Airline Operations and Management Airline Operations and Management: A Management Textbook is a survey of the airline industry, mostly from a managerial perspective. It integrates and applies the fundamentals of several management disciplines, particularly economics, operations, marketing and finance, in developing the overview of the industry. The focus is on tactical, rather than strategic, management that is specialized or unique to the airline industry. The primary audiences for this textbook are both senior and graduate students of airline management, but it should also be useful to entry and junior level airline managers and professionals seeking to expand their knowledge of the industry beyond their own functional

area.

eBook. Manual. Gestión de reservas de habitaciones y otros servicios de alojamientos (UF0050). Certificados de profesionalidad. Recepción en alojamientos (HOTA0308) El libro se ha estructurado en nueve capítulos en los que se expone y desarrolla la normativa aplicable a la industria del turismo, la cual, bajo la tutela de la Administración, desvuelve su actividad empresarial. Conjuntamente se analizan los derechos y deberes de los sujetos intervinientes (consumidores/turistas, empresarios y Administración). Al mismo tiempo se detallan, aglutinan y examinan las nociones básicas del régimen jurídico del turismo a través de las diferentes empresas y modalidades contractuales turísticas. En cada uno de los capítulos que integran este manual se expone un aspecto turístico cuyo conocimiento normativo resulta imprescindible para cualquier persona vinculada al sector; en el primero se examina la contextualización normativa turística, los sujetos ligados a esta actividad, la disciplina turística y su aplicación; en el segundo se describe qué es el arbitraje turístico; en el tercero se abordan los contratos turísticos; el contrato de intermediación se analiza en el cuarto; en el quinto se comenta el contrato de transporte; en el sexto los seguros turísticos; en el séptimo se estudian el contrato de alojamiento y los contratos relacionados, como son el contrato de reserva (en régimen de contingente y la reserva individual), el de gestión hotelera y el contrato de aprovechamiento por turno de bienes de uso turístico; en los dos últimos y por este orden se abordan la restauración turística y otros servicios turísticos, con especial atención a la figura del guía turístico, sobre el que se realiza una comparativa de la profesión por Comunidades Autónomas. Asimismo, este capítulo recoge brevemente la incidencia de las normativas Ley Ómnibus, la Directiva Bolkestein y la Ley Paraguas en el sector turístico.

Hotel Front Office This study is principally concerned with the ethical dimensions of identity management technology - electronic surveillance, the mining of personal data, and profiling - in the context of transnational crime and global terrorism. The ethical challenge at the heart of this study is to establish an acceptable and sustainable equilibrium between two central moral values in contemporary liberal democracies, namely, security and privacy. Both values are essential to individual liberty, but they come into conflict in times when civil order is threatened, as has been the case from late in the twentieth century, with the advent of global terrorism and trans-national crime. We seek to articulate legally sustainable, politically possible, and technologically feasible, global ethical standards for identity management technology and policies in liberal democracies in the contemporary global security context. Although the standards in question are to be understood as

global ethical standards potentially to be adopted not only by the United States, but also by the European Union, India, Australasia, and other contemporary liberal democratic states, we take as our primary focus the tensions that have arisen between the United States and the European Union.

International Encyclopedia of Hospitality Management Since the enactment of the Airline Deregulation Act in 1978, questions that had been at the heart of the ongoing debate about the industry for eighty years gained a new intensity: Is there enough competition among airlines to ensure that passengers do not pay excessive fares? Can an unregulated airline industry be profitable? Is air travel safe? While economic regulation provided a certain stability for both passengers and the industry, deregulation changed everything. A new fare structure emerged; travelers faced a variety of fares and travel restrictions; and the offerings changed frequently. In the last fifteen years, the airline industry's earnings have fluctuated wildly. New carriers entered the industry, but several declared bankruptcy, and Eastern, Pan Am, and Midway were liquidated. As financial pressures mounted, fears have arisen that air safety is being compromised by carriers who cut costs by skimping on maintenance and hiring inexperienced pilots. Deregulation itself became an issue with many critics calling for a return to some form of regulation. In this book, Steven A. Morrison and Clifford Winston assert that all too often public discussion of the issues of airline competition, profitability, and safety take place without a firm understanding of the facts. The policy recommendations that emerge frequently ignore the long-run evolution of the industry and its capacity to solve its own problems. This book provides a comprehensive profile of the industry as it has evolved, both before and since deregulation. The authors identify the problems the industry faces, assess their severity and their underlying causes, and indicate whether government policy can play an effective role in improving performance. They also develop a basis for understanding the industry's evolution and how the industry will eventually adapt to the unregulated economic environment. Morrison and Winston maintain that although the airline industry has not reached long-run equilibrium, its evolution is proceeding in a positive direction—one that will preserve and possibly enhance the benefits of deregulation to travelers and carriers. They conclude that the federal government's primary policy objective should be to expand the benefits from unregulated market forces to international travel. Brookings Review article also available

