The Tooth Doctor

The Soul of the Nurse

The nurse is central to healthcare and has always been the most prominent figure in times of vulnerability throughout the life cycle. The Soul of the Nurse uncovers the complexity of the nurse by tracing her origins as far back as Neolithic times. The author explains how, over time, the nurse image has been split into one-dimensional disguises ranging from angelic heroine to sex object. Without moralizing or dividing the good from the bad, this book investigates the dynamic energy of the nurse archetype and uncovers what has been lost through splits,

repressions, and distortions. Mythology, folklore, archeology, and popular culture are explored, while considering history and archetypal psychology, revealing new insights into the vast capacities of the nurse. Through personal and collective stories, The Soul of the Nurse reveals why the nurse captivates the imagination and is the most trusted professional in society.

This Is a Soul

*A moving memoir and an extraordinary love story that shows how an expert physician became a family caregiver and learned why care is so central to all our lives and yet is at risk in today's world. When Dr. Arthur Kleinman, an eminent Harvard psychiatrist and social anthropologist, began caring for his wife, Joan, after she was diagnosed with early-onset Alzheimer's disease, he found just how far the act of caregiving extended beyond the boundaries of medicine. In *The Soul of Care: The Moral Education of a Husband and a Doctor*, Kleinman delivers a deeply human and inspiring story of his life in medicine and his marriage to Joan, and he describes the practical, emotional and moral aspects of caretaking. He also writes about the problems our society faces as medical technology advances and the cost of health care soars but caring for patients no longer seems important. Caregiving is long, hard, unglamorous work--at moments joyous, more often tedious, sometimes agonizing, but it is always rich in meaning. In the face of our current political indifference and the challenge to the health care system, he emphasizes how we must ask uncomfortable questions of ourselves, and of our doctors. To give care, to be "present" for someone who needs us, and to feel and show kindness are deep emotional and moral experiences, enactments of our core values. The practice of caregiving teaches us what is most important in life, and reveals the very heart of what it is to be human.*

The Book of the Animals - Episode 6 (Bilingual English-Spanish)

*Newly reissued in trade paperback, from the author of the bestselling *Man's Search for Meaning*--the classic book in which he first laid out his revolutionary theory of logotherapy. Dr. Viktor E. Frankl is celebrated as the founder of*

logotherapy, a revolutionary mode of psychotherapy based on the essential human need to search for meaning in life. Even while suffering the degradation and misery of Nazi concentration camps--an experience he described in his bestselling memoir, Man's Search for Meaning--Frankl retained his belief that the most important freedom is the ability to determine one's spiritual well-being. After his liberation, he published The Doctor and the Soul, the first book in which he explained his method and his conviction that the fundamental human motivation is neither sex (as in Freud) nor the need to be appreciated by society (as in Adler), but the desire to live a purposeful life. Frankl's work represented a major contribution to the field of psychotherapy, and The Doctor and the Soul is essential to understanding it.

On My Own Country

When someone in a child's life goes through a personal hardship, parenting is put to a test. Finding the the right words to answer difficult questions can be a challenge. This is a story of a hardship of mine that I explained to a child, gently teaching him in the process, some important lessons about faith, pride, hope, justice and love. This fairy-tale flavored story involves a trip to the County jail, and will help a child understand a situation like this better when the same happens to someone in his or her life. Every child needs to understand the pitfalls of pre-judging people, and missing out on what they can offer you to make your journey in life better. Every child needs to understand the importance of perseverance through the dark times in life and of holding your head up high when times get tough. And finally, every child needs to believe that everything will be okay

At last, science and the soul shake hands. Writing in a style that is both lucid and charming, mischievous and profound, Dr. Amit Goswami uses the language and concepts of quantum physics to explore and scientifically prove metaphysical theories of reincarnation and immortality. In Physics of the Soul, Goswami helps readers understand the perplexities of the quantum physics model of reality and the perennial beliefs of spiritual and

religious traditions. He shows how they are not only compatible but also provide essential support for each other. The result is a deeply broadened, exciting, and enriched worldview that integrates mind and spirit into science. Includes a new preface.

The Undying Soul

Vicky is desperate to make her mark, in a world which just doesn't seem to notice her. Silence and smiles hide the pain that Nell is keeping to herself. Sarah's dreams of having a family seem hopeless. And then there's Shannon, who's in trouble at school yet again. But what these four women don't know is that someone - or something - is watching them. A much-recycled soul, suspended between one life and the next, realises that Vicky, Nell, Sarah and Shannon are embarking on their journey towards Motherhood. As memories from past incarnations return to this Soul, it becomes clear that one of these women will be chosen to guide it once more. Soul to take explores what it is to become a parent and considers the possibility that actually, our children are the ones who carefully select us.

