In the process industry, shutdown and turnaround costs are responsible for an excessive amount of maintenance expenses. *Process Plants: Shutdown and Turnaround Management* explores various types of shutdowns, presents recommendations for better management, and offers feasible solutions to help reduce overheads. Because turnaround management is the largest maintenance activity, plant turnaround is the focal point of this text. The book details a plan to lengthen the interval between turnarounds, and curtail costs in process production management by at least 30 percent. This practical guidebook provides a thorough study of shutdown management, discusses different types of shutdown and managing events (emergency, unplanned, planned, and turnaround), and covers all aspects of plant turnaround management including startup, shutdown, and maintenance. It describes the five phases of shutdown management—initiating, planning, executing, controlling, and closing. It contains specific principles and precautions for successful shutdown planning, and highlights many aspects including turnaround philosophy, planning and scheduling, estimation, contractor management, execution, safety management, managing human resources, and post shut down review. *Process Plants: Shutdown and Turnaround Management* also includes topical information that readers can successfully apply to future shutdown projects. It is suitable for industry professionals and

Psychology exam, this Crash Course is based on an in-depth analysis of the revised AP® Psychology course description outline and sample AP® test questions. It covers only the information tested on the new exam, so you can make the most of your valuable study time. Expert Test-taking Strategies Crash Course presents detailed, question-level strategies for answering both the multiple-choice and essay questions. By following this advice, you can boost your score in every section of the test. Take REA's Online Practice Exam After studying the material in the Crash Course, go to the online REA Study Center and test what you've learned. Our practice exam features timed testing, detailed explanations of answers, and automatic scoring analysis. The exam is balanced to include every topic and type of question found on the actual AP® exam, so you know you're studying the smart way. Whether you're cramming for the test at the last minute, looking for extra review, or want to study on your own in preparation for the exams - this is the study guide every AP® Psychology student must have. When it's crucial crunch time and your Advanced Placement® exam is just around the corner, you need REA's Crash Course for AP® Psychology! About the Author Larry Krieger earned a B.A. in Psychology from the University of North Carolina at Chapel Hill and an M.S. from Wake Forest University. In a career spanning more than 40 years, Mr. Krieger has taught a variety of AP® subjects. His popular courses were renowned for their energetic presentations, commitment to scholarship, and helping students achieve high AP® exam scores. All of Mr. Krieger's students scored above a 3 on their AP® exams, with most students scoring a 4 or a 5. In 2004 and 2005, the College Board® recognized Mr. Krieger as one of the nation's foremost AP® teachers. Mr. Krieger's success has extended far beyond the classroom. He has written several history textbooks and is a co-author of REA's Art History AP® test preparation guide. His latest venture, the AP® Crash

The neuro rehab text that mirrors how you learn and how you practice! Take an evidence-based approach to the neurorehabilitation of adult and pediatric patients across the lifespan that reflects the APTA's patient management model and the WHO's International Classification of Function (ICF). You'll study examination and interventions from the body structure/function impairments and functional activity limitations commonly encountered in patients with neurologic disorders. Then, understanding the disablement process, you'll be able to organize the clinical data that leads to therapeutic interventions for specific impairments that can then be applied as appropriate anytime that impairment is detected, regardless of the medical diagnosis.

This report provides methods and useful information for conducting effective user surveys at airports. The guidebook introduces the basic concepts of survey sampling and the steps involved in planning and implementing a survey; describes the different types of airport user surveys; and provides guidance on how to design a survey and analyze its results. This guidebook will be of value to airport operators, planners, designers, and other stakeholders that need to survey airport users to obtain useful information to plan and operate their facilities appropriately and efficiently. Airport facilities can include all aspects of airport terminal buildings, parking lot operations, surface transportation, food and retail services, and employee accommodations, among others.

Federal Assistance to Law Enforcement

Professional Safety

Science, Technology, & Criminal Justice examines the issues that trial and appellate judges

confront when addressing the scientific breakthroughs and technological advancements that appear with increasing frequency in criminal proceedings. The book assesses how judges treat the admissibility of both the results and the procedures of different forensic techniques in criminal trials. This assessment - critical in determining how our legal system will maintain the appropriate balance between protecting our personal safety, and preserving our civil liberties in a time of amazing scientific discoveries - culminates in an analysis of how the disciplines of law and science come together in the pursuit of justice.
