### ***The Collected Supernatural and Weird Fiction of Richard Marsh***

*The final volume of a unique collection of bizarre tales from a master of the genre Richard Marsh was the pseudonym of British born author Richard Bernard Heldman (1857-1916). His most famous work of supernatural fiction, The Beetle, was published in 1897, the same year as Bram Stoker's tale of the vampire Count Dracula, and it is believed that initially Marsh's book, which also features a bizarre and sinister figure capable of 'shape shifting, ' was even more popular with readers than Stoker's. Today Marsh's book is still widely regarded as a classic of its genre. Although a prolific author who wrote in a number of genres including adventure fiction under his real name, Marsh is principally remembered as a writer of supernatural thrillers and his output in this field was prodigious. Most aficionados of the genre have heard of The Beetle, but this special Leonaur collection of the author's excursions into the other worldly and strange extends to six satisfyingly substantial volumes containing many tales that will be unfamiliar to modern readers. In this final volume readers will find one novel, 'The Magnetic Girl, ' and eighteen short stories of the strange and unusual. Leonaur editions are newly typeset and are not facsimiles; each title is available in softcover and hardback with dustjacket.*

### ***Social Security Works For Everyone!***

*In this book, philosopher Keekok Lee challenges one of the central assumptions of contemporary environmentalism: that if we could reduce or eliminate pollution we could 'save' the planet without unduly disrupting our modern, industrialized societies. Lee argues instead that the process of modernization, with its attendant emphasis on technological innovation, has fundamentally transformed 'nature' into just another manmade 'artefact.' Ultimately, what needs to be determined is if nature has value above and beyond human considerations, whether aesthetic, spiritual, or biological. This provocative book attempts to reconfigure environmental ethics, positing the existence of two separate ontological categories-the 'natural' and the 'artefactual.' Natural entities, be they organisms or inert matter, are 'morally considerable' because they possess the ontological value of independence, whereas artefacts are created by humans expressly to serve their own interests and ends.*

### ***A Metaphysical Interpretation of the Bible***

*This book is written with the sincere conviction that it will convey a message other than the one we have been led to accept about Biblical and other ancient texts. It may change your experience in the way you view life and the concept of God and religion, as well as your relationship with those beliefs. This book is about ancient principles contained in the Bible and many other documents inscribed long ago, such as the Nag Hammadi Library and the Dead Sea Scrolls. Words paint mental pictures that enfold in our minds, and we call this "getting answers." At times, we take these images as the only truth there is, since we can see or imagine it. We base this personally conceived truth on what we learn in life. Should we not ask ourselves: what if all this is based on falsehoods? These mental illustrations - that we call "thoughts" - are founded solely on what we have seen or read. Most of the time, we compare them, and in this fashion, we develop personal beliefs according to our choices. This practice is not specifically reserved for the individual. It spreads throughout our society, when each and every human experiences the same event or feeling, or reads a similar book. As a result, the collective mindset - sometimes called the "over mind" - now generates large-scale belief systems that, in time, we have termed as "religion." Entire nations have been known to bond in the same creed. Even when founded with the best of intentions, these systems tend to bind us as a group, with one mindset going in one direction, while offering no other alternatives. In some respects, this direction may not necessarily be the best or ideal goal toward which we can journey. It does limit us in the centuries-old matter pertaining to God or the God Head, and it affects our individual experience. It also influences what we know about the ancient teachers and prophets of long ago.*

*The end of an era. The earth had succumbed to the environmental disasters and the selfish desires of humankind. Humanity needed to prepare for the future, and the key for achieving that laid in the DNA. While human females had achieved their independence, the future demanded that they had to evolve to the point of becoming containers for the new generations. The goal was clear, the new females should be docile enough to copulate with multiple partners, although maintaining vital aspects such as personality and the ability to feel pleasure. Various experiments were carried out throughout the cosmos. However, only one galaxy was able to create the ideal female, strong, but of a soft and docile appearance. Lux. Her human genes had been mixed with those from Martian flowers, making her a lush, seductive, scarlet-eyed specimen. Lux was to adapt to her new skills and her new duties as First Female, certainly, being the only woman on the ship, she would spend many years of her life on her knees, pleasing anyone who wished to drink the sweet nectar that flowed from among her legs. The ship's captain, who never supported the experiments, finds her naked and vulnerable. Lux cannot help but to be attracted to his latent virility and the coldness he feels toward her. Will Lux's body be able to find its purpose? Or will it succumb to the fantasies of an alienated and misogynist crew?*

