The now venerable firm of Royal Barry Wills was founded in a one-room office on Boston's Beacon Street in 1925. Initially fueled by word of mouth and occasional newspaper exposure, the firm gained admiration for Wills's fresh take on various New England styles, including Georgian, Tudor, French Provincial, and Colonial American. Driven by the country's desire for both aesthetic appeal and practicality, the firm's popularity increased dramatically with its focus on the creation of modern homes inspired by the one-and-a-half-story Cape Cod houses, which perfectly balanced the classic and the new. Now run by his son, Richard Wills, the firm has been designing elegant private homes in the classically inspired Colonial New England tradition for more than eighty-five years. As time has passed, their Cape Cod-style homes have proven remarkably adaptable to the demands of contemporary life, while staying true to Wills's original flair for intermingling past and present. This book features examples of the firm's work from its founding to the present, with an emphasis on more recent houses that have been built throughout New England. Microbial Physiology retains the logical, easy-to-follow organization of the previous editions. An introduction to cell structure and synthesis of cell components is provided, followed by detailed discussions of genetics, metabolism, growth, and regulation for anyone wishing to understand the mechanisms underlying cell survival and growth. This comprehensive reference approaches the subject from a modern molecular genetic perspective, incorporating new insights gained from various genome projects. The major objective of this book is to identify and focus attention on those methods and concepts that contribute to an understanding of organismal or genetic persistence. In addition, information about microbial physiology, genetics and ecology contributing to persistence of microorganisms or the measurement of persistence will be discussed. Consequently, there is a great need for more baseline information concerning the ecology of microbes in the natural environment. In determining the underlying risks associated with the release of genetically engineered microorganisms, both the target of risk and the critical exposure level must be identified. An ever-increasing thirst for information in recent years among consumers, researchers, and the general population has necessitated continuous growth of internet architecture and accessibility, an issue which, if not addressed properly, may inhibit the growth of the internet as a whole. Solutions for Sustaining Scalability in Internet Growth investigates current issues impeding the growth of information architecture and explores methods for developing a wider-reaching and ever-evolving internet. The book presents viable solutions to some of the current threats to robust and pervasive information systems, enabling internet actors such as network providers, service providers, vendors, and regulatory bodies to ensure the creation of a more accessible and balanced internet. Time surrounds us. It defines our experience of the world; it echoes through our every waking hour. Time is the very foundation of conscious experience. Yet as familiar as it is, time is also deeply mysterious. We cannot see, hear, smell, taste, or touch it. Yet we do feel it—or at least we think we feel it. No wonder poets, writers, philosophers, and scientists have grappled with time for centuries. In his latest book, award-winning science writer Dan Falk chronicles the story of how humans have come to understand time over the millennia, and by drawing from the latest research in physics, psychology, and other fields, Falk shows how that understanding continues to evolve. In Search of Time begins with our earliest ancestors' perception of time and the discoveries that led—with much effort—to the Gregorian calendar, atomic clocks, and "leap seconds." Falk examines the workings of memory, the brain's remarkable "bridge across time," and asks whether humans are unique in their ability to recall the past and imagine the future. He explores the possibility of time travel, and the paradoxes it seems to entail. Falk looks at the quest to comprehend the beginning of time and how time—and the universe—may end. Finally, he examines the puzzle of time's "flow," and the remarkable possibility that the passage of time may be an illusion.

Entertaining, illuminating, and ultimately thought provoking, In Search of Time reveals what some of our most insightful thinkers have had to say about time, from Aristotle to Kant, from Newton to Einstein, and continuing with the brightest minds of today. Language learning research aims to describe and fully explain how and why language learning takes place, but can fall short of its stated purpose. Systematic, rigorous research is needed if the growing field of language learning is to progress methodically. This book demonstrates and fully explains such a methodology. Given that research in language acquisition yields practical pedagogical implications, it is crucial that it is rigorous and accurate. This book offers a quantitative research methodology that relies on statistical analysis in order to make inferences and conclusions about language learning. Experimental research aims to understand differences between or within groups of learners under manipulated environments. It requires strict control of conditions, enabling interpretations with a low factor of error. Aek Phakiti provides step-by-step guidelines and underlying principles, epistemology and methodology, in a book that is essential for advanced students of language acquisition and language and education. This volume is a unique overview of cardiovascular development from the cellular to the organ level across a broad range of species. The first section focuses on the molecular, cellular, and integrative mechanisms that determine cardiovascular development. The second section has eight chapters that summarize cardiovascular development in invertebrate and vertebrate systems. The third section discusses the effects of disease and environmental and morphogenetic influences on nonmammalian and mammalian cardiovascular development. It includes strategies for the management of congenital cardiovascular malformations in utero and postnatally. Roman Archaeology for Historians provides students of Roman history with a guide to the contribution of archaeology to the study of their subject. It discusses the issues with the use of material and textual evidence to explain the Roman past, and the importance of viewing this evidence in context. It also surveys the different approaches to the archaeological material of the period and examines key themes that have shaped Roman archaeology. At the heart of the book lies the question of how archaeological material can be interpreted and its relevance for the study of ancient history. It includes discussion of the study of landscape change, urban topography, the economy, the nature of