Information Technology for Travel and Tourism The proceedings of the conference ENTER - International Conference on Information and Communication Technologies in Tourism - provide an international forum for the discussion of the role of telecommunication and information systems in tourism, inform potential users and people concerned with the importance of such technologies and explain their functioning, and finally intensify the contact and the communication between researchers, system developers and users. The main topics of ENTER 96 are business engineering and standardisation, covering a wide area of subjects like the redesign of touristic products and the processes of their production. This covers, however, not only single business processes but the entire value chain in tourism, ending up in redesign of distribution channel and changing relations among principals, tour operators, travel agents and customers.

Manual of Travel Agency Practice This book addresses the digitization of all processes and value chains in the tourism, travel, hospitality and catering industries. By exploring the new technological trends it provides a solid basis for analysing the impacts of the Information Communication Technology (ICT) revolution on the tourism industry. The book adopts a strategic management and marketing perspective for tourism enterprises and destinations. It suggests that ETourism revolutionizes all business processes, the entire value chain as well as the strategic relationships of tourism organizations with all their stakeholders. It additionally focuses on how ICTs are employed in airlines, hotels, travel agencies, tour operators and destinations management organizations. The book demonstrates that tourism ICTs increasingly determine the competitiveness of the organization, and therefore, they are critical for the competitiveness of the industry in the longer term. The book is aimed at advanced undergraduate and

postgraduate students in business, tourism and hospitality programmes that need to explore how they can use ICTs in a strategic context. It is also anticipated that researchers and practitioners will find it useful and stimulating. Features and benefits: Strategic perspective demonstrates the contribution of ICTs to the competitiveness of tourism organizations and destinations A wealth of international examples ensure global application and relevance Extensive use of case studies and illustrative examples demonstrate the link between theory and real world tourism situations Discussion topics encourage students to analyse further the information covered Extensive bibliography and further reading encourage more advanced study Associated website featuring up-to-date FT articles and power point slides create a comprehensive teaching and learning package. Manual of Travel Agency Practice This text provides an analysis of how technology is being applied within the travel and tourism industry. It covers systems used in Europe, the Far East and other English-speaking countries (except the US) and discusses the impact of the Internet and TV broadcast networks.

Voice & Data This research monograph aims at developing an integrative framework of hotel revenue management. It elaborates the fundamental theoretical concepts in the field of hotel revenue management like the revenue management system, process, metrics, analysis, forecasting, segmentation and profiling, and ethical issues. Special attention is paid on the pricing and non-pricing revenue management tools used by hoteliers to maximise their revenues and gross operating profit. The monograph investigates the revenue management practices of accommodation establishments in Bulgaria and provides recommendations for their improvement. The book is suitable for undergraduate and graduate students in tourism, hospitality, hotel management, services studies programmes, and researchers interested in revenue/yield management. The book may also be used by hotel general managers, marketing managers, revenue managers and other practitioners looking for ways to improve their

knowledge in the field.

Quantitative Problem Solving Methods in the Airline Industry This book provides a comprehensive introduction to travel marketing, tourism economics and the airline product. At the same time, it provides an overview on the political, socio-economic, environmental and technological impacts of tourism and its related sectors. This publication covers both theory and practice in an engaging style, that will spark the readers' curiosity. Yet, it presents tourism and airline issues in a concise, yet accessible manner. This will allow prospective tourism practitioners to critically analyze future situations, and to make appropriate decisions in their workplace environments. Moreover, the book prepares undergraduate students and aspiring managers alike with a thorough exposure to the latest industry developments. "Dr. Camilleri provides tourism students and practitioners with a clear and comprehensive picture of the main institutions, operations and activities of the travel industry." Philip Kotler, S.C. Johnson & Son Distinguished Professor of International Marketing, Kellogg School of Management, Northwestern University, Evanston/Chicago, IL, USA "This book is the first of its kind to provide an insightful and well-structured application of travel and tourism marketing and economics to the airline industry. Student readers will find this systematic approach invaluable when placing aviation within the wider tourism context, drawing upon the disciplines of economics and marketing." Brian King, Professor of Tourism and Associate Dean, School of Hotel and Tourism Management, The Hong Kong Polytechnic University, Hong Kong "The remarkable growth in international tourism over the last century has been directly influenced by technological, and operational innovations in the airline sector which continue to define the nature, scale and direction of tourist flows and consequential tourism development. Key factors in this relationship between tourism and the airline sector are marketing and economics, both of which are fundamental to the success of tourism in general and airlines in particular, not least given the increasing significance of low-cost airline operations. Hence, uniquely drawing together these three themes, this book provides a valuable introduction to the marketing and economics of tourism with a specific focus on airline operations, and should be considered essential reading for future managers in the tourism sector." Richard Sharpley, Professor of Tourism, School of Management, University of Central Lancashire, UK "The book's unique positioning in terms of the importance of and the relationships between tourism marketing, tourism economics and airline product will create a distinct niche for the book in the travel literature." C. Michael Hall, Professor of Tourism, Department of Management, Marketing and Entrepreneurship, University of Canterbury, Christchurch, New Zealand "A very unique textbook that offers integrated lessons on

