Luciano Floridi presents an innovative approach to philosophy, conceived as conceptual design. He explores how we make, transform, refine, and improve the objects of our knowledge. His starting point is that reality provides the data, to be understood as constraining affordances, and we transform them into information, like semantic engines. Such transformation or repurposing is not equivalent to portraying, or picturing, or photographing, or photocopying anything. It is more like

cooking: the dish does not represent the ingredients, it uses them to make something else out of them, yet the reality of the dish and its properties hugely depend on the reality and the properties of the ingredients. Models are not representations understood as pictures, but interpretations understood as data elaborations, of systems. Thus, Luciano Floridi articulates and defends the thesis that knowledge is design and philosophy is the ultimate form of conceptual design. Although entirely independent of Floridi's previous books, The Philosophy of Information (OUP 2011) and The Ethics of Information (OUP 2013), The Logic of Information both complements the existing volumes and presents new work on the foundations of the philosophy of information.

Now in its fourth edition, Modern Trial Advocacy: Canada is the first and last word in Canadian trial practice. This classic handbook, published by the National Institute for Trial Advocacy, gives practitioners a detailed road map for conducting a trial. Expanding on the original text written by Steven Lubet for an American audience, experienced Toronto trial lawyers Cynthia Tape and Julie Rosenthal guide the beginning advocate in developing a winning case theory through all phases of trial. They explain

how to present a case as a story - and powerfully and persuasively tell that story to the jury. Modern Trial Advocacy: Canada provides not only Canadian case law and statutes, but also valuable insight into the specific elements of Canadian litigation practice as it presents a realistic and contemporary approach to learning and developing trial advocacy skills. This book offers a sophisticated, theory-driven approach to advocacy training that distinguishes it from other books in the field. The fourth edition has been updated with current citations to case law, statutes, and rules and the latest "best practices" for using technology in the courtroom.