Bad Karma

Where am I? I am lost. Suddenly I hear the Voice, I see the Light. In the deepest throes of confusion and heartache comes the Light that reunites one with the universe. From the death of a loved one emerges a newfound acceptance and the ultimate freedom of the soul. In a swirl of injustice and hypocrisy, the soul valiantly fights back. These healing lessons and many more are the topics of The Battle and Victory of the Soul, South African poet Nozipho Zubane's inspiring and mystical collection that draws from her own painful experiences and spiritual growth. Anyone who is seeking words of comfort and encouragement to turn their own lives around will find much solace and support in these thought-provoking, healing meditations. Written for seekers of all ages and walks of life, this stirring collection represents an authentic and true expression of the raw emotions Nozipho confronted when she found herself at a crucial crossroads in her own life. After resolving to remove herself from the toxic corporate environment in which she existed, the poet embarked on a course to search for greater purpose and meaning. After two years with no job and an empty savings account, she was driven to live as a recluse. It was then that she underwent the deep emotional cleansing that transformed her life. Initially longing for intellectual stimulation, human contact, and material comfort, she endured many dark nights of the soul, to ultimately be saved by the grace of God. Whether gently illustrating the redemptive power of the soul or reconsidering the complexity of love, each poem furthers the book's abiding goal to help other people heal their wounds in order to reach their full potential. With its fresh perspective and all-embracing approach, The Battle and Victory of the Soul is certain to offer individuals a lifeline to reconnect with their souls in new and restorative ways. It's a spiritual wealth of hope and healing that may just bring new light to the darkest days.

My Soul Cries Out Loud

Have you ever just wondered about life? What is Life? Is there God? How do we fit into the universe? What is our relationship with other living things? What does it mean to be human? Doctor Ergo provides you with a firm background and vantage point from which to view those questions. You will gain a comprehensive perspective on Life and the human condition - from the Big Bang, through Life history on this planet, to the current condition of our human mind and species, and some solid thoughts on what Life is. This is a Story of Life. In a Darwinian world, our mental capacity has enabled us to ascend to the pinnacle of the survival pyramid. Therefore, the essence of the story about our species centers on our mind. Our cognitive skills are built upon the neural architectures that originally developed for vision and for speech/hearing. We can be aware of the 2 sides of our mind through introspection of our own consciousness: Vision based - non-verbal emotions, feelings and intuitions coming from our vision-based cognition in our Right Brain. Speech based - words, thoughts, and reasoning coming from our speech-based cognition in our Left Brain. Vision developed quickly in the Cambrian Period (570 million years ago) when the earliest animals with body forms emerged. Vision enabled the animal to see the "world," and gave the animal a sense of "self," i.e. that which was viewing the world. Consequently the concepts of "world" and "self" are deeply embedded in the cognition that developed from the vision neurological architecture. Likewise, Darwinian survival necessitated identification of same-species animals (for protection and reproduction); hence the concept of "group" is also deeply embedded in the vision-based neurology. Our speech-based left brain has no equal anywhere else in Life on this planet. This is what has made possible the major

advances of the human mind, separated us from the animals, and enabled us to conquer the planet. This Sensory Mind model clarifies Plato's writings and the psychological models that were developed by Sigmund Freud and Carl Jung. The personality types tested by Myers-Briggs, which are based on the theories of Carl Jung, are consistent with the Sensory Mind. Major trends in human history have been about the growth of our collective left brain in the governance of human affairs and its interplay with our vision-based (non-verbal) right mind. Our human "advances" have largely resulted from development of our speech-based mind, but the essence and truth of life comes to us from our vision-based mind. Our earliest groupings and civilizations were largely governed by vision-based animal grouping models. These have evolved into newer civilizations and human groupings that include participation and/or leadership of our left brain "group-think." We are very familiar with the concept of Darwinian survival and its role in the evolution of Life. However, Darwinian survival is simply the strategy or tactic that governs the advancement of Life. What is it that drives Life to engage in the Darwinian struggle for survival? There IS a Life Drive that fuels evolution what is it? The Life Drive permeates all of life and is the force that drives Darwinian evolution. It is theorized that Life is a previously unidentified parameter in Einstein's Theory of Relativity and that it exists at the conditions opposite to the Big Bang conditions. Most religious and belief systems, whether god-based such as Judaism, Christianity, or Islam, or spiritually-based such as Buddhism or Taoism, are oriented towards the ultimate truth that is Life.