marketing, economics, and airline services. College students of travel and tourism in many parts of the world will benefit from the author's thoughtful writing style of simplicity and clarity." Liping A. Cai, Professor and Director, Purdue Tourism & Hospitality Research Center, Purdue University, West Lafayette, IN, USA "An interesting volume that provides a good coverage of airline transportation matters not always well considered in tourism books. Traditional strategic and operational issues, as well as the most recent developments and emerging trends are dealt with in a concise yet clear and rational way. Summaries, questions and topics for discussion in each chapter make it a useful basis for both taught courses or self-education." Rodolfo Baggio, Professor of Tourism and Social Dynamics, Bocconi University, Milan, Italy "This is a very useful introductory book that summarises a wealth of knowledge in an accessible format. It explains the relation between marketing and economics, and applies it to the business of airline management as well as the tourism industry overall." Xavier Font, Professor of Sustainability Marketing, School of Hospitality and Tourism Management, University of Surrey, UK and Visiting Professor, Hospitality Academy, NHTV Breda, Netherlands "This book addresses the key principles of tourism marketing, economics and the airline industry. It covers a wide range of theory at the same time as offering real-life case studies, and offers readers a comprehensive understanding of how these important industries work, and the underpinning challenges that will shape their future. It is suitable for undergraduate students as well as travel professionals, and I would highly recommend it." Clare Weeden, Principal Lecturer in Tourism and Marketing at the School of Sport and Service Management, University of Brighton, UK "In the current environment a grasp of the basics of marketing to diverse consumers is very important. Customers are possessed of sophisticated knowledge driven by innovations in business as well from highly developed technological advances. This text will inform and update students and those planning a career in travel and tourism. Mark Camilleri has produced an accessible book, which identifies ways to accumulate and use new knowledge to be at the vanguard of marketing, which is both essential and timely." Peter Wiltshier, Senior Lecturer & Programme Leader for Travel & Tourism, College of Business, Law and Social Sciences, University of Derby, UK "This contemporary text provides an authoritative read on the dynamics, interactions and complexities of the modern travel and tourism industries with a necessary, and much welcomed, mixture of theory and practice suitable for undergraduate, graduate and professional markets." Alan Fyall, Orange County Endowed Professor of Tourism Marketing, University of Central Florida, FL, USA

determinadas competencias relacionadas con la ordenación legal de las actividades, servicios y productos turísticos, así como de las políticas turísticas desarrolladas por las instituciones públicas (Unión Europea, Estado español y Comunidades Autónomas). Con esta finalidad, este Manual de Derecho Administrativo del Sector Turístico, se presenta como un material de apoyo a la enseñanza de la asignatura correspondiente en los planes de estudio de los Grados en Turismo, con una decidida vocación de adaptarse al actual entorno de la docencia universitaria en clave ECTS. En este sentido, se ha realizado un notable esfuerzo de síntesis, con objeto de que el texto del Manual se adapte a una signatura de programación cuatrimestral, pero sin renunciar por ello a la exposición completa tanto de las instituciones y técnicas generales del sector turístico, como de los servicios y establecimientos específicos (alojativos, de intermediación, información). Asimismo, se ha tenido en todo momento presente que el destinatario de este libro no es un alumno del Grado de Derecho, sino un alumno del Grado en Turismo, que por tanto carece de nociones generales de Derecho, lo cual ha obligado utilizar un lenguaje sencillo y a realizar una exposición primordialmente descriptiva, soslayando cuestiones problemáticas desde el punto de vista jurídico. Además, con objeto facilitar la comprensión del texto, y dada la indicada ausencia de una parte general de Derecho Administrativo, se ha incluido un breve glosario de términos legales, que será de gran utilidad al lector. Finalmente, el libro está acompañado de un CD que contiene los textos legales tratados en el Manual, de modo que el alumno puede acercarse directamente a las fuentes legales de la materia.