cities, new approaches to skeletal evidence and artefacts in museums. Along the way, readers gain access to new findings and key sites - many of which have not been discussed in English before and many, for which, access may only be gained from technical reports. Roman Archaeology for Historians provides an accessible guide to the development of archaeology as a discipline and how the use of archaeological evidence of the Roman world can enrich the study of ancient history, while at the same time encouraging the integration of material evidence into the study of the period's history. This work is a key resource for students of ancient history, and for those studying the archaeology of the Roman period. Influential accounts of European cultural history variously suggest that the rise of nominalism and its ultimate victory over realist orientations were highly implemental factors in the formation of Modern Europe since the later Middle Ages, but particularly the Reformation. Quite probably, this is a simplification of a state of affairs that is in fact more complex, indeed ambiguous. However, if there is any truth in such propositions - which have, after all, been made by many prominent commentators, such as Panofsky, Heer, Blumenberg, Foucault, Eco, Kristeva - we may no doubt assume that literary texts will have responded and in turn contributed, in a variety of ways, to these processes of cultural transformation. It seems of considerable interest, therefore, to take a close look at the complex, precarious position which literature, as basically a symbolic mode of signification, held in the perennial struggles and discursive negotiations between the semiotic 'twin paradigms' of nominalism and realism. This collection of essays (many of them by leading scholars in the field) is a first comprehensive attempt to tackle such issues - by analyzing representative literary texts in terms of their underlying semiotic orientations, specifically of nominalism, but also by studying pertinent historical, theoretical and discursive co(n)texts of such developments in their relation to literary discourse. At the same time, since 'literary nominalism' and 'realism' are conceived as fundamentally aesthetic phenomena instantiating a genuinely 'literary debate over universals', consistent emphasis is placed on the discursive dimension of the texts scrutinized, in an endeavour to re-orient and consolidate an emergent research paradigm which promises to open up entirely new perspectives for the study of literary semiotics, as well as of aesthetics in general. Historical focus is provided by concentrating on the English situation in the era of transition from late medieval to early modern (c. 1350-1650), but readers will also find contributions on Chrétien de Troyes and Rabelais, as well as on the 'aftermath' of

the earlier debates - as exemplified in studies of Locke and (post)modern critical altercations, respectively, which serve to point up the continuing relevance of the issues involved. A substantial introductory essay seeks to develop an overarching theoretical framework for the study of nominalism and literary discourse, in addition to offering an in-depth exploration of the 'nominalism/realism-complex' in its relation to literature. An extensive bibliography and index are further features of interest to both specialists and general readers. The author presents an account of her sister's suicide, and the lifelong impact that the suicide has had on her own life and the lives of the other members of her family. Maxwell Jameson Trevor, prince of Lilaria, hates his royal role. Despising the limelight, he takes solace in his art studio and steers clear of any drama. But when one of the newly discovered royals passes away, Maxwell's brother Alex asks him to break the news to the old man's granddaughter. Though he hates to be the bearer of doom and gloom, he doesn't want the poor girl to find out from the tabloids. For Maxwell knows all too well how devastating that could be. Coming from a broken home and modest background, newly ordained Lady Meredith Thysmer has seized her chance to make a better life for herself and her son. She's not afraid to use her best assets to get what she wants. But when the unpretentious yet devastatingly handsome Max delivers his news, her plans for the future come crashing to a halt. In the challenging days ahead, Max's compassion, humor, and steadfast loyalty to Meredith and her son win her over. She quickly finds herself doing something she swore would never happen again: falling in love. And yet Maxwell still refuses to completely drop his guard. Somehow Meredith's got to find a way to seduce this reluctant royal. The 83 species featured in this book, in date sequence of discovery, had not been recorded in Britain or Ireland before 1946. The original accounts of the sightings published in issues of *British Birds** between 1947 and 1982 are now reprinted and supplemented with comment by Dr Sharrock on subsequent occurrences and current status. In addition, Peter Grant provides identification notes drawing attention to points not covered in the original accounts. There is also a world distribution map for each species and a line illustration to head each of the accounts. At the end of the book a section of plates reproduces 81 'first-sighting' photographs covering 32 of the species in the book. 'Peru' is an on-the-spot companion guide to this country. Kiki Lucas has lived a life with suppressed dreams of having a child and growing old with a man who dotes on her. Somewhere along the way she settles for Kyle, a bi-sexual swinger who drags her into his promiscuous sex life in the hills above Hollywood. When Kyle commits suicide after learning he is HIV positive, Kiki continues the promiscuous sex life she has grown attached to and frequently invites men she meets online to her home for casual encounters. When she unknowingly invites the man who infected her husband over, she is saved by a man posing as the plumber. She believes he is another casual encounter she invited over and makes forceful advances. The plumber is shocked and turns her away. But this plumber named Billy Casper finds himself strangely attracted to Kiki, and returns with flowers and poems he has penned for her. Kiki grows weary, reminding him that she wanted a no strings attached physical relationship, not another significant other. Billy, though denying her physically, cannot leave her alone-even after a restraining order is put on him. It is only then that Kiki discovers that Billy is her guardian angel, sent to protect her for a special purpose. Kiki then allows herself to love Billy in return. But when Gabriel, Billy's boss in heaven, re-assigns him because he is falling in love with his client, Kiki grows suicidal thinking about being torn from another man she loves. She attempts to outwit her new guardian angel by killing herself. For the Vampire community, the Solstice Choosing has been the holiest night of the year - for a hundred thousand years.
