This book introduces readers to some of the most significant advances in core computer science-based technologies. At the dawn of the 4th Industrial Revolution, the field of computer science-based technologies is growing continuously and rapidly, and is developing both in itself and in terms of its applications in many other disciplines. Written by leading experts and consisting of 18 chapters, the book is divided into seven parts: (1) Computer Science-based Technologies in Education, (2) Computer Science-based Technologies in Risk Assessment and Readiness, (3) Computer Science-based Technologies in IoT, Blockchains and Electronic Money, (4) Computer Science-based Technologies in Mobile Computing, (5) Computer Science-based Technologies in Scheduling and Transportation, (6) Computer Science-based Technologies in Medicine and Biology, and (7) Theoretical Advances in Computer Science with Significant Potential Applications in Technology. Featuring an extensive list of bibliographic references at the end of each chapter to help readers probe further into the application areas of interest to them, this book is intended for professors, researchers, scientists, engineers and students in computer science-related disciplines. It is also useful for those from other disciplines wanting to become well versed in some of the latest computer science-based technologies.

Vivemos em um mundo em que cada vez mais encontramos sistemas de automatização ao nosso redor. Já nos acostumamos com controles remotos em televisões, sistemas de home theaters, aparelhos de ar-condicionados, entre outras comodidades. Em casas mais modernas, vemos sistemas de climatização, controle de iluminação personalizado e diferentes sistemas de monitoramento. Mas somente isso não basta; queremos mais. Estamos vivendo um período de Internet das Coisas (IoT) e desejamos ter comunicação e informações nos mais diferentes lugares. Queremos nos comunicar com o que é nosso e não apenas automatizar, mas inserir conforto e inteligência à nossa volta. Diante deste cenário, este livro tenta fazer com que o leitor compreenda a necessidade de utilizar vários sensores e equipamentos para que uma casa automatizada e inteligente seja viável, abordando os requisitos para personalização de ambientes, com requisito de baixo custo, inseridos nos conceitos da IoT.

This book titled *How to Write Effective Teaching Notes & Teach Case Studies Effectively?* can well be considered to complete my authored trilogy on management case studies. My previous two books being *How to Write and Teach Case Studies Effectively?* and *How to Enhance Shelf Life of Case Studies?* This book not just goes a step further or rather couple of steps further into the exact and effective approach to teaching cases but it also details about writing effective teaching notes. Teaching notes go a long way in making teachers understand the efficacy of a case study and its suitability of usage in the context of a particular curriculum. It also offers teachers guidance/suggestion as how to conduct a class on case based teaching.

This textbook is a guide to success during the PhD trajectory. The first part of this book takes the reader through all steps of the PhD trajectory, and the second part contains a unique glossary of terms and explanation relevant for PhD candidates. Written in the accessible language of the PhD Talk blogs, the book contains a great deal of practical advice for carrying out research, and presenting one's work. It includes tips and advice from current and former PhD candidates, thus representing a broad range of opinions. The book includes exercises that help PhD candidates get their work kick-started. It covers all steps of a doctoral journey in STEM: getting started in a program, planning the work, the literature review, the research question, experimental work, writing, presenting, online tools, presenting at one's first conference, writing the first journal paper, writing and defending the thesis, and the career after the PhD. Since a PhD trajectory is a deeply personal journey, this book suggests methods PhD candidates can try out, and teaches them how to figure out for themselves which proposed methods work for them, and how to find their own way of doing things.

A NEW YORK TIMES NOTABLE BOOK OF 2017 From the author of the viral New York Times op-ed column "To Siri with Love" comes a collection of touching, hilarious, and illuminating stories about life with a thirteen-year-old boy with autism that hold insights and revelations for us all. When Judith Newman shared the story of how Apple's electronic personal assistant, Siri, helped Gus, her son who has autism, she received widespread media attention and an outpouring of affection from readers around the world. Basking in the afterglow of media attention, Gus told anyone who would listen, "I'm a movie star." Judith's story of her son and his bond with Siri was an unusual tribute to technology. While many worry that our electronic gadgets are dumbing us down, she revealed how they can give voice to others, including children with autism like Gus—a boy who has trouble looking people in the eye, hops when he's happy, and connects with inanimate objects on an empathetic level. *To Siri with Love* is a collection of funny, poignant, and uplifting stories about living with an extraordinary child who has helped a parent see and experience the world differently. From the charming (Gus weeping with sympathy over the buses that would lie unused while the bus drivers were on strike) to the painful (paying \$22,000 for a behaviorist in Manhattan to teach Gus to use a urinal) to the humorous (Gus's insistence on getting naked during all meals, whether at home or not, because he does not want to get his clothes dirty) to the profound (how an automated "assistant" helped a boy learn how to communicate with the rest of the world), the stories in *To Siri with Love* open our eyes to

Initially, the Center for Disease Control and Prevention said healthy members of the public do not need to put on any form of face mask except for those who are taking care of patients or sick. However, recently, they are advising everyone to wear a facemask before going out in public. They also encouraged people to make their face mask from cloths where they don't have access to commercially made ones. With facemasks no longer easy to find on the shelves, most people are left with an option to make theirs at home to keep themselves and their families safe. Besides making facemasks, this book will give you insight into the following; What to know about facemasks protection Difference between Respirators and FaceMasks What Makes a Good Facemask? Best Storage Practice Types of Facemasks and their level Of Protection Safe ways to Use FacemasksFacemask Filters and How they Work Materials Needed for the Project and so on Scroll up and hit the BUY BUTTON to get started

DIY science projects using old tech to create new zombie tech—an eco-friendly, fantastic way to learn about today's technology. We all have a drawer or closet full of old discarded tech just sitting around, gathering dust. Memories of a bygone technological era that have been replaced by newer, shiner, smarter devices. What can you do with them? Most of us don't even know how to properly dispose of them. If only there was a way to save them from their untimely fate. Well empty out that drawer and grab a screwdriver because the time has come to bring these old devices back from the grave! Old technology may no longer be useful, but it isn't useless. Hidden inside often-discarded devices is a treasure trove of motors, magnets, screens, and other parts just waiting for a chance to be upcycled! And this type of "upcycling" doesn't mean turning an old CD into a coaster, it means something a little more hardcore, like . . . · How to make a great Wi-Fi security camera with an old cell phone · How to make a basic 3D printer out of old computer disk drives · What can be made with the rare-earth magnets inside old hard drives or the reusable LCD screens in old phones · And much more Fans of Popular Science, Smithsonian's Maker Lab, and The Big Book of Makerspace Projects will love Upcycled Technology.
