familiar touch point for students and examines those areas of the world in which the U.S. is most engaged: The European chapters highlight the development of supranational institutions and their impact on politics in Great Britain, France, and Germany. These stand in contrast to the transitional politics underway to the east with Central Europe's new democracies and the upheavals in Russia, the Ukraine, and the Balkan states keeping those countries at the margins of this new Europe. The diversity of Asian governments is explored within the context of competing forces between markets and democracy, at the core of which stands mainland China. The forces of religion and culture across the Muslim world shape the chapter that encompasses North Africa, the Middle East, and Southeast Asia, with country case studies focused on Morocco, Iran, and Indonesia. The chapter on Latin America highlights the draw of North American markets and the appeal of distinctive political and economic patterns in South America, with case studies on Mexico and Brazil. A final chapter on regional convergence examines both developing countries and competing supranational markets to understand how people in countries caught in between larger, competing regional trading blocs are affected. When are legislators inclined to cast votes in cooperation with their parties, and when do they go their own way? When and why do nations contend with each other, and when are they more likely to cooperate? Thematically arranged around the interplay of contention and cooperation, A Comparative Introduction to Political Science encourages students to explore causal factors and consequences related to political phenomena to become knowledgeable and resourceful citizens of their nations and the world. Alan Smith covers how patterns of contention and cooperation—and the resulting government policies—may be affected by such factors as the surrounding political framework, the distribution of influence, and political motivation, including values as well as material interests. To expose students to the politics of specific nations, each chapter concludes with two country case studies that illuminate the theme of the chapter. Students emerge with a sense of what is going on in the world today. Pedagogically, the book employs careful sequencing of topics and concepts for clarity and to introduce politics in a natural, logical, synchronized way. At times Smith goes beyond sharp, night-and-day terminological distinctions to add accessible, ordinary language-based terminology that better captures the real-world spectrum between the extremes. comparative international perspective. Offering a wide-ranging account of the development of the subject and its dissemination across national borders and cultural divides, the book begins with a study of the historiography of the discipline in the United States, a country which has been at the forefront of the field. Widening its discussion to emphasise Western Europe as a focus for comparison, the contributors provide studies of further areas of interest such as China and Africa. This particular approach emphasises the book's vision of political science as a growing transnational body of knowledge. In presenting critical analysis of the state of the field, this vigorous study aims to further the development of the discipline in the countries discussed, and to provide a work that is interesting not only to political scientists, but to all those concerned with the development of the social sciences.
