'The color is hideous enough, and unreliable enough, and

infuriating enough, but the pattern is torturing.' Written with barely controlled fury after she was confined to her room for 'nerves' and forbidden to write, Gilman's pioneering feminist horror story scandalized nineteenth-century readers with its portrayal of a woman who loses her mind because she has literally nothing to do. Introducing Little Black Classics: 80 books for Penguin's 80th birthday. Little Black Classics celebrate the huge range and diversity of Penguin Classics, with books from around the world and across many centuries. They take us from a balloon ride over Victorian London to a garden of blossom in Japan, from Tierra del Fuego to 16th-century California and the Russian steppe. Here are stories lyrical and savage; poems epic and intimate; essays satirical and inspirational; and ideas that have shaped the lives of millions. Charlotte Perkins Gilman (1860-1935). Gilman's work is available in Penguin Classics in The Yellow Wall-Paper, Herland and Selected Writings.

The Tenant of Wildfell Hall

The Great Gatsby is a 1925 novel written by American author F. Scott Fitzgerald that follows a cast of characters living in the fictional town of West and East Egg on prosperous Long Island in the summer of 1922. The story primarily concerns the young and mysterious millionaire Jay Gatsby and his quixotic passion and obsession for the beautiful former debutante Daisy Buchanan. The Great Gatsby explores themes of decadence, idealism, resistance to change, social upheaval, and excess, creating a portrait of the Jazz Age or the Roaring Twenties that has been described as a cautionary tale regarding the American Dream. Set on the prosperous Long Island of 1922, The Great Gatsby provides a critical social history of America during the Roaring Twenties within its fictional narrative. That era, known for profound economic prosperity, the development of jazz music flapper culture, new technologies in communication (motion pictures, broadcast radio, recorded music) forging a genuine mass culture; and bootlegging, along with other criminal activity, is plausibly depicted in Fitzgerald's novel. Fitzgerald uses many of these societal developments of the 1920s that were to build Gatsby's stories from many of the simple details like automobiles to broader themes like Fitzgerald's discreet allusions to the organized crime culture which was the source of Gatsby's fortune. Fitzgerald depicts the garish society of the Roaring Twenties by

Seminar paper from the year 2006 in the subject English Language and Literature Studies - Comparative Literature, grade: 1.7, University of Duisburg-Essen, language: English, abstract: In the United Kingdom there are mainly two types of newspapers, namely the Quality Papers and the Tabloids. The question is in how far these two types of newspapers differ from each other, if they differ at all, and what the differences are, if any. How are Tabloids and Quality Papers defined and do they only differ in appearance or in content, too? To answer all these questions it is important to first give a definition of both newspapers and then to compare a typical Tabloid with a typical Quality Paper to make these distinctions obvious. To come to a clear conclusion it is important to focus on main aspects such as layout, language and reliability or seriousness.

The use of case studies to build and test theories in political science and the other social sciences has increased in recent years. Many scholars have argued that the social sciences rely too heavily on quantitative research and formal models and have attempted to develop and refine rigorous methods for using case studies. This text presents a comprehensive analysis of research methods using case studies and examines the place of case studies in social science methodology. It argues that case studies, statistical methods, and formal models are complementary rather than competitive. The book explains how to design

case study research that will produce results useful to policymakers and emphasizes the importance of developing policy-relevant theories. It offers three major contributions to case study methodology: an emphasis on the importance of within-case analysis, a detailed discussion of process tracing, and development of the concept of typological theories. Case Studies and Theory Development in the Social Sciences will be particularly useful to graduate students and scholars in social science methodology and the philosophy of science, as well as to those designing new research projects, and will contribute greatly to the broader debate about scientific methods.

For many years, experiments using chimpanzees have been instrumental in advancing scientific knowledge and have led to new medicines to prevent life-threatening and debilitating diseases. However, recent advances in alternate research tools have rendered chimpanzees largely unnecessary as research subjects. The Institute of Medicine, in collaboration with the National Research Council, conducted an in-depth analysis of the scientific necessity for chimpanzees in NIH-funded biomedical and behavioral research. The committee concludes that while the chimpanzee has been a valuable animal model in the past, most current biomedical research use of chimpanzees is not necessary, though noted that it is impossible to predict whether research on emerging or new diseases may necessitate chimpanzees in the future.

and Peace. Although there have been many interpretations of the adage, Berlin uses it to mark a fundamental distinction between human beings who are fascinated by the infinite variety of things and those who relate everything to a central, all-embracing system. Applied to Tolstoy, the saying illuminates a paradox that helps explain his philosophy of history: Tolstoy was a fox, but believed in being a hedgehog. One of Berlin's most celebrated works, this extraordinary essay offers profound insights about Tolstoy, historical understanding, and human psychology. This new edition features a revised text that supplants all previous versions, English translations of the many passages in foreign languages, a new foreword in which Berlin biographer Michael Ignatieff explains the enduring appeal of Berlin's essay, and a new appendix that provides rich context, including excerpts from reviews and Berlin's letters, as well as a startling new interpretation of Archilochus's epigram.

Mennell leads up to such contemporary questions through a careful study of the whole span of American development, from the first settlers to the American Empire. He takes a novel approach, analysing the USA's experience in the light of Norbert Elias's theory of civilizing (and decivilizing) processes. Drawing comparisons between the USA and other countries of the world, the topics discussed include: American manners and lifestyles Violence in American society The impact of markets on American social character American expansion, from the frontier to empire The 'curse of the American Dream' and increasing inequality The religiosity of American life Mennell shows how the long-term experience of Americans has been of growing more and more powerful in relation to their neighbours. This has had all-pervasive effects on the way they see themselves, their perception of the rest of the world, and how the rest of the world sees them. Mennell's compelling and provocative account will appeal to anyone concerned about America's role in the world today, including students and scholars of American politics and society.

With this influential book of essays, Jonathan Z. Smith has pointed the academic study of religion in a new theoretical direction, one neither theological nor willfully ideological. Making use of examples as apparently diverse and exotic as the Maori cults in nineteenth-century New Zealand and the events of Jonestown, Smith shows that religion must be construed as conventional, anthropological, historical, and as an exercise of imagination. In his analyses, religion emerges as the product of historically and geographically situated human ingenuity, cognition, and curiosity—simply put, as the result of human labor, one of the decisive but wholly ordinary ways human beings create the worlds in which they live and make sense of them. "These seven essays . . . display the critical intelligence, creativity, and sheer common sense that make Smith one of the most methodologically sophisticated and suggestive historians of religion writing today. . . . Smith scrutinizes the fundamental problems of taxonomy and comparison in religious studies, suggestively redescribes such basic categories as canon and ritual, and shows how frequently studied myths may more likely reflect situational incongruities than vaunted mimetic congruities. His final essay, on Jonestown, demonstrates the interpretive power of the historian of religion to render intelligible that in our own day which seems most bizarre."—Richard S.