### **One to the Wolves**

*In 1992, Lois Duncan, acclaimed author of fictional suspense novels, wrote a horror story she could never have imagined writing—a true account of the murder of her own daughter, Kaitlyn Arquette. Kait, 18, was shot to death as she drove home from a friend’s house on a Sunday evening in Albuquerque, New Mexico. Police closed the unsolved case as a “random shooting,” refusing to accept information that indicated otherwise, although it had all the earmarks of a professional hit. That first book, WHO KILLED MY DAUGHTER?, was Duncan’s desperate attempt to motivate informants and prevent the facts of Kait’s story from becoming buried. It turned out to accomplish much more than that. Duncan’s new book, ONE TO THE WOLVES: ON THE TRAIL OF A KILLER, is even more horrifying than its predecessor as new information poured in, the family ran for their lives, and their original suspicions turned out to be the tip of an iceberg so immense that Kait, herself, could not have known how dangerous the information was that she had been sitting on in order to protect a now-estranged boyfriend. Since Kait didn’t live to reveal it, her mother now does so in a book so intense and yet so painfully human that the reader will never forget it. All of the elements of a suspenseful mystery are here—intrigue, turns and twists, cover-ups, and page-turning action. The sobering fact is that, this time, the story isn’t fiction.*

### **Christmas Coloring Book**

*Social Security expansion is back on the agenda, at a time when Americans need it more than ever—here’s what it should look like (and why it matters to everyday people all over the country) “Altman and Kingson cut through the fog of calculated confusion and outright lies about Social Security.”—David Cay Johnston, Pulitzer Prize-winning journalist and author The COVID-19 crisis has pulled the curtain back on America’s looming retirement income crisis, a fraying of the national community, and ever-worsening income inequality. Never before have so many people’s livelihoods and futures been thrown into flux. Now more than ever, expanding Social Security is essential to addressing these challenges. Social Security Works for Everyone!, an evolution of the argument Nancy J. Altman and Eric R. Kingson made in their acclaimed first book, Social Security Works!, presents the case for expanding Social Security, explaining why monthly benefits need to be increased; why Americans need national paid family leave, sick leave, and long term care protections; and how we can pay for it all. Don’t believe the nearly four-decade, billionaire-funded campaign to convince us that the program is destined to collapse. It isn’t. At a time when growing numbers of Americans are seeing beyond the false choice between financial security for working people and financial security for the federal government, this book eloquently makes the case that universal programs that benefit all Americans (yes, even the rich) make our country stronger and our lives more secure. Social Security works because it embodies the best of American values—the ones that will allow Americans to obtain financial security and weather the next crisis.*

### **Gene Control, Second Edition**

*Nostalgia, identity, eccentricity, gin drinking and occasional violence these are just some of the themes that stand-up comedian Dara O Briain*

*explores in Tickling the English. O Briain moved to England many years ago, but when he takes his show on tour around the country - from deserted seaside towns and remote off-shore islands, to sprawling industrial cities and sleepy suburbs - it's clear to him that his adopted home is still a bit of an enigma. Why do the English pretend to be unhappy all the time? Why can't they accept they rank about 5th, in everything? And what's with all the fudge? But this Irishman loves a challenge; he's certainly got the gregarious personality and the sure-fire wit to bring down the barriers of that famous English reserve, and have a good old rummage inside. Swapping anecdotes with his audiences and spending time wandering in their hometowns, this nosy neighbour holds England up to the light while exploring some of the attitudes he brought over here with him too. As Dara goes door-to-door in search of England in this part tour diary, part travelogue, the result is an affectionate, hilarious and often eye-opening journey through the Sceptred Isle.*
