Sales and marketing work together as an integral part of selling and one cannot be done without the other. The success of any business is crucially tied to the success of these two important activities. Social Media marketing, affiliate marketing, email marketing, search engine marketing and interactive promotions are all distinct aspects of online marketing and we will examine these in more detail in this book. Social media marketing is all about building connections with your audience so that they can see you are authentic and are there to help them. Do this right and you will gain their trust and loyalty and your marketing efforts will be more responsive, making you more sales and profits. This book will show you how to capitalise on the massive audience that is Social Media including Facebook and Instagram. If you want to build a successful online business then this book is an essential weapon in your armoury.

With easy-to-follow tutorials, ready-to-use HTML templates, and loads of working samples, this book meets the needs of both segments in a burgeoning market -- Web developers proficient with HTML but not with television production, and television professionals needing to better understand, envision, and initiate enhanced TV projects. "Interactive TV in Action" describes a variety of design techniques and methods to readily adapt existing broadcast and Web material for interactive television and WebTV "RM". By using Microsoft's WebTV Plus and Web TV for Microsoft "RM" Windows "RM" 98 technologies, and following design standards outlined by the Advanced Television Enhancement Forum Specification (ATVEF), readers learn how to integrate HTML content into television to transform traditionally passive TV viewing into a richer, more engaging, self-directed experience.

A successfully managed project is a carefully planned and organized effort. A critical and essential skill for any art service manager is project management—the ability to

organize resources--labor, budgets, materials-- and handle constraints so that a project's goals are successfully accomplished. Fine Art Movement and Storage: Project Management for the Visual Arts is a practical handbook for developing and managing multi-faceted projects from the project manager's point of view, including estate moves, exhibition planning for preparators, storage setup, planning and maintenance, storage movement and planning, collection relocations, traveling exhibitions, art fairs, and the prioritizing of overlapping projects. It covers complex and advanced project management issues such as: Identifying your stake holders and foreseeing potential stake holder conflicts, Identifying the project's goals and parameters, Outlining goals for initial and follow-up site visits, Guidelines for conducting a site visit, Planning for art and material staging, Estimating and quoting time, labor, and materials, Understanding and estimating hard and soft costs in your budget, Planning for contingencies, Developing budgets and timelines, Scheduling overlapping tasks, Creating daily goal sheets and project punch lists, Training and staffing your crew, Assigning crew leaders, Delegating project responsibilities, Managing quality control and industry standards, Understanding project completion, post completion, and follow up, and Managing multiple projects. Over 50 graphics help to make this a book you'll use every day. Every art institution, art service company and individual that manages projects or anticipates a project will need and want to have access to this book as a resource, as a reference and as a training tool.

Selling Technology

Selling Technology offers a look at high-tech markets from within, through the experience of salespeople, purchasing agents, and engineers who construct markets for emergent technologies through their daily engagement in sales interactions. Although sales occupations comprise 12 percent of the American labor force, sales work has been a neglected area of study. Asaf Darr's ethnographic exploration of the sales process for standard and emergent technology argues that our cultural stereotypes of sales work and salespeople, shaped during the industrial era and through popular images of the Yankee peddler and the car salesman, no longer apply to the changing nature of sales in an information economy. In the high-technology settings in which cutting-edge artifacts are traded, Darr finds that sales work deviates sharply from our traditional cultural images. The educational level and technical skills of the sales force are increasing, sellers' and buyers' engineers engage in co-development, and long-term collaborative relationships are replacing brief sales encounters. A growing number of work tasks and skills previously performed and mastered in the design or production phases have become part of the sale of emergent technology. New control mechanisms over the work of the sales engineers are also appearing. Unlike most ethnographic studies of salespeople, which focus on the insurance, finance, and retail sectors., Darr's groundbreaking book turns to the daily sales practices of an information economy.

This volume was published in honor of Rocco De Nicola's 65th birthday. The Festschrift volume contains 27 papers written by close collaborators and friends of Rocco De Nicola and was presented to Rocco on the 1st of July 2019 during a two-day symposium held in Lucca, Italy. The papers present many research ideas that have been influenced by Rocco's work. They testify his intellectual curiosity, versatility and tireless research activity, and provide an overview of further developments to come. The volume consists of six sections. The first one contains a laudation illustrating the distinguished career and the main scientific contributions by Rocco and a witness of working experiences with Rocco. The remaining five sections comprise scientific papers related to specific research interests of Rocco and are ordered according to his scientific evolution: Observational Semantics; Logics and Types; Coordination Models and Languages; Distributed Systems Modelling; Security.

Sometimes setting pen to paper requires bravery, and writing well means breaking free of the rules learned in school. Liberating and emboldening the beginning writer are the goals of Ted Kooser and Steve Cox in this spirited book of practical wisdom that brings to bear decades of invaluable experience in writing, teaching, editing, and publishing. Unlike ?how to write? books that dwell on the angst and the agony of the trade, Writing Brave and Free is upbeat and accessible. The focus here is the work itself: how to get started and how to keep going, and never is heard a discouraging word such as ?no,? ?not,? or ?never.? Because of the wealth of their experience, the authors can offer the sort of practical publishing advice that novices need and yet rarely find. Organized in brief, user-friendly chapters?on everything from sensory details to a work environment, from creating suspense to revising and taking criticism?the book allows aspiring (and practicing) writers to dip in anywhere and find something of value.