THE CHARACTERS: Prosenjit Poddar was the brilliant engineering student who wanted nothing more than to return to his native India a big success and to marry a woman of his parents' choosing. And Larry Moore was the young psychologist who thought he recognized the warning signs that his patient was not just suffering from a jilted love affair but was about to commit an act of murder. THE STAKES: In a culture clash that pits the traditional values of male-dominated India against free-love attitudes of Berkeley in the '60s, an impending tragedy unfolds. The Living Soul

In this strikingly original book, published to mark the fifth centenary of Teresa of Avila's birth, Dr Peter Tyler takes the writings of the sixteenth-century Spanish reformer and brings them into dialogue with some of the foremost thinkers who have shaped our contemporary notion of self. Starting with Freud and Kant, Tyler shows how the post-modern deconstruction of the self has allowed new possibilities for the spiritual to emerge once again as a vital force in our self-understanding. Key psychological and philosophical notions such as the unconscious, ego and desire are presented in ways that open up the door to the soul. Inspired by Teresa of Avila, Tyler offers possibilities of spiritual freedom to the troubled, contemporary self.

Discovering the Soul

True stories of transitioning from medical school classrooms to the realities of the hospital: "Moving, eloquent, and often unforgettable" (Atul Gawande, MD). After years of practice, doctors can sometimes seem aloof, uncaring, and hurried. What goes on in their minds? Were they always like that, or has their work changed them? And how do some physicians manage to retain their warmth and humanity over the course of a long career? This "thoughtful and illuminating" book takes us into the day-to-day lives of third-year medical students at an Ivy League school—just starting out in their profession and dealing with patients face-to-face for the first time (Publishers Weekly). In their own words, more than forty of them reveal what it's really like to enter this field, having their principles of scientific rigor and idealism tested as they cope with real people and real crises in real time. This doctor's-eye-view of the dramas—and occasional comedies—of the world of health care offers fascinating insights about clinical medicine and a behind-the-scenes look at a job that can range from repetitive routines to life-and-death decisions at any given moment. These stories "offer a unique vantage on illness, life,

"Whoever Saves a Life, It Is Considered as If He Saved an Entire World" Dr. Rick Hodes arrived in Africa more than two decades ago to help the victims of a famine, but he never expected to call this extremely poor continent his home. Twenty-eight years later, he is still there. This Is a Soul tells the remarkable story of Rick Hodes's journey from suburban America to Mother Teresa's clinic in Addis Ababa, Ethiopia. As a boy, Rick was devoted to helping those in need, and eventually he determined that becoming a doctor would allow him to do the most good. When he heard about famine in Africa, that's where he went, and when genocide convulsed Rwanda, he went into the refugee camps to minister to the victims. When he was told that Ethiopia was allowing its Jews to emigrate to Israel, he went to help. While there, he was drawn to Mother Teresa's mission in Addis Ababa. It was there that Rick found his calling when he began caring for the sickest children in one of the world's poorest countries. But he did more than that—he began taking them into his home and officially adopted five of them. This Is a Soul is also a book filled with great joy and triumph. When Rick's kids return from surgery or life-saving treatments, he is exultant. "Seeing these people after surgery is like going to heaven," he says. Marilyn Berger went to Africa to write about Dr. Hodes, but while there, she became involved with the story. When she came upon a small, deformed, and malnourished boy begging on the street, she recognized immediately that he had the exact disease Rick could cure. She took him to Rick, who eventually arranged for the boy to have a complicated and risky surgery, which turned out to be incredibly successful. The boy's story—intertwined with Rick's, and Marilyn's as well—is unforgettable in its pathos and subtle humor. This Is a Soul is not just a story of the savior and the saved, it is a celebration of love and wisdom, and an exploration of how charity and devotion can actually change lives in an overcrowded, unjust, and often harsh world.

The Doctor and the Soul

Cancer moves more slowly today, thanks to modern science. But science provides scant solace when it fails, slowly, to save our physical forms and religious faith too often proves fragile during a long mortal watch. For decades, Dr Stephen Iacoboni carried John Donne's words with him in his coat pocket: No man is an island. Every man's death diminishes me. Therefore, do not send to know For whom the bell tolls. It tolls for thee. Donne's sentiment lived in his heart and, over time, began to break it, when the best medicine was not enough. Every patient's death begged questions. I knew there was something missing for them, and for me that until I could offer answers I would never be the healer I hoped to become. The physician did not heal himself. His patients did, at last, after extracting promises that he would bring their revelations to light. It is their stories that guide this voyage of thought and spirit, laughter and love. This book is a primer for people facing life's last and greatest mystery, and for those who travel with them an inspirational alternative to loneliness and fear and an introduction to what is, simply, The Undying Soul.
