Understanding Democracy

This book discusses the philosophical underpinnings, constitutional provisions, and judicial application of the separation of powers doctrine. In the United States, the doctrine has evolved to ensure that there are three branches of government, each with its own function and each with an equal amount of power. This allows each branch, executive, legislative, and judicial to work efficiently and prevents the excessive accumulation of power by any single branch through a system of checks and balances. This book presents an overview of the rationale of the doctrine along with its application.

Deliberative Democracy in America

When the Founding Fathers forged the government for the newly independent United States of America, they were careful not to give too much power to any one person or group. The separation of power between the three branches of government is one of the hallmarks of American democracy. Your readers will examine the concept of the separation of power and how it applies to the government of the United States. Text is presented in accessible chunks and

How the U. S. Government Works

Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

Our American Government textbook adheres to the scope and sequence of introductory American government courses nationwide. We have endeavored to make the workings of American Government interesting and accessible to students while maintaining the conceptual coverage and rigor inherent in the subject at the college level. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as engaged citizens. The organization and pedagogical features were developed and vetted with feedback from American government instructors dedicated to the project.

U.S. Government Structure, Level I

We are taught in civics class that the Constitution provides for three basic branches of government: executive, judicial, and legislative. While the President and Congress as elected by popular vote are representative, can they really reflect accurately the will and sentiment of the populace? Or do money and power dominate everyday politics to the detriment of true self-governance? Is there a way to put "&"We the people&" back into government? Ethan Leib thinks there is and offers this blueprint for a fourth branch of government as a way of giving the people a voice of their own. While drawing on the rich theoretical

literature about deliberative democracy, Leib concentrates on designing an institutional scheme for embedding deliberation in the practice of American democratic government. At the heart of his scheme is a process for the adjudication of issues of public policy by assemblies of randomly selected citizens convened to debate and vote on the issues, resulting in the enactment of laws subject both to judicial review and to possible veto by the executive and legislative branches. The "popular" branch would fulfill a purpose similar to the ballot initiative and referendum but avoid the shortcomings associated with those forms of direct democracy. Leib takes special pains to show how this new branch would be integrated with the already existing governmental and political institutions of our society, including administrative agencies and political parties, and would thus complement rather than supplant them.

Branches of Government

Four Branches of Government The words that describe and name our branches of government in the Constitution's Articles I, II and III are the following in order of appearance: Congress, Senate, House of Representatives, Representative, Representatives, Senators, Senator, Vice President, the President of the United States, each House, either House, neither House, two Houses, that House, the other House, both Houses, a President of the United States of America, said House, the President, one supreme Court and those are all the words. Having four branches being the President, House of Representatives, Senate, and supreme Court, each branch now has 25 percent of the power if disbursed evenly. How many branches of government can shut down government? The answer is three branches, the President (25 percent of power), the House of Representatives (25 percent of power), and the Senate (25 percent of power), this being done while the supreme Court (25 percent of power) can only watch because it has no legislative or executive powers. During the last government shutdown, who shut down the government, the legislative branch or the House of Representatives? If you answer the legislative branch, then which one? That in itself is an admittance of two branches of government that come together using their shared powers to legislate our laws. Now as you should be able to see the proper descriptive phrase to describe our government (NOT the Actual Bodies or Branches but the Powers of the branches) is executive branch, legislative branches (meaning two or more and both branches, House of Representatives and the Senate, convene to form Congress to legislate laws under the powers of the Constitution given to both branches) and judicial branch.